

Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies

Eventually, you will unquestionably discover a further experience and deed by spending more cash. still when? pull off you take on that you require to get those every needs afterward having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to understand even more as regards the globe, experience, some places, subsequently history, amusement, and a lot more?

It is your unquestionably own mature to take action reviewing habit. in the middle of guides you could enjoy now is **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** below.

Focusing the CSBM Agenda in the Asia/Pacific Region - Paul Dibb 1992

Security Politics in the Asia-Pacific - William T. Tow 2009-10-15

Asia is experiencing major changes in its security relations. This book brings together respected experts to assess both the theoretical and empirical dimensions of the Asian security debate. Building on the latest research on Asia's regional security politics, it focuses on the 'regional-global nexus' as a way to understand the dynamics of Asian security politics and its intersection with global security. Contributors to the volume offer diverse but complementary perspectives on which issues and factors are most important in explaining how security politics in Asia can be interpreted at both the regional and global levels of analysis. Issues addressed include power balancing and alliances, governance and democracy, maritime and energy security, the relationship between

economics and security, 'human security', terrorism, nuclear non-proliferation, climate change and pandemics. This work will serve as a standard reference on the evolution of key issues in Asian security.

Korean Sea Power and the Pacific Era - Dalchoong Kim 1990

Asia-Pacific Regional Security Assessment 2020 - The International Institute for Strategic Studies (IISS) 2020-06-03

The Asia-Pacific Regional Security Assessment provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: the deteriorating US-China relationship and great-power competition; US alliances and security partnerships; the collapse of the Intermediate-range Nuclear Forces Treaty; diplomatic gridlock on the Korean Peninsula; Japan's role in Indo-Pacific security; the breakdown in Japan-South Korea relations; Indonesian policy

towards the South China Sea; Australia's defence and security outlook; the European security role in Asia. Authors include leading regional analysts and academics Douglas Barrie, William Choong, Aaron Connelly, Andrew Davies, Michael Elleman, Bonnie S. Glaser, Euan Graham, Christopher W. Hughes, Meia Nouwens, Brendan Taylor and William Tow.

Foundations of National Power in the Asia-Pacific - Ashley J. Tellis 2015

The Evolving Maritime Balance of Power in the Asia-Pacific - Lawrence W. Prabhakar 2006

The Asia-Pacific region has emerged as the hub of global geo-political, geo-economic and geo-strategic significance in the post-Cold War period. The rise of China and the resurgence of India will be the hallmark for the next 50 years. How this surge in power is accommodated by the incumbent powers like the United States and Japan, and how the new regional powers like China and India manage the power politics that

emerge will be the key determinants of regional stability. This volume examines the national maritime doctrines as well as the nuclear weapons developments at sea of the four major powers in the Asia-Pacific, namely, China, India, Japan and the United States, to see if the evolving dynamic is a cooperative or a competitive one. In particular, the volume looks at the evolving paradigms of maritime transformation in strategy and technology; the emergent new maritime doctrines and evolving force postures in the naval orders of battle; the role and operations of nuclear navies in the Asia-Pacific; and the implications and impact of nuclear weapons, ballistic missiles and sea-based missile defence responses in the region.

Asia-Pacific Regional Security Assessment 2021 - The International Institute for Strategic Studies (IISS) 2021-06-08

The Asia-Pacific Regional Security Assessment 2021 provides insight into key regional strategic, geopolitical, economic, military and security

topics. Among the topics explored are: US–China decoupling and its regional security implications; Japan’s security policy and China; India’s emerging grand strategy; Southeast Asia amid rising great-power rivalry; Australia’s new regional security posture; NATO’s evolving approach to China; The United Kingdom’s ‘tilt’ to the Indo-Pacific; and Emerging technologies and future conflict in the Asia-Pacific. Authors include leading regional analysts and academics Kanti Bajpai, Gordon Flake, Franz-Stefan Gady, Prashanth Parameswaran, Alessio Patalano, Samir Puri, Sarah Raine, Tan See Seng, Drew Thompson, Ashley Townshend, Joanne Wallis and Robert Ward.

Taiwan's New Role in the Asia-Pacific Region - Gary Klintworth 1992

The Influence of Sea Power Upon History, 1660-1783 - Alfred Thayer Mahan 1918

Today, war is more complicated than it has ever been. When considering military strategy, a

commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th

century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history. *Assessing the Asia-Pacific Rebalance* - David J. Berteau 2014-12-22

This report seeks to clarify the stated objectives of the US rebalance strategy, reviewing regional responses, and assessing the status of the rebalance, which is critical to reinforcing regional stability by strengthening US relationships, presence, and capabilities.

