A Carpenter's Life as Told by Houses - Larry Haun 2011

From one of "Fine Homebuilding's" best-loved authors, Larry Haun, comes a unique story that looks at American home building from the perspective of twelve houses he has known intimately. Part memoir, part cultural history, "A Carpenter's Life as Told by Houses" takes the reader house by house over

an arc of 100 years. Along with period photos, the author shows us the sod house in Nebraska where his mother was born, the frame house of his childhood, the production houses he built in the San Fernando Valley, and the Habitat for Humanity homes he devotes his time to now. It's an engaging read written by a veteran builder with a thoughtful awareness of what

was intrinsic to home building in the past and the many ways it has evolved. Builders and history lovers will appreciate his deep connection to the natural world, yearning for simplicity, respect for humanity, and evocative notion of what we mean by "home."
