**Business Performance and Financial Institutions in Europe** - Alexandra Horobet  
2020-10-24

This book examines the business models,

performance, and decision-making approaches employed by financial institutions in Central and Southeast Europe. The respective contributions cover a wide range of industries, including banking, pharmaceuticals, and airline business services, and present both theoretical and empirical studies that highlight economy-wide risks and opportunities for European companies. The book is divided into four parts, the first of which provides a critical assessment of the competitiveness and performance of European companies, while the second examines decision-making approaches at financial institutions; the third and fourth parts address the macroeconomic risks and opportunities for business development in Europe. Intended for scholars, political decision-makers, and practitioners, the book offers new perspectives on Central and Southeast European financial and business research.

*Dictionary of Development Banking* - Traute Scharf 1972

Hardbound. This dictionary recognizes development banking as an independent and rapidly-growing discipline, which also has many ramifications. In operation it must consider financial propositions from economical, social and technological standpoints, combining the basics of economics, finance, commerce, accountancy, management, marketing, agronomy, social psychology and extensions techniques. The significant terms, concepts and methods are presented here with clarity and precision. The 1200 terms take into account the entire operational range of a development banking institution, its environmental context,

capitalization, organizational structure and personnel.

*From Monobank to Commercial Banking* - Jens Kovsted 2004

This comprehensive, detailed and up-to-date descriptive analysis of financial sector reforms in Vietnam since 1998 critically analyses key problems and obstacles facing the efforts to transform the Vietnamese economy, particularly the financial sector, from one subordinate to government objectives and goals to an autonomous sector guided by market forces and competitive pressures. Here, the history of financial sector liberalization is traced and close attention paid to the activities and autonomy of the State Bank of Vietnam, the institution responsible for the supervision and regulation of the financial sector in Vietnam. Overall, the authors argue that ensuring a timely, fair and transparent supervision and regulation of the financial sector is of central importance to financial sector development and stability.

Liberalizing financial markets is not solely a question of limiting and/or restricting government influence but may in fact involve the opposite, the influence and power of supervisory and regulatory institutions in many cases needing to be strengthened.

### **The Order of Economic Liberalization -**

Ronald I. McKinnon 1993-10

Can knowledge of financial policies in developing countries over four decades help the socialist economies of Asia and Eastern Europe become open market economies in the 1990s? In all these countries the loss of fiscal and monetary control has often resulted in high inflation that undermines the liberalization process itself. In the second edition of *The Order of Economic Liberalization*, Ronald McKinnon builds on his influential work on the liberalization of financial markets in less developed countries and outlines the progression necessary to move from a "repressed" to an open economy. New to this edition are chapters that contrast the gradual Chinese approach to liberalizing domestic and foreign trade with the "big bang" approach

followed by some Eastern European countries and republics of the former Soviet Union. Financial control and macroeconomic stability, McKinnon argues, are more critical to a successful transition than is any crash program to privatize state-owned industrial assets and the banking system.

*The West Bank and Gaza* - International Monetary Fund 2001-08-28

This is the latest in a series of economic reports by staff economists in the IMF's Middle Eastern Department. This book discusses the latest economic data coming out of the West Bank and Gaza Strip, with a particular emphasis on growing demographic concerns. The work is enhanced by the addition of numerous data tables and graphs, which extensively analyze economic trends in the region.

UNRWA and Palestinian Refugees - Sari Hanafi  
2014-04-24

Exploring the evolution of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), this book fills a lacuna in literature on the agency. UNRWA and Palestinian Refugees employs recent fieldwork in order to analyse challenges in programmes and service delivery, protection, camp governance, community participation, and camp improvement and reconstruction. The chapters examine the way UNRWA is adapting to a changing social, political and economic context, mostly within urban settings – a paradigmatic shift from understanding the Agency’s role as simply a provider of relief and services to one comprehensively supporting the human development of Palestinian refugees. Examining the refugee debate using new disciplines and research frameworks, this collection aims to emphasise the centrality of the Palestinian refugee issue for Middle East peace-making and

to contribute a better understanding of a unique agency. This book will be a useful aid for students and researchers with an interest in Middle East Studies, Politics, and the Israeli-Palestinian conflict.