Maritime and Territorial Disputes in the South China Sea - Yih-Jye Hwang 2021-03-10

This edited volume rethinks the relationship between power and law in the age of China's rise by examining recent developments in the South China Sea (SCS). The contributors explore different interpretations of international law on the legal status of the contested islands and rocks and provide detailed analyses of the

contested concepts and provisions, the 2016 ruling by the SCS arbitration tribunal, as well as the environmental, economic, and political impacts of the ruling. This book facilitates a more meaningful and productive dialogue over the intersection, interaction, and interdependence between power and law in the context of the SCS. Assessing the interactions between political, legal, and normative forces, it provides insights into the specific dynamics of the dispute and the shifting security landscape in the region, but also offers a basis for thinking more deeply about the broader rise of China. This book will appeal to both students and scholars of IR, International Law, and Asian Studies and those engaged in research on the SCS disputes, the rise of China, and with a theoretical interest in law and power in international affairs.

Power and the Maritime Domain - Greg Kennedy 2022-10-28

This book offers a multi-disciplinary and multi-

national approach to defining key elements required to define power within the maritime domain. The volume engages with the concept that the maritime domain is a multi-dimensional space embracing oceans, seas, waterways, including all elements of maritime power, related activities, infrastructure, resources and assets. It illustrates the complexity and interconnectivity of the factors that contribute to the appreciation, creation, and application of maritime power. In practical terms, the book highlights that the maritime domain is a continuum that interconnects countries, cultures, politics, economics, trade, environment, knowledge, and technological power globally. Perhaps most importantly, the maritime domain generates power of its own volition, as well as acting as a critical enabler for the creation of other types of nations power: economic, political, military, technological, intelligence and fiscal power, in particular. The book not only brings those various factors to the

reader's attention but, in the synthesis, also clarifies the connections between the various elements in creating a greater maritime whole. This book will be of great interest to students of maritime security, strategic studies and International Relations.

Maritime Challenges and Priorities in Asia - Joshua Ho 2012

Maritime issues are particularly important for Asian countries, where there is a high reliance on shipping routes for international trade, many difficult disputes over maritime boundaries, and the prospect of increasing tensions where maritime power might play a significant role. This book uses contributions by 17 experts to build a comprehensive survey of the maritime issues affecting Asia. It discusses the issues overall, goes on to examine the issues from the perspective of each of 14 key countries, and concludes by assessing the prospects for resolving common problems in order to preserve good order at sea.

Assessing Maritime Power in the Asia-Pacific - Professor Greg Kennedy 2015-11-28

Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'Pivot' or 'Re-Balance' strategy, and the 'Air-Sea Battle' Operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

Maritime Security and Indonesia - Senia Febrica 2017-03-27

Indonesia is the largest archipelago state in the world comprising 17,480 islands, with a maritime territory measuring close to 6 million square kilometres. It is located between the two key shipping routes of the Pacific and Indian Ocean. Indonesia's cooperation in maritime

security initiatives is vitally important because half of the world's trading goods and oil pass through Indonesian waters, including the Straits of Malacca, the Strait of Sunda and the Strait of Lombok. This book analyses Indonesia's participation in international maritime security cooperation. Using Indonesia as a case study, the book adopts mixed methods to assess emerging power cooperation and non-cooperation drawing from various International Relations theories and the bureaucratic politics approach. It addresses not only the topic of Indonesia's cooperation but also engages in debates across the International Relations, political science and policy studies disciplines regarding state cooperation. Based on extensive primary Indonesian language sources and original interviews, the author offers a conceptual discussion on the reasons underlying emerging middle power participation or non-participation in cooperation agreements. The analysis offers a fresh perspective on the

growing problems of maritime terrorism and sea robbery and how an emerging power deals with these threats at unilateral, bilateral, regional and multilateral levels. The book fills a significant gap in literature on Indonesian foreign policy making in the post-1998 era. It provides the first in-depth study of Indonesia's decision making process in the area of maritime security and will thus be of interest to researchers in the field of comparative politics, international relations, security policy, maritime cooperation, port and shipping businesses and Southeast Asian politics and society.

Strategic Assessment 1999 - 1999

Asia-Pacific Rebalance 2025 - Michael Green
2016-02-04

In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This

CSIS study fulfills that congressional requirement.

Asian Maritime Power in the 21st Century - Vijay Sakhujia 2011-01

Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations. This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates, exponential expansion of science, technology and industrial growth.

