The Notebook - Nicholas Sparks 2014-06-24

Every so often a love story captures our hearts and becomes more than just a story - it becomes an experience to treasure and to share. The Notebook is such a book. It is a celebration of a passion both ageless and timeless, a tale of laughter and tears, and makes us believe in true love all over again. At thirty-one, Noah Calhoun is rebuilding his life on the coast after the horrors of World War II, but he is haunted by images of the girl he lost more than a decade earlier. Allie Nelson is about to marry into wealth and security, but she cannot stop thinking about the boy who stole her heart years ago. And so begins an extraordinary tale of a love so strong it turns tragedy into strength and endures everything . . . 2014 marks the 10th anniversary of the film adaptation of *The Notebook* starring Ryan Gosling and Rachel McAdams. Interior Space: a Visual Exploration of the International Space Station - Paolo Nespoli 2020
Unseen images of the International Space Station, untenanted and eerie: the legacy of humanity's fragile foothold in space
On November 2 2020, NASA celebrates the 20th anniversary of continuous human habitation in space of the International Space Station. In *Interior Space*, American photographer Roland Miller and Italian astronaut and photographer Paolo Nespoli offer an in-depth portrait of the ISS, creating amazing unpeopled images of the interior of the ISS for the first time. As internationally acclaimed scholars of space archaeology Alice Gorman and Justin St. P.

Walsh write in their essays, the ISS speaks not only of who we are and will be, but also of who we were. In 2024 the ISS will be abandoned; in 2028 it will be destroyed. This book provides us with an eerie account of what will remain in the space after our passing. Italian-born astronaut Paolo Nespoli (born 1957) spent 313 days in space. After a career in the military, he earned a M.Sc. in Aerospace Engineering, then joined the European Space Agency spending time in Europe, the US and Russia. In 2007 he flew on the Space Shuttle and then, in 2010 to 2011 and 2017, he flew again to the International Space Station with the Russian Soyuz. He retired in 2018 from the astronaut corps launching a career as an international public speaker. Chicago-born photographer Roland Miller (born 1958) taught photography at Brevard Community College in Cocoa, Florida, for 14 years, where he visited many nearby NASA launch sites. He is the author of the acclaimed book *Abandoned in Place: Preserving America's*

Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

The Boundaries of Europe - Pietro Rossi
2015-04-24

Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the

explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.
