

# Shareable Leconomia Della Condivisione

Recognizing the mannerism ways to get this book **Shareable Leconomia Della Condivisione** is additionally useful. You have remained in right site to start getting this info. get the Shareable Leconomia Della Condivisione link that we present here and check out the link.

You could purchase lead Shareable Leconomia Della Condivisione or acquire it as soon as feasible. You could quickly download this Shareable Leconomia Della Condivisione after getting deal. So, considering you require the books swiftly, you can straight get it. Its correspondingly utterly easy and therefore fats, isnt it? You have to favor to in this declare

**The Wealth of Networks** - Yochai Benkler 2006-01-01

Describes how patterns of information, knowledge, and cultural production are changing. The author shows that the way information and knowledge are made available can either limit or enlarge the ways people create and express themselves. He describes the range of legal and policy choices that confront.

**La prima radice** - Simone Weil 2017-11-15

Il nostro tempo ha negato la tensione di ogni uomo verso qualcosa di più grande, e forse di irraggiungibile, sostituendola con una cultura degradata e ristretta dove i diritti universali sono privi di concretezza e la libertà è intesa come semplice cancellazione di qualsiasi dovere. Ancora più dei diritti, sono invece proprio i doveri, verso se stessi e verso gli altri, ad ancorare l'uomo alla realtà e alla società in cui vive, evitando il rischio di sentirsi sradicati e in balia degli eventi. Secondo Simone Weil, voce inascoltata e profetica del XX secolo, interessarsi davvero del destino dell'uomo significa, quindi, prima di tutto aggrapparsi saldamente e rimanere fedeli alle proprie radici. Potrebbe sembrare un banale richiamo alle tradizioni; invece non è così, perché le radici dell'uomo hanno origine oltre la sfera temporale, nell'eterno e umanissimo desiderio di verità e di bene.

**Data Science and Social Research** - N. Carlo Lauro 2017-11-17

This edited volume lays the groundwork for Social Data Science, addressing epistemological issues, methods, technologies, software and applications of data science in the social sciences. It presents data science techniques for the collection, analysis and use of both online and offline new (big) data in social research and related applications. Among others, the individual contributions cover topics like social media, learning analytics, clustering, statistical literacy, recurrence analysis and network analysis. Data science is a multidisciplinary approach based mainly on the methods of statistics and computer science, and its aim is to develop appropriate methodologies for forecasting and decision-making in response to an increasingly complex reality often characterized by large amounts of data (big data) of various types (numeric, ordinal and nominal variables, symbolic data, texts, images, data streams, multi-way data, social networks etc.) and from diverse sources. This book presents selected papers from the international conference on Data Science & Social Research, held in Naples, Italy in February 2016, and will appeal to researchers in the social sciences working in academia as well as in statistical institutes and offices.

**Changemakers** - Adam Arvidsson 2019-10-15

This book argues that, as industrial capitalism enters a period of prolonged crisis, a new paradigm of 'industrious modernity' is emerging. Based on small-scale, commons-based and market-oriented entrepreneurship, this industrious modernity is being pioneered by the many outcasts that no longer find a place within a crumbling industrial modernity. This new industriousness draws on the new planetary commons that have been generated by the globalization of industrial capitalism itself. The outsourcing of material production to global supply chains has made the skills necessary to engage in commodity production generic and common, and the globalization of media culture and the internet have generated new knowledge commons. Together these new commons have radically reduced the capital requirements to engage in economic activity, and are providing new, highly efficient tools of productive organization at little cost. This timely analysis of the new forces of change in our societies today will be of great interest to anyone concerned with the impact of digital technologies and the future of capitalism.

**Shareble! L'economia della condivisione** - Tiziano Bonini 2017-10-19

Affittare una casa su Airbnb, prenotare un passaggio da Bari a Firenze con Blablacar, chiamare un autista di Uber perché sta diluviando e non ci sono taxi disponibili, condividere una scrivania in un co-working, creare un orto di condominio o di quartiere. Sebbene tutte queste azioni siano riconducibili alla cosiddetta sharing economy, tra di esse esistono molte

differenze. La condivisione non è necessariamente un valore e ha precise conseguenze sociali ed economiche. Per questo occorre chiedersi: cosa significa davvero condividere?