**The Effect of the Internal Auditing on Financial Performance** - Shakir Al-ghalayini  
2015-04-15

Bachelor Thesis from the year 2013 in the subject Business economics - Investment and Finance, , course: Faculty of Commerce - Department of Accounting, language: English, abstract: It was clear from the recent financial scandals and fraud law suits in the international and regional firms that the internal control in general isn't as strong as should and that there are some weaknesses that led to this outcome and that why we are interested to investigate the internal control and the internal observation systems in the listed Palestinian corporations to put the lights on the real reasons and causes for

such problem. Many researchers and observers believe that one of the main reasons for such problem is the insufficient reliance on the function of the internal auditor and not assigning this function with its real importance in the companies, especially if we consider how significant is this function becomes as the companies are getting larger and the operations are extending to be more in terms of the volume and the complexity and more importantly the competition is getting tougher among the companies. The internal audit is consider to be a type of the observational procedures that can be used to assess the effectiveness of the other observational and audit procedures and that is why many researchers consider it as the core of concentration in the audit hierarchy that supplement the other tools in ensuring these tools ability to safeguard the companies' assets, make sure about the fairness of the financial data and encourage the commitment in the managerial policies. Islamic Banking - Mr.Luca Errico 1998-03-01  
This paper analyzes the implications of Islamic precepts on banks' structure and activities, focusing on banking supervision issues. It points out and discusses these issues in the context of a paradigm version of Islamic banking, as well as in frameworks that fall between the paradigm version and conventional banking. The case of Islamic banks operating in a conventional system is also examined.

**Islamic Finance and the New Financial System** - Tariq Alrifai 2015-03-18

Can Islamic finance save the global system?  
Islamic Finance and the New Financial System  
describeshow the adoption of Islamic finance principles in future regulatorydecisions could help prevent future shocks in the global

financial system. Using illustrations and examples to highlight key points in recent history, this book discusses the causes of financial crises, why they are becoming more frequent and increasingly severe, and how the new financial system will incorporate elements of Islamic finance - whether deliberately or not. With an introspective look at the system and an examination of the misconceptions and deficiencies in theory vs. practice, readers will learn why Islamic finance has not been as influential as it should be on the larger global system. Solutions to these crises are thoroughly detailed, and the author puts forth a compelling argument about what can be expected in the future. Despite international intervention and global policy changes, the financial system remains in a fragile state. There is an argument to be made about integrating Islamic finance into the new system to facilitate stronger resilience, and this book explains the nuts and bolts of the idea while providing the reader with

a general understanding of Islamic finance. Understand the key principles of Islamic finance. Examine the history of the current financial system. Discover how Islamic finance can help build a new debt-free economy. Learn how Islamic finance theory doesn't always dictate practice. Although Islamic finance is a growing market, it is still a foreign concept to many. Those within the Islamic finance circles wonder why the system has yet to gain broader appeal despite its ability to create a strong and well-balanced economy. Islamic Finance and the New Financial System provides clever analysis and historical background to put the issues into perspective.

**Development Under Adversity** - Ishac Diwan  
1999-01-01

"War, border closures, violence, and unemployment have hampered the Palestinian economy for over a decade. Despite these obstacles and setbacks, the future outlook is optimistic." Based on the research of the Palestine Economic Policy Research Institute (MAS), the World Bank, and other organizations, 'Development Under Adversity' reviews the development of the Palestinian economy since the 1993 Declaration of Principles. The Palestinian economy has enormous potential. Its general development indicators, including life expectancy, literacy, and child mortality rates, are among the best in the Middle East and North Africa. The book identifies the conditions under which the Palestinian economy can grow. They include trade channels that reduce the economy's reliance on Israel; the creation of a more efficient civil service; more investment-oriented public expenditure; and more

resourceful support from NGOs in the delivery of health, education, welfare, and infrastructure services. 'Development Under Adversity' provides historical background, an objective examination of recent economic and political developments, and a comprehensive analysis of the contribution that the donor community can make toward alleviating poverty. Throughout its analysis, the book focuses on the human consequences of economic uncertainty. It studies the social and household costs of border closures, and includes complete chapters about the education and health sectors. The result is a book that will be relevant to a wide range of institutional and private lenders, as well as to anyone with a general interest in the well-being and future of the Palestinian economy.