Southeast Asia and the Rise of Chinese and Indian Naval Power - Sam Bateman 2014-06-03

This book examines the emerging maritime security scene in Southeast Asia. It considers highly topical implications for the region of possible strategic competition between China and India - the rising naval powers of Asia - with a possible naval "arms race" emerging between these countries both with naval force development and operations. As part of its "Look

East" policy, India has deployed naval units to the Pacific Ocean for port visits and exercises both with East Asian navies and the US Navy, but India is also concerned about the possibility of the Chinese Navy operating in the Indian Ocean. Even as the US-India defence relationship continues to deepen, the US and China are struggling to build a closer links. China's and India's strategic interests overlap in this region both in maritime strategic competition or conflict - which might be played out in the Bay of Bengal, the Malacca and Singapore Straits and the South China Sea. The sea lines of communication (SLOCs) through Southeast Asian waters constitute vital "choke points" between the Indian and Pacific Oceans carrying essential energy supplies for China and other Northeast Asian countries. Any strategic competition between China and India has implications for other major maritime players in the Pacific and Indian Oceans, especially Australia, the Republic of Korea and Japan, as

well as the US. This book identifies possible cooperative and confidence-building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition.

Future of Regional Cooperation in Asia and the Pacific - Bambang Susantono 2020-11-01

This book reviews progress with regional cooperation and integration in Asia and the Pacific and explores how it can be reshaped to achieve a more resilient, sustainable, and inclusive future. Consisting of papers contributed by renowned scholars and Asian Development Bank staff, the book covers four major areas: public goods, trade and investment, financial cooperation, and regional health cooperation. The book emphasizes how the region can better leverage regional integration to realize its vast potential as well as overcome challenges such as the coronavirus disease (COVID-19) pandemic.

Maritime Security in the Indo-Pacific - Mohan Malik 2014-09-24

"Maritime Security in the Indo-Pacific opens by introducing the Indo-Pacific and outlining the roles of China, India, and the United States in various maritime issues in the region. This volume develops common approaches by focusing on geopolitical challenges, transnational security concerns, and multilateral institution-building and cooperation"--Provided by publisher.

Asia Pacific Shipping - 2003

India as an Asia Pacific Power - David Brewster 2012-03-12

"This book provides a comprehensive assessment of India's international relations in the Asia Pacific region. It charts the development of India's increasingly important role as a major world power, discusses India's international relations strategy and examines India's relationship with each of the major

countries of East and Southeast Asia."-- Publisher's description

Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic

power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Assessing China's Naval Power - Sarah Kirchberger 2015-06-23

This book analyzes the rise of China's naval power and its possible strategic consequences from a wide variety of perspectives - technological, economic, and geostrategic - while employing a historical-comparative approach throughout. Since naval development requires huge financial resources and mostly takes place within the context of transnational industrial partnerships, this study also consciously adopts an industry perspective. The

systemic problems involved in warship production and the associated material, financial, technological, and political requirements currently remain overlooked aspects in the case of China. Drawing on first-hand working experience in the naval shipbuilding industry, the author provides transparent criteria for the evaluation of different naval technologies' strategic value, which other researchers can draw upon as a basis for further research in such diverse fields as International Security Studies, Naval Warfare Studies, Chinese Studies, and International Relations.

Rivalry and Response - Jonathan R. Stromseth 2021-02-16

Southeast Asia has become a hotbed of strategic rivalry between China and the United States. China is asserting its influence in the region through economic statecraft and far-reaching efforts to secure its sovereignty claims in the South China Sea, while the United States has

promoted a Free and Open Indo-Pacific strategy that explicitly challenges China's expanding influence—warning other countries that Beijing is practicing predatory economics and advancing governance concepts associated with rising authoritarianism in the region. In this timely volume, leading experts from Southeast Asia, Australia, and the United States assess these great power dynamics by examining the strategic landscape, domestic governance trends, and economic challenges in Southeast Asia, with the latter focusing especially on infrastructure. Among other findings, the authors express concern that U.S. policy has become too concentrated on defense and security, to the detriment of diplomacy and development, allowing China to fill the soft power vacuum and capture the narrative through its signature Belt and Road Initiative. The COVID-19 pandemic has only increased the policy challenges for Washington as China recovers faster from the outbreak, reinforcing its

already advantaged economic position and advancing its strategic goals as a result. As the Biden administration begins to formulate its strategy for the region, it would do well to consider these findings and the related policy recommendations that appear in this volume. Much is at stake for U.S. foreign policy and American interests. Southeast Asia includes two U.S. allies—Thailand and the Philippines—important security partners like Singapore, and key emerging partners such as Vietnam and Indonesia. Almost 42,000 U.S. companies export to the 10 countries that comprise the Association of Southeast Asian Nations (ASEAN), supporting about 600,000 jobs in the United States, but America's economic standing is increasingly at risk.