*La cultura in trasformazione* - AA.VV. 2016-11-03

Oggi il sapere è sempre più reticolare e diffuso. La centralità delle nuove tecnologie sta contribuendo a fare emergere un particolare tipo di intelligenza collaborativa basata sull'empatia. Per questo c'è bisogno di immaginare nuove formule di progettazione, organizzazione, finanziamento e distribuzione della cultura che siano in grado di agire nella molteplicità. Ora più che mai si avverte la necessità di nuove spinte e proposte, pena la decadenza culturale, morale e umana del nostro paese. Questo volume raccoglie otto voci autorevoli di giornalisti, scrittori, filosofi, economisti che offrono un momento di riflessione culturale su quanto si sta facendo, dando testimonianza delle analisi in corso e fornendo uno strumento agile ma esaustivo per comprendere i cambiamenti in atto e le opportunità future.

*I contratti di somministrazione e di distribuzione* - Roberto Bocchini 2011-09-01

Il volume si propone di approfondire i profili di maggior rilevanza in materia di contratti di somministrazione e di distribuzione, attraverso l'esame della normativa del codice civile e l'esame della più significativa legislazione speciale in materia. L'Opera è arricchita da un Cd-rom con all'interno il volume in formato PDF, che rende possibile: - effettuare una ricerca per indici, partendo dalla schermata iniziale e selezionando uno dei seguenti tasti: - indice sommario. Consente di navigare nei contenuti del volume, partendo dall'indice sommario: cliccando sul titolo di un singolo capitolo o paragrafo, si può accedere immediatamente al testo richiesto (posizionandosi all'inizio del paragrafo selezionato); - indice analitico. Consente di ritrovare un concetto, partendo da un singolo lemma dell'indice analitico: cliccando sul numero di pagina accanto a ogni voce dell'indice analitico, si può arrivare puntualmente alla pagina relativa; - effettuare una ricerca full-text, utilizzando le apposite funzioni di Adobe Acrobat (con la funzione "trova") e inserendo le parole o gli estremi da ricercare; - scorrere tutto il volume, pagina per pagina; - stampare i paragrafi visualizzati partendo dalla ricerca effettuata tramite l'indice sommario. Per ragioni di tutela del copyright, è consentita la stampa soltanto paragrafo per paragrafo e compare su ogni pagina stampata di default il copyright dell'Editore PIANO DELL'OPERA PARTE PRIMA - CONTRATTI AVENTI AD OGGETTO PRESTAZIONI DI SERVIZI · IL CONTRATTO DI SOMMINISTRAZIONE DI SERVIZI · IL CONTRATTO DI HANDLING · IL CONTRATTO DI LOGISTICA · I "NUOVI SERVIZI" DI MOBILITA` · IL CONTRATTO DI OUTSOURCING · IL CONTRATTO DI ACCESSO AD INTERNET · CONTRATTO PER IL SERVIZIO DI RICERCA CONTINUATIVA IN VIA TELEMATICA · CONTRATTO DI ASSISTENZA E MANUTENZIONE DEL COMPUTER · I CONTRATTI DI DISTRIBUZIONE DEL COMMERCIO ELETTRONICO · IL CONTRATTO DI SOMMINISTRAZIONE DEL SERVIZIO TELEFONICO · IL CONTRATTO DI ABBONAMENTO ALLA PAY TV · IL CONTRATTO DI ENDORSEMENT · IL CONTRATTO DI SPONSORIZZAZIONE PARTE SECONDA - CONTRATTI AVENTI AD OGGETTO PRESTAZIONI DI BENI · LA SOMMINISTRAZIONE DI COSE · IL CASH AND CARRY · LA CONCESSIONE DI VENDITA · CONTRATTI DI DISTRIBUZIONE AUTOMATICA · IL CONTRATTO DI DISTRIBUZIONE CINEMATOGRAFICA · LA SUBFORNITURA INDUSTRIALE · IL CONTRATTO LIBRARIO · IL CONTRATTO DI EDIZIONE