Research Paper from the year 2016 in the subject Economics - Case Scenarios, grade: 90%, Birzeit University (Faculty of Business and Economics), course: MBA ( Master of Business Administration), language: English, abstract: Background: consumption loans negatively affect micro and macro living standards. Methods: two samples were randomly selected, one for loan takers and the other for non-loan takers (n=65) each. ELSI short form is used to measure living standards for each sample in order to compare them. Other variables are taken into consideration. Results: loan takers living standards are less than non-loan takers

living standards. Consumptions loans are negatively associated with living standards in Palestine. Conclusion: Consumption loans negatively affect living standards in Palestine; taking loans without suitable planning for monthly payments might harm loan takers by adding financial burden to them, banks and PMA should review loan payment-to-income ratio to the interest of clients.

Transforming Microfinance Institutions - Joanna Ledgerwood 2006-08-30

In response to a clear need by low-income people to gain access to the full range of financial services including savings, a growing number of microfinance NGOs are seeking guidelines to transform from credit-focused microfinance organizations to regulated deposit-taking financial intermediaries. In response to this trend, this book presents a practical 'how-to' manual for MFIs to develop the capacity to become licensed and regulated to mobilize deposits from the public. 'Transforming

Microfinance Institutions' provides guidelines for regulators to license and regulate microfinance providers, and for transforming MFIs to meet the demands of two major new stakeholders regulators and shareholders. As such, it focuses on developing the capacity of NGO MFIs to mobilize and intermediate voluntary savings. Drawing from worldwide experience, it outlines how to manage the transformation process and address major strategic and operational issues inherent in transformation including competitive positioning, business planning, accessing capital and shareholders, and how to 'transform' the MFI's human resources, financial management, MIS, internal controls, and branch operations. Case studies then provide examples of developing a new regulatory tier for microfinance, and how a Ugandan NGO transformed to become a licensed financial intermediary. This book will be invaluable to regulators and microfinance NGOs

contemplating institutional transformation and will be of tremendous use to donors and technical support agencies supporting MFIs in their transformation.

European Banking - John A. Goddard 2001-07-10  
The retail banking sector has undergone

immense change over the last decade, such that the industry is barely recognisable. The creation of the European Single Market has of necessity initiated deregulation, whilst the increase in telephone and internet banking has impacted on economies of scale. Financial services organisations are now able to compete in previously uncharted territory, to considerable effect. Taking the reader on a journey of discovery through the economic theory behind the practice and the consequences that follow, the authors have created a fascinating insight into the current state of European retail banking. The authors use their extensive research to display the rationale behind the increasing trend towards consolidation and efficiency. Well argued and well researched, this is a must read for all people with an interest in the European Banking market, from investors to bankers and students alike. Risk Management in Credit Portfolios - Martin Hibbeln 2010-09-30

Risk concentrations play a crucial role for the survival of individual banks and for the stability of the whole banking system. Thus, it is important from an economical and a regulatory

perspective to properly measure and manage these concentrations. In this book, the impact of credit concentrations on portfolio risk is analyzed for different portfolio types and it is determined, in which cases the influence of concentration risk has to be taken into account. Furthermore, some models for the measurement of concentration risk are modified to be consistent with Basel II and their performance is compared. Beyond that, this book integrates economical and regulatory aspects of concentration risk and seeks to provide a systematic way to get familiar with the topic of concentration risk from the basics of credit risk modeling to present research in the measurement and management of credit risk concentrations.