Indian Ocean Region - Manoj Gupta
2010-08-09

It is a privilege to introduce the reader to this book, as I believe that it will make a significant contribution to, given the difficulties in the

knowledge of the Indian Ocean, developing cooperation in the Indian Ocean region. There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean. As a result of the land-based orientation of the people in the region, the importance for countries to develop the power to govern the sea has largely been ignored. The maritime approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the potential for regional cooperation and ocean governance. The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean. This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations, economic well-being of the people and health of the Indian Ocean cannot be divested from one another. All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the

power to govern the sea.

Asia-Pacific - David Lai 2013

Dr. David Lai provides a timely assessment of the geostrategic significance of Asia-Pacific. His monograph is also a thought-provoking analysis of the U.S. strategic shift toward the region and its implications. Dr. Lai judiciously offers the following key points. First, Asia-Pacific, which covers China, Northeast Asia, and Southeast Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-

Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S. strategic intentions and overplay the 'U.S. card' to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

Chinese Grand Strategy and Maritime Power - Thomas M. Kane 2002

Thomas Kane's study examines the formulation of naval strategy in the People's Republic of China and reveals the obstacles and challenges that planners face in their path towards a truly powerful and globally-influential, deep-sea navy. [Environmental Assessment for a Launch Operator License for Sea Launch Limited Partnership](#) - 2001

[GIWA Regional Assessments: South China Sea -](#)

India and Japan - Rajesh Basrur 2018-03-21

This volume focuses on the rapidly expanding strategic relationship between India and Japan, expanding on the hitherto under-analyzed concept of "strategic partnership," tracing the history of the interaction, and gauging its current and future trajectories. The rise of China and its challenge to U.S. dominance of the global system is the setting in which the partnership has assumed a major profile, incorporating both defence and economic cooperation on an

unprecedented scale. The increasing congruence of Indian and Japanese interests is juxtaposed with the inherent limitations of the partnership to portray a complex picture of a kind of strategic relationship that has become a staple of contemporary international politics.

Strategic Assessment ... -

How to Begin Implementing Specific Trust-building Measures in the Asia-Pacific Region - Paul Dibb 1995

Asia Pacific Defense Forum - 1988

Asia Pacific Arms Buildups: Prospects for control
- Shannon Selin 1994

Red Star Over the Pacific - Toshi Yoshihara 2010
Two associate professors of strategy at the Naval War College assess how the rise of Chinese sea power will affect the United States maritime strategy in Asia and discuss the sea-

power theories of Alfred Thayer Mahan, now popular in China.

An Australian Perspective on Maritime CSBMs in the Asia-Pacific Region - Desmond Ball 1991

Assessing Maritime Power in the Asia-Pacific - Greg Kennedy 2016-03-09

Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'pivot' or 're-balance' strategy, and the 'Air-Sea Battle' operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

China's Global Engagement - Jacques deLisle 2017-05-30

Assessing China's rapidly changing role on the

international stage China is again undergoing a period of significant transition. Internally, China's leaders are addressing challenges to the economy and other domestic issues after three decades of dramatic growth and reforms. President Xi Jinping and other leaders also are refashioning foreign policy to better fit what they see as China's place in the world. This has included a more proactive approach to trade and related international economic affairs, a more vigorous approach to security matters, and a more focused engagement on international cultural and educational affairs. In this volume, China specialists from around the world explore key issues raised by a changing China's interaction with a changing world. They chronicle China's emergence as a more capable actor whose engagement is reshaping international affairs in many dimensions. These include: global currency and trading systems;

patterns of cooperation and competition in technological innovation; economic and political trends in the developing world; the American-led security order in the Asia-Pacific region; the practice of international military and humanitarian intervention; the use of naval power; the role of international law in persistent territorial and maritime disputes in the East and South China Seas; the international human rights regime; the circulation of Chinese talent trained abroad; a more globalized film industry; and programs to reshape global cultural awareness about China through educational initiatives. Across these diverse areas, China's capacity—and desire—to influence events and outcomes have risen markedly. The results so far are mixed, and the future trajectory remains uncertain. But across the wide range of issues addressed in this book, China has become a major and likely an enduring participant.