*Sharing Cities* - Duncan McLaren 2015-11-20

The future of humanity is urban, and the nature of urban space enables, and necessitates, sharing -- of resources, goods and services, experiences. Yet traditional forms of sharing have been undermined in modern cities by social fragmentation and commercialization of the public realm. In *Sharing Cities*, Duncan McLaren and Julian Agyeman argue that the intersection of cities' highly networked physical space with new digital technologies and new mediated forms of sharing offers

cities the opportunity to connect smart technology to justice, solidarity, and sustainability. McLaren and Agyeman explore the opportunities and risks for sustainability, solidarity, and justice in the changing nature of sharing. McLaren and Agyeman propose a new "sharing paradigm," which goes beyond the faddish "sharing economy" -- seen in such ventures as Uber and TaskRabbit -- to envision models of sharing that are not always commercial but also communal, encouraging trust and collaboration. Detailed case studies of San Francisco, Seoul, Copenhagen, Medellín, Amsterdam, and Bengaluru (formerly Bangalore) contextualize the authors' discussions of collaborative consumption and production; the shared public realm, both physical and virtual; the design of sharing to enhance equity and justice; and the prospects for scaling up the sharing paradigm through city governance. They show how sharing could shift values and norms, enable civic engagement and political activism, and rebuild a shared urban commons. Their case for sharing and solidarity offers a powerful alternative for urban futures to conventional "race-to-the-bottom" narratives of competition, enclosure, and division.

*Ours to Hack and to Own* - Trebor Scholz 2017-08-08

With the rollback of net neutrality, platform cooperativism becomes even more pressing: In one volume, some of the most cogent thinkers and doers on the subject of the cooptation of the Internet, and how we can resist and reverse the process.

[Digital Transformation of the Design, Construction and Management Processes of the Built Environment](#) - Bruno Daniotti 2019-01-01

This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

*E - commerce sensoriale. Come vendere col sesto senso digitale* - Patrizia Saolini 2014-08-25T00:00:00+02:00  
1065.107

**Technosapiens** - Andrea Daniele Signorelli 2021-04-20

Altro che intelligenze artificiali sempre più umane: è l'essere umano che sta diventando sempre più simile a una macchina. Dal presente degli smartphone al futuro prossimo dei visori in realtà aumentata, fino alle utopie delle interfacce cervello-computer: le tecnologie digitali si stanno fondendo con il corpo umano, creando le condizioni per un'umanità più efficiente, più razionale, più veloce e più misurabile. Ma chi ci guadagna davvero da tutto ciò? E soprattutto: qual è il prezzo da pagare? Dalla diffusione di stimolanti fino ai timori che sia in corso un'epidemia di disturbi mentali, la realtà digitalmente aumentata in cui siamo immersi rischia di far collassare il nostro sistema operativo, il cervello, facendo precipitare la società in un burnout collettivo. C'è una via d'uscita? Tra teorie politiche al confine tra utopia generazionale e fantascienza e progetti per restituirci il controllo sulla tecnologia digitale, la speranza che si possa invertire la rotta è ancora accesa. Ma la strada da percorrere è lunga. E il tempo stringe.

**La prevenzione delle frodi aziendali. Alle radici della responsabilità sociale** - D'Onza 2014

**Communicating the Environment to Save the Planet** - Maurizio Abbati 2019-01-30

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without

being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

[Radio Audiences and Participation in the Age of Network Society](#) - Tiziano Bonini 2014-12-05

This book maps, describes and further explores all contemporary forms of interaction between radio and its public, with a specific focus on those forms of content co-creation that link producers and listeners. Each essay will analyze one or more case studies, piecing together a map of emerging co-creation practices in contemporary radio. Contributors describe the rise of a new class of radio listeners: the networked ones. Networked audiences are made up of listeners that are not only able to produce written and audio content for radio and co-create along with the radio producers (even definitively bypassing the central hub of the radio station, by making podcasts), but that also produce social data, calling for an alternative rating system, which is less focused on attention and more on other sources, such as engagement, sentiment, affection, reputation, and influence. What are the economic and political consequences of this paradigm shift? How are radio audiences perceived by radio producers in this new radioscope? What's the true value of radio audiences in this new frame? How do radio audiences take part in the radio flow in this age? Are audiences' interactions and co-creations overrated or underrated by radio producers? To what extent listeners' generated content can be considered a form of participation or "free labour" exploitation? What's the role of community radio in this new context? These are some of the many issues that this book aims to explore. Visit

<https://www.facebook.com/pages/Radio-Audience-and-Participation-in-the-Age-of-Network-Society/869169869799842> for the book's Facebook page.

