Emotional Engineering, Vol. 8 - Shuichi Fukuda 2020-02-08

This book is focused on the importance of detecting people's motivation, how they make decisions and the way the actions they take is rapidly increasing with the progress of IoT and the Connected Society. It explores how emotion-related processes are increasing in importance rapidly. The contributors move through a variety of related topics, all aimed at revealing how humans and things must increasingly interact. It indicates how strategy becomes increasingly important, particularly creating the best adaptable strategy to respond to the quickly and extensively changing situations. With engineering quickly moving from product development to experience development, and the role of emotion in engineering becoming increasingly apparent, this book offers a timely and valuable resource for engineers and researchers alike.

Nutrition and Diet in Menopause - Caroline J. Hollins Martin 2013-06-04

Nutrition and Diet in Menopause is a single comprehensive source that will provide readers with an understanding of menopause. Holistic in its approach, this volume is divided into five sections covering psychological, endocrine and lifestyle factors, metabolism and physiology, bone and nutrition, cancer and nutrition, cardiovascular factors and dietary supplements in menopause. In-depth chapters review the potential long term consequences of menopause on the overall health of women, not only at the physical level including hot flashes (flashes) , alterations to the genitourinary system, skin changes, decreased cardiovascular functions, hypertension, headache, back pain, and constipation. Written by international leaders and trendsetters, Nutrition and Diet in Menopause is essential reading for endocrinologists, cardiologists, nutritionists and all health care professionals who are interested in women's health.

Photographing Mussolini - Alessandra Antola Swan 2020-12-10

This pioneering book offers the first account of the work of the photographers, both official and freelance, who contributed to the forging of Mussolini's image. It departs from the practice of using photographs purely for illustration and places them instead at the centre of the analysis. Throughout the 1930s photographs of the Italian dictator Benito Mussolini were chosen with much care by the regime. They were deployed to highlight those physical traits - the piercing eyes, protruding jaw, shaved head - that were meant to evoke the Duce's strength, determination and innate sense of leadership in the mind of his contemporaries. The chapters in this volume explore the photographic image in the socio-political context of the time and shows how it was a significant contributor to the development of Italian mass culture between the two world wars.

Alfa Romeo TZ-TZ2 - Vitto Witting da Prato 2017-02-01

Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to

the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

Urban Poverty and the Underclass - Enzo Mingione 2008-09-15

Over the last two decades "poverty" has moved centrestage as an issue within the social sciences. This volume, edited by one of Europe's foremost sociologists, aims to assess the debates surrounding poverty and the responses to it, exploring the ways in which the various socio-political systems and welfarist regimes are being radically transformed. The essays examine how such change is effected by failing welfare programmes and enervating social structures such as family and community which once would have provided mechanisms of social stability. The first part of the book provides reflections on urban poverty; the second part discusses the widely debated idea of an "underclass" and its meanings in Europe and in the USA, and the final part draws on concrete empirical analyses to examine the patterns of poverty throughout Western Europe. This volume will be of first-rate importance to all serious students of politics, sociology, geography, public policy, youth and community studies, social policy and American studies.

Fleet Management and Logistics - Teodor G. Crainic 2012-12-06

TEODOR GABRIEL CRAINIC, DIRECTOR The Centre for Research on Transportation (C.R.T.) was founded in 1971 by the Universite de Montreal. From 1988 on, it is jointly managed by the Universite de Montreal and its affiliated schools, the Ecole des Hautes Etudes Commerciales and Ecole Poly technique. Professors, students and researchers from many institutions in the Montreal area join forces at the C.R.T. to analyze transportation, logistics and telecommunication systems from a multidisciplinary perspective. The C.R.T. pursues three major, complementary objectives: training of high-level specialists; the advancement of knowledge and technology; the transfer of technology towards industry and the public sector. Its main field of expertise is the development of quantitative and computer-based models and methods for the analysis of urban, regional and intercity transportation networks, as well as telecommunication systems. This applies to the study of passenger and commodity flows, as well as to the socioeconomic aspects of transportation: policy, regulation, economics. The twenty-fifth anniversary of the C.R.T. offered the opportunity to evaluate past accomplishments and to identify future trends and challenges. Five colloquia were thus organized on major research and application themes that also reflected our main research areas. They gathered together internationally renowned researchers who linked recent scientific and technological advances to modeling and methodological challenges waiting to be tackled, particularly concerning new problems and applications, and the increasingly widespread use of new technologies.

Crossroads of Entrepreneurship - Guido Corbetta 2004-03-31

Combines different disciplinary perspectives: management, economics, sociology, business history. Gathers perspectives from different countries and research traditions. Softcover version of the original that published in March 2004.

