**The Maritime Labour Convention 2006: International Labour Law Redefined** - Jennifer Lavelle 2013-12-13

With the Maritime Labour Convention now in force (as of August 2013), the shipping industry is faced with a new international convention that has comprehensive implications across all sectors. This vital text provides timely analysis and thought-provoking essays regarding the Convention's application and enforcement in practice. Hailed as the "Seafarer's Bill of Rights" and the "fourth pillar" of the international regulatory regime for quality shipping, the Maritime Labour Convention is set to significantly alter the playing field for key stakeholders. This

book offers diverse and interesting commentary in respect of the Convention's impact on core sectors of the shipping industry, identifying both strengths and weaknesses of the Convention, as well as potential hurdles that will need to be overcome. Each chapter focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore, the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. ---In memory of Richard Shaw---

[The Maritime Labour Convention, 2006](#) - Moira McConnell 2011-05-23 This volume provides a detailed legal analysis of the fourth pillar of the international maritime regulatory regime, the comprehensive Maritime

Labour Convention, 2006, and its provisions to achieve decent work for seafarers and a level playing field for shipowners.

**2009 MODU Code** - International Maritime Organization 2010

The Assembly, at its twenty-sixth session (23 November to 2 December 2009), adopted by resolution A.1023(26) the Code for the Construction and Equipment of Mobile Offshore Drilling Units, 2009 (2009 MODU Code), which had been developed following a thorough revision of the 1989 MODU Code adopted by resolution A.649(16). In adopting the 2009 MODU Code, the Assembly recalled in particular that, since the adoption of the 1989 MODU Code, the Organization had adopted a significant number of amendments to many of the regulations of the International Convention for the Safety of Life at Sea, 1974 (SOLAS) referenced in the Code, and also that the International Civil Aviation Organization (ICAO) had adopted amendments to the Convention on International Civil Aviation which impacted on the provisions for helicopter facilities as contained in the Code. The 2009 MODU Code provides an international standard for MODUs of new construction which will facilitate their international movement and operation and ensure a level of safety for such units and for personnel on board, equivalent to that required by the 1974 SOLAS Convention and the Protocol of 1988 relating to the International Convention on Load Lines, 1966, for conventional ships engaged on international voyages. The 2009 MODU Code supersedes the 1989 MODU Code for mobile offshore drilling units, the keels of which are laid or which are at a similar stage of construction on or after 1 January 2012. For MODUs constructed before that date, the provisions of the 1989 MODU Code still apply.

**Condition Assessment Scheme** - International Maritime Organization 2005

The Condition Assessment Scheme (CAS) for oil tankers was adopted in 2001 and is applicable to all single-hull tankers of 15 years or older. Although the CAS does not specify structural standards in excess of the provisions of other IMO conventions, codes and recommendations, its requirements stipulate more stringent and transparent verification of the reported structural condition of the ship and that documentary and

survey procedures have been properly carried out and completed. The Scheme requires that compliance with the CAS is assessed during the Enhanced Survey Program of Inspections concurrent with intermediate or renewal surveys currently required by resolution A.744(18), as amended.--Publisher's description.

[The Military Guide to Financial Independence and Retirement](#) - Doug Nordman 2011-06

**Social Usage and Protocol Handbook** - Department of the Navy 2001-06-15

Members of the naval service will find that at all points in their careers they can expect to be involved to some extent in the planning and execution of official ceremonies and social events. Protocol is a code of established guidelines on proper etiquette and precedence which, when followed, lays the foundation for a successful event. From this foundation, the host should consider the facets which make a particular situation unique, and from there, use imagination to design a memorable occasion. The most important consideration in planning should always be the comfort of one's guests. A clever host/hostess is able to reach a proper mixture of protocol and common sense that will enable guests to enjoy themselves completely. If this is accomplished, an event is truly successful.

Procedures for Port State Control 2011 - International Maritime Organization 2012

Port state control (PSC) involves the inspection of foreign ships in national port areas to verify that the condition and operation of a ship and its equipment comply with the requirements of international regulations. While IMO has always acknowledged that enforcement of global maritime standards is the responsibility of flag states, the organisation nevertheless recognises that exercising the right to carry out Psc makes an important contribution to ensuring those standards are implemented consistently on ships of different nationalities. The sub-committee on flag state implementation has developed and maintained a framework to promote the global harmonisation and co-ordination of Psc activities resulting in the adoption of resolution A.1052(27) by the assembly of November 2011. This resolution contains the Procedures for port state control, 2011, and revokes resolutions A.787(19) and A.882(21).