[The HyperDoc Handbook](#) - Lisa Highfill 2016-06-01

The HyperDoc Handbook is a practical reference guide for all K-12 educators looking to transform their teaching into blended learning environments. This book strikes a perfect balance between pedagogy and how-to tips, while also providing several lesson plans to get you going using HyperDocs.

**From Smart City to Smart Region** - Corinna Morandi 2015-08-14

This book offers a fascinating exploration of the relationship between information and communication technologies (ICTs) and spatial planning, expanding the concept of "urban smartness" from the usual scale of buildings or urban projects to the regional dimension. In particular, it presents the outcomes of research undertaken at Politecnico di Milano, in collaboration with Telecom Italia, that had three principal goals: to investigate the use of ICTs for the representation, promotion, management, and dissemination of an integrated system of services; to explore the spatial impacts of digital services at different scales (regional, urban, local); and to understand how a system of mobile services can encourage new spatial uses and new collective behavior in the quest for better spatial quality of places. Useful critical analysis of international case studies is also included with the aim of verifying the opportunities afforded by new digital services not only to improve the urban efficiency but also to foster the evolution of urban communities through enhancement of the public realm. The book will be a source of valuable insights for both scholars and local administrators and operators involved in smart city projects.

*Barter, Exchange and Value* - University Lecturer in Social Anthropology and Fellow Caroline Humphrey 1992-06-11

This novel treatment of barter represents a topical addition to the literature on economic anthropology.

[Network Society and Future Scenarios for a Collaborative Economy](#) - V. Kostakis 2014-08-22

This book builds on the idea that peer-to-peer infrastructures are gradually becoming the general conditions of work, economy, and society. Using a four-scenario approach, the authors seek to simplify possible outcomes and to explore relevant trajectories of the current techno-economic paradigm within and beyond capitalism.

**Mercato e cooperazione tecnologica** - Giuseppe Colangelo 2008

**The Age of Access** - Jeremy Rifkin 2001

Imagine waking up one day to find that virtually everything you do has become a paid for experience. It is part of a fundamental change taking place in the nature of business, contends Jeremy Rifkin. After several hundred years as the organising principles of civilisation, the traditional market systems is beginning to break down. On the horizon looms the age of access, where we trade experiences instead of objects.

**Shareable! L'economia della condivisione** - Guido Smorto 2017

**Frontier Information Technology and Systems Research in Cooperative Economics** - Aleksei V. Bogoviz 2020-09-24

This book is the very first book-length study devoted to the advances in technological development and systems research in cooperative economics. The chapters provide, first of all, a coherent framework for understanding and applying the concepts and approaches of complexity and systems science for the advanced study of cooperative networks and particular cooperative enterprises and communities. Second, the book serves as a unique source of reliable information on the frontier information technologies available for the production, consumer, credit, and agricultural cooperative enterprises, discussing predominant strategies, potential drivers of change, and responses to complex problems. Given the diverse range of backgrounds and advanced research results, researchers, decision-makers, and stakeholders from all fields of cooperative economics in any country of the world will undoubtedly benefit from this book.

*Introducing Just Sustainabilities* - Julian Agyeman 2013-05-09

This unique and insightful text offers an exploration of the origins and subsequent development of the concept of just sustainability. *Introducing Just Sustainabilities* discusses key topics, such as food justice, sovereignty and urban agriculture; community, space, place(making) and spatial justice; the democratization of our streets and public spaces; how to create culturally inclusive spaces; intercultural cities and social inclusion; green-collar jobs and the just transition; and alternative economic models, such as co-production. With a specific focus on solutions-oriented policy and planning initiatives that specifically address issues of equity and justice within the context of developing sustainable communities, this is the essential introduction to just sustainabilities.

**Politics of the Everyday** - Ezio Manzini 2019-02-07

Each of us develops and enacts strategies for living our everyday lives. These may confirm the general tendency towards new forms of connected solitude, in which we work, travel and live alone, yet feel sociable mainly by means of technology. Alternatively, they may help to create flexible communities that are open and inclusive, and therefore resilient and socially sustainable. In *Politics of the Everyday*, Ezio Manzini discusses examples of social innovation that show how, even in these difficult times, a better kind of society is possible. By bringing autonomy and collaboration together, it is possible to develop new forms of design intelligence, for our own good, for the good of the communities we are part of, and for society as a whole.