AMC Javelin, AMX, and Muscle Car Restoration 1968-1974 - Scott Campbell 2015-06-15

There was a time when AMC performance was more of an afterthought

to the muscle car era. Sure, the Javelins and AMX cars were cool, as were the really limited cars such as the Scrambler and the Rebel Machine, but with production numbers a distant fourth place in the American manufacturer muscle car scene, well, you could be forgiven for not remembering much about them through the years. Fast forward to today, and AMC muscle cars are among the fastest appreciating performance vehicles in the market. Low production numbers combined with capable performance and cool and unique styling have increased coverage in magazines and at auctions, making these cars more valuable than ever before. Concours-restored AMC muscle cars routinely bring \$30,000 to \$65,000 in the collector car world, making a comprehensive restoration guide a must-have for any American Motors enthusiast. AMC Javelin, AMX, and Muscle Car Restoration 1968-1974 provides in-depth coverage of the decoding and documentation process of an AMC muscle car, primarily the popular Javelin and AMX models. Author and expert AMC restorer Scott Campbell gives you a detailed account of important aspects of restoration including rust repair; panel and sheet-metal replacement; interior and trim restoration; undercarriage chassis, suspension, and driveline rehabilitation; as well as every other major component group. Also included are multiple "How-To" sequences that, no matter what your skill level, will assist you in restoring your AMC muscle car. This restoration guide chronicles the entire process of AMC ownership from selecting a vehicle to disassembly to final re-assembly. You will find coverage of all steps throughout: from turning your first bolt to tumbling the key in the ignition following completion of your restoration. Whether you own an AMC muscle car, especially a Javelin or an AMX, this restoration guide will be your go-to source for restoring glory to your unique AMC muscle car.

On a Global Mission: The Automobiles of General Motors

International Volume 3 - Louis F. Fourie 2016-12-27

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Nb3Sn Accelerator Magnets - Daniel Schoerling 2019-01-01

This open access book is written by world-recognized experts in the fields of applied superconductivity and superconducting accelerator magnet technologies. It provides a contemporary review and assessment of the experience in research and development of high-field accelerator dipole magnets based on Nb₃Sn superconductor over the past five decades. The reader attains clear insight into the development and the main properties of Nb₃Sn composite superconducting wires and Rutherford cables, and details of accelerator dipole designs, technologies and performance. Special attention is given to innovative features of the developed Nb₃Sn magnets. The book concludes with a discussion of accelerator magnet needs for future circular colliders.

The Death of Luigi Trastulli and Other Stories - Alessandro Portelli 2010-03-30

Portelli offers a new and challenging approach to oral history, with an interdisciplinary and multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create

memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli's work makes delightful reading for the specialist and non-specialist alike. Alessandro Portelli is Professor of American Literature at the University of Rome "La Sapienza."

Tecno - Giampiero Bosoni 2012

The planning, production and cultural development of a company that has been one of the keystones of Italian design for almost sixty years. Writing the history of Tecno, a company founded in 1953 by the Borsani brothers, does not mean just investigating the evolution of a significant player in the industrial production of furniture, but also tracing out a fundamental chapter in interior design at a global level. Many Tecno projects have been designed by some of the most prominent international architects and designers, including Vico Magistretti, Roberto Mango, Robin Day, Gio Ponti, Mario Bellini, Norman Foster, Ricardo Bofill, Jean-Michelle Wilmotte, Emilio Ambasz, Giorgetto Giugiaro, Gae Aulenti, and Piero Lissoni. Not to mention Tecno has always had a strong bond with the world of art, which has found material form in a specific collection of furnishings designed by noted artists like Man Ray, Bruno Munari, François and Frédéric Morellet, and Luigi Veronesi. Today many Tecno products are exhibited in leading museums of the world: at MoMA, New York and San Francisco, the Victoria and Albert Museum, London, the Georges Pompidou Centre, Paris, the Neue Sammlung, Munich, the Museum of Decorative Arts, Montreal and the Triennale in Milan.

Alfa Romeo Production Cars from 1910 - Maurizio Tabucchi 2008-02-15

Revised and updated to 2007, "Alfa Romeo - Production Cars" was first published in 1996, written by two experts: Stefano d'Amico (President of RIAR, the Alfa Romeo Italian Register) and Maurizio Tabucchi (consultant at both RIAR and ASI, the Italian Vintage Automobile Association). This fascinating story of Alfa Romeo's cars is told model by model by a text that results from precise reconstruction of the facts, enriched with detailed technical specifications (chassis numbering included) and rare archive illustrative material. All of Alfa's recent production can also be found in the book, starting with the 155, the last car in the previous edition, the following 156, 145, 146, 147, 166, 159, up to the last "Brera" and "Spider"; A long-awaited new edition that no Alfa Romeo fan should miss. Written in English and Italian.