**Urbanistica e società civile** - Carlo Olmo 2018-03-15

Tra il 1930 e il 1960 si riunisce attorno ad Adriano Olivetti un gruppo di intellettuali dalla diversa formazione, spinto dall'urgenza di dare vita a una nuova disciplina urbanistica capace di governare, attraverso la progettazione, la costruzione di un paese più moderno e più avanzato. Un approccio organico che Carlo Olmo, nell'analisi di quella straordinaria esperienza e nel dialogo con Antonio De Rossi che segue, auspica possa essere nuovamente adottato perché, attraverso l'urbanistica, si possa concretizzare un nuovo patto di cittadinanza.

**Handbook of Quality-of-Life Research** - M. Joseph Sirgy 2001-11-30

This handbook provides students of quality-of-life (QOL) research with an understanding of how QOL research can be conducted from an ethical marketing perspective - a perspective based on positive social change. The handbook covers theoretical, philosophical, and measurement issues in QOL research. The handbook also approaches selected QOL studies in relation to various populations in various life domains. The marketing approach is highly pragmatic because it allows social and behavioral scientists from any discipline to apply marketing concepts to plan social change and assess the impact of intervention strategies on the QOL of targeted populations.

**The Business of Sharing** - Alex Stephany 2015-03-09

Providing a colorful insight into the people at the forefront of the emergent Sharing Economy, a movement predicted to already be worth around \$26B a year, this book gives vital advice to anyone thinking of starting or investing in a collaborative consumption business. The first of its kind, written by an author on the forefront of this new trend.

*Cooperative Enterprises in Australia and Italy* - Anthony Jensen 2015-12-18

This book arises from a three-year comparative research program concerning co-operative enterprises in Australia and Italy. The book explores the historical development, legal framework and the peak organisations of co-operatives in the two countries. Specific comparative chapters focus on consumer, credit, and worker-producer co-operatives.

The book deepens the analysis of co-operatives by containing chapters that examine specific theoretical and empirical issues such as the theory of co-operative firms as collective entrepreneurial action. Monographic chapters include more in depth analysis of specific typologies of co-operatives, such as social and community oriented co-operatives, some of which were created to contrast organized crime in Southern Italy. The book concludes with an assessment of the implications of the project for public policy.

*Digital Italy 2016. Per una strategia nazionale dell'innovazione digitale* - Enrico Acquati 2016

**Uberworked and Underpaid** - Trebor Scholz 2016-12-27

This book is about the rise of digital labor. Companies like Uber and Amazon Mechanical Turk promise autonomy, choice, and flexibility. One of network culture's toughest critics, Trebor Scholz chronicles the work of workers in the "sharing economy," and the free labor on sites like Facebook, to take these myths apart. In this rich, accessible, and provocative book, Scholz exposes the uncaring reality of contingent digital work, which is thriving at the expense of employment and worker rights. The book is meant to inspire readers to join the growing number of worker-owned "platform cooperatives," rethink unions, and build a better future of work. A call to action, loud and clear, *Uberworked and Underpaid* shows that it is time to stop wage theft and "crowd fleecing," rethink wealth distribution, and address the urgent question of how digital labor should be regulated and how workers from Berlin, Barcelona, Seattle, and São Paulo can act in solidarity to defend their rights.

*OECD Tourism Trends and Policies 2016* - OECD 2016-03-09

*Tourism Trends and Policies*, published biennially, analyses tourism performance and major policy trends, initiatives and reforms across 50 OECD and partner countries, providing up-to-date tourism data and analysis.

*Governing Knowledge Commons* - Brett M. Frischmann 2014

"*Governing Knowledge Commons* argues that innovation policymaking should be based on a deeper understanding of what makes commons institutions work. It borrows from and builds on Elinor Ostrom's Nobel Prize-winning research on natural resource commons to propose a case study framework adapted to the unique attributes of knowledge and information. Eleven contributed case studies and two theoretical responses explore knowledge commons across a wide variety of scientific and cultural domains"--Unedited summary from book cover.