Unions, Change and Crisis - Peter Lange 2016-04-14

First published in 1982, Unions, Change and Crisis represents the first detailed, comparative, historical and theoretically grounded study of two of the major trade union movements of Europe. It brings together the results of the first part of the first major study from Harvard University's Centre for European Studies. The book explores, first individually and then comparatively, the evolution of the French and Italian Union movements through the end of the 1970s. It will be of particular interest for students of trade unions, industrial relations and political economy in France and Italy, but also those interested in the comparative analysis of advanced industrial democracies more generally.

Acute Heart Failure - Alexandre Mebazaa 2009-12-24

For many years, there has been a great deal of work done on chronic congestive heart failure while acute heart failure has been considered a difficult to handle and hopeless syndrome. However, in recent years acute heart failure has become a growing area of study and this is the first book to cover extensively the diagnosis and management of this complex condition. The book reflects the considerable amounts of new data reported and many new concepts which have been proposed in the last 3-4 years looking at the epidemiology, diagnostic and treatment of acute heart failure.

Organising Music - Nic Beech 2015-02-05

Organisational theorists have become increasingly interested in the creative industries, where practices that are commonplace are of particular interest to organisations in other sectors as they look for new ways to enhance performance. Focusing on the music industry, this book sets up a unique dialogue between leading organisational theorists and music professionals. Part I explores links between organisation theory and the creative industries literature, concentrating on practices of organising and knowledge mobilisation, followed by an in-depth discussion of key theoretical concepts by subject experts. Part II provides a diverse range of 'tales from the field', including examples from classical orchestras, folk, indie and punk. The concluding chapter examines the shared dialogue to reveal what practice in the musical field can learn from organisational theory, and vice versa. This innovative book will interest graduate students and researchers in the fields of organisation studies, music management and the creative industries.

Hair and Scalp Treatments - Antonella Tosti 2019-09-12

Conditions of the hair and scalp often cause significant psychological distress and sometimes physical discomfort for patients. Similarly, finding the right treatment can prove challenging for the physician. *Hair and Scalp Treatments -- A Practical Guide*, focuses on therapy with each chapter briefly describing the disease to the reader and then teaching the step-by-step therapeutic algorithm. Procedures commonly used in the treatment of alopecias are also reviewed and detailed in specific chapters. This book also discusses everyday questions that patients commonly ask doctors and provides practical tips such as how to recommend the best shampoo, conditioner or hair dye for your patient, or how to prescribe the right nutritional supplements. There are additional sections on future treatments on the horizon and how regenerative medicine can be used. *Hair and Scalp Treatments -- A Practical Guide*, is the only book of its kind focused on treatment and addresses topics that are not covered by current titles on hair disorders. Written and edited by leading experts in the field, this practical guide can be used not only by dermatologists but by general practice and family physicians as well.

Urban Models and Public-Private Partnership - Remo Dalla Longa 2011-03-29

This book addresses the topic of urban models with reference to large western cities and particularly to global cities. In the current transitional phase, the use of language and the systematization of phenomena has become important. The book's matrix examines two important and strongly connected themes: urban models and public-private partnerships (PPP) determined by urban functions which are transformed in an increasingly rapid and complex manner as a result of globalization. PPPs represent the new border of the modern global state. The book focuses on two principal urban models (renewal and restructuring) through PPPs and subsequently the relationship between state and market in fourteen Italian cities (renewal) and two central European cities, Leipzig and Budapest (restructuring). CoUrbIT (Complex Urban Investment Tools) and the book 'Globalization and Urban Implosion: Creating New Competitive Advantage' by the same author serve as points of reference.

Relevance - Dan Sperber 1996-01-09

Relevance, first published in 1986, was named as one of the most important and influential books of the decade in the Times Higher Educational Supplement. This revised edition includes a new Preface outlining developments in Relevance Theory since 1986, discussing the more serious criticisms of the theory, and envisaging possible revisions or extensions. The book sets out to lay the foundation for a unified theory of cognitive science. The authors argue that human cognition has a goal: we pay attention only to information which seems to us relevant. To communicate is to claim someone's attention, and hence to imply that the information communicated is relevant. Thus, a single property - relevance is seen as the key to human communication and cognition. A second important feature of the book is its approach to the study of reasoning. It elucidates the role of background or contextual information in spontaneous inference, and shows that non-demonstrative inference processes can be fruitfully analysed as a form of suitably constrained guesswork. It directly challenges recent claims that human central thought processes are likely to remain a mystery for some time to come. Thirdly, the authors offer new insight into language and literature, radically revising current view on the nature and goals of verbal comprehension, and in particular on metaphor, irony, style, speech acts, presupposition and implicature.

Alfa Romeo Montreal - Bruce Taylor 2020-05-19

The powerful and beautiful Alfa Romeo Montreal coupé is the ultimate "dream car that came true." Created as a futuristic concept car for Canada's Expo 67 World Fair, the exciting prototype was a dream car par excellence. The production model to which it gave birth was equipped with a race-bred 200bhp V8 engine, and manufactured in series from 1970 to 1977. Almost 4,000 Montreals were built, and sound cars are readily available today at very affordable prices. This book is a comprehensive pictorial tribute to the Montreal, a visual testimonial to the combined talents of Alfa Romeo engineers and Bertone stylists. It highlights the fusion of technical ingenuity and aesthetics that created one of the most stunning series production automobiles of the twentieth century. The book explores the marriage of technology and art that appeals to both reason and the heart, combining man's rational desire for fast, efficient personal transportation with his emotive passion for exotic vehicles. In a portfolio of over 500 illustrations, it paints a unique and detailed graphic portrait of all the facets of this elegant and potent classic GT, revealing why it is immensely enjoyable to drive and turns heads wherever it appears.

Squatting in Europe - Squatting Europe Collective 2012-10-01

Squatting offers a radical but simple solution to the crises of housing, homelessness, and the lack of social space that mark contemporary society: occupying empty buildings and rebuilding lives and communities in the process. Squatting has a long and complex history, interwoven with the changing and contested nature of urban politics over the last

forty years. Squatting can be an individual strategy for shelter or a collective experiment in communal living. Squatted and self-managed social centres have contributed to the renewal of urban struggles across Europe and intersect with larger political projects. However, not all squatters share the same goals, resources, backgrounds or desire for visibility. Squatting in Europe aims to move beyond the conventional understandings of squatting, investigating its history in Europe over the past four decades. Historical comparisons and analysis blend together in these inquiries into squatting in the Netherlands, Italy, Spain, France, Germany and England. In it members of SqEK (Squatting Europe Kollektive) explore the diverse, radical, and often controversial nature of squatting as a form of militant research and self-managed knowledge production. Essays by Miguel Martínez, Gianni Piazza, Hans Pruijt, Pierpaolo Mudu, Claudio Cattaneo, Andre Holm, Armin Kuhn, Linus Owens, Florence Boullon, and Thomas Aguilera.

Storming Heaven - Steve Wright 2017

Storming Heaven is the only book which looks at Italian workerist theory and practice, from its origins in the anti-Stalinist left of the 1950s to its heyday twenty years later. It focuses on the theme of workerism, or 'operaismo', which includes the refusal of work, class self-organisation, mass illegality and the extension of revolutionary agency, of which are still practiced today by workers across the world. Emphasising the dynamic nature of class struggle as the distinguishing feature of workerist thought, *Storming Heaven* reveals how this form of radical politics developed alongside emerging social movements to great effect. It assesses the strengths and limitations of workerism as first developed by Antonio Negri, Mario Tronti, Sergio Bologna and others. This edition includes a new chapter looking at the debates around operaismo and Autonomia since the book originally appeared in 2002, and is updated with a new foreword and afterword.

Handbook of International Futurism - Günter Berghaus 2018-12-17

The Handbook of International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T. Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of

scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

Mercedes-Benz W123 - James Taylor 2019-07-22

The Mercedes-Benz W123 was launched in 1976 and sales quickly surpassed those of its predecessor, the W114. The W123 went on to become the most successful Mercedes, selling 2.7 million cars.

Mercedes-Benz W123 - The Complete Story explores the life of this highly regarded executive car from its initial evolution, development and production to the creation of new models and its success in motorsport. The book features the styling, engineering and technical advances introduced over the lifetime of the three series; full technical specifications together with customer options, equipment and interior trim for each model; production numbers and vehicle number sequences and finally there is a section on the little-known details of the manufacture of the car in China. It is superbly illustrated with 240 colour and black & white photographs. James Taylor is a professional motoring writer with over thirty years' experience and Mercedes-Benz is one of his favourite car manufacturers.

Complications of Cirrhosis - Andrew P. Keaveny 2015-04-08

This volume presents a concise yet comprehensive overview on all facets concerning the complications of cirrhosis. Structured in three sections, the book reviews the natural history of cirrhosis, the diagnostic and predictive tools available to assess the disease, complications, and treatment options such as liver assist devices and transplantation.

Topical concerns in the management of patients with cirrhosis are also addressed, including issues pertaining to the delivery of quality care in this patient population. Written by experts in their fields, *Complications of Cirrhosis: Evaluation and Management* serves as a valuable resource for practitioners and physicians-in-training on the subject of cirrhosis.