*Multidisciplinary Design of Sharing Services* - Maurizio Bruglieri 2018-04-17

This book explores all aspects of the sharing economy, pursuing a multidisciplinary approach encompassing Service Design, Spatial Design, Sociology, Economics, Law, and Transport and Operations Research. The book develops a unified vision of sharing services, and pinpoints the most important new challenges. The first, more theoretical part covers general topics from the perspectives of experts in the respective disciplines. Among the subjects addressed are the role of the user in co-design and co-production; impacts of sharing services on cities, communities, and private spaces; individual rewarding and social outcomes; regulatory issues; and the scope for improving the efficiency of design, management, and analysis of sharing services. In turn, the second part of the book presents a selection of case studies of specific sharing services, in which many of the concepts described in the first part are put into practice. Readers will gain a deeper understanding of the dynamics of sharing services and of the hidden problems that may arise. Key factors responsible for the success (or failure) of sharing services are identified by analyzing some of the best (and worst) practices. Given its breadth of coverage, the book offers a valuable guide for researchers and for all stakeholders in the sharing economy, including startup founders and local administrators.

*Property and Equality* - Thomas Widlok 2005

The ethnography of egalitarian social systems was first met with sheer disbelief. Today it is still hotly debated in a number of fields and has gained sophistication as well as momentum. This collection of essays on "property and equality" acknowledges this diversification by presenting research results in two complementary volumes. They bring together a wide range of authoritative researchers most of whom have worked with hunter-gatherer groups. These two volumes cover existing ethnographic and theoretical ground while maintaining a clear focus on the relation between property and equality. The book consists of the most recent work of prominent members of the original group of researchers in hunter-gatherer studies among them James Woodburn and Richard Lee,

and very recent ethnography on hunter-gatherers and other egalitarian systems.

**Augmented Urban Spaces** - Fiorella De Cindio 2016-04-08

There have been numerous possible scenarios depicted on the impact of the internet on urban spaces. Considering ubiquitous/pervasive computing, mobile, wireless connectivity and the acceptance of the Internet as a non-extraordinary part of our everyday lives mean that physical urban space is augmented, and digital in itself. This poses new problems as well as opportunities to those who have to deal with it. This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place. It considers this from three main perspectives: the implications for the public sphere and urban public or semi-public spaces; the implications for community regeneration and empowerment; and the dilemmas and challenges which the augmentation of space implies for urbanists. Grounded with international real-life case studies, this is an up-to-date, interdisciplinary and holistic overview of the relationships between cities, communities and high technologies.

**Share or Die** - Malcolm Harris 2012-06-19

A collection of messages from the front lines of the new "Lost Generation"

**Managing Asian Destinations** - Ying Wang 2018-04-05

This book focuses on the planning, marketing, and management of Asian tourism destinations, and evaluates current developments within Southeast-Asia and the wider Asia-Pacific region. As more Asian destinations enter the global tourism arena and more Asian travellers look to explore destinations in Asia and beyond, an understanding of how Asian destinations practice tourism is crucial to the future sustainable development of global tourism. This book provides an invaluable stock of research and knowledge based on the Asian practice and experience in destination planning, marketing, and management, offering insights into the latest development and trends in the region.

*Regulating the Collaborative Economy in the European Union Digital Single Market* - Marco Inglese 2019-11-11

This book critically assesses how the rise of the collaborative economy in the European Union Digital Single Market is disrupting consolidated legal acquisitions, such as classical internal market categories, as well as the applicability of consumer protection, data protection, and labour and competition law. It argues that the collaborative economy will, sooner or later, require some sort of regulatory intervention from the European Union. This regulatory intervention, far from stifling innovation, will benefit online platforms, service providers and users by providing them with a clearer and more predictable environment in which to conduct their business. Although primarily intended for academics, this book also appeals to a wider readership, including, but not limited to, national and international regulators, private firms and lobbies as well as online platforms, consumer associations and trade unions.

**City Project and Public Space** - Silvia Serreli 2013-06-20

The book aims at nurturing theoretic reflection on the city and the territory and working out and applying methods and techniques for improving our physical and social landscapes. The main issue is developed around the projectual dimension, with the objective of visualising both the city and the territory from a particular viewpoint, which singles out the territorial dimension as the city's space of communication and negotiation. Issues that characterise the dynamics of city development will be faced, such as the new, fresh relations between urban societies and physical space, the right to the city, urban equity, the project for the physical city as a means to reveal civitas, signs of new social cohesiveness, the sense of contemporary public space and the sustainability of urban development. Authors have been invited to explore topics that feature a pluralism of disciplinary contributions studying formal and informal practices on the project for the city and seeking conceptual and operative categories capable of understanding and facing the problems inherent in the profound transformations of contemporary urban landscapes.
