The Pumpkin Plan - Mike Michalowicz
2012-07-05

Each year Americans start one million new businesses, nearly 80 percent of which fail within the first five years. Under such pressure to stay alive—let alone grow—it's easy for entrepreneurs to get caught up in a never-ending cycle of "sell it—do it, sell it—do it" that leaves them exhausted, frustrated, and unable to get ahead no matter how hard they try. This is the exact situation Mike Michalowicz found himself in when he was trying to grow his first company. Although it was making steady money,

there was never very much left over and he was chasing customers left and right, putting in twenty-eight-hour days, eight days a week. The punishing grind never let up. His company was alive but stunted, and he was barely breathing. That's when he discovered an unlikely source of inspiration—pumpkin farmers. After reading an article about a local farmer who had dedicated his life to growing giant pumpkins, Michalowicz realized the same process could apply to growing a business. He tested the Pumpkin Plan on his own company and transformed it into a remarkable, multimillion-dollar industry leader. First he did it for himself. Then for others. And now you. So what is the Pumpkin Plan? Plant the right seeds: Don't waste time doing a bunch of different things just to please your customers. Instead, identify the thing you do better than anyone else and focus all of your attention, money, and time on figuring out how to grow your company doing it. Weed out the losers: In a pumpkin patch small, rotten pumpkins stunt the

growth of the robust, healthy ones. The same is true of customers. Figure out which customers add the most value and provide the best opportunities for sustained growth. Then ditch the worst of the worst. Nurture the winners: Once you figure out who your best customers are, blow their minds with care. Discover their unfulfilled needs, innovate to make their wishes come true, and overdeliver on every single promise. Full of stories of other successful entrepreneurs, *The Pumpkin Plan* guides you through unconventional strategies to help you build a truly profitable blue-ribbon company that is the best in its field.

Empire of Pain - Patrick Radden Keefe

2021-04-13

NATIONAL BOOK CRITICS CIRCLE NOMINEE • A NEW YORK TIMES NOTABLE BOOK OF THE YEAR • NEW YORK TIMES BEST SELLER • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and

bestselling author of *Say Nothing* The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. The Sackler name has adorned the walls of many storied institutions—Harvard, the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, known for their lavish donations to the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. *Empire of Pain* begins with the story of three doctor brothers, Raymond, Mortimer and the incalculably energetic Arthur, who weathered the poverty of the Great Depression and appalling anti-Semitism. Working at a barbaric mental

institution, Arthur saw a better way and conducted groundbreaking research into drug treatments. He also had a genius for marketing, especially for pharmaceuticals, and bought a small ad firm. Arthur devised the marketing for Valium, and built the first great Sackler fortune. He purchased a drug manufacturer, Purdue Frederick, which would be run by Raymond and Mortimer. The brothers began collecting art, and wives, and grand residences in exotic locales. Their children and grandchildren grew up in luxury. Forty years later, Raymond's son Richard ran the family-owned Purdue. The template Arthur Sackler created to sell Valium—co-opting doctors, influencing the FDA, downplaying the drug's addictiveness—was employed to launch a far more potent product: OxyContin. The drug went on to generate some thirty-five billion dollars in revenue, and to launch a public health crisis in which hundreds of thousands would die. This is the saga of three generations of a single family and the mark they

would leave on the world, a tale that moves from the bustling streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d'Antibes to the corridors of power in Washington, D.C. *Empire of Pain* chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. *Empire of Pain* is a masterpiece of narrative reporting and writing, exhaustively documented and ferociously compelling. It is a portrait of the excesses of America's second Gilded Age, a study of impunity among the super elite and a relentless investigation of the naked greed and indifference to human suffering that built one of the world's great fortunes.

Built to Sell - John Warrillow 2011-04-28

According to John Warrillow, the number one mistake entrepreneurs make is to build a business that relies too heavily on them. Thus, when the time comes to sell, buyers aren't confident that the company—even if it's profitable—can stand on its own. To illustrate this, Warrillow introduces us to a fictional small business owner named Alex who is struggling to sell his advertising agency. Alex turns to Ted, an entrepreneur and old family friend, who encourages Alex to pursue three criteria to make

his business sellable: * Teachable: focus on products and services that you can teach employees to deliver. * Valuable: avoid price wars by specializing in doing one thing better than anyone else. * Repeatable: generate recurring revenue by engineering products that customers have to repurchase often.

Lunch with Lucy - Sherry Stewart Deutschmann
2020-03-10

Transformational Leadership Through Empathy
When entrepreneur Sherry Deutschmann first decided to start a business, she knew she wanted to build something totally different. In her first book, *Lunch with Lucy*, Sherry tells the story of the creation of that company, LetterLogic, and how she turned it into a \$40-million company by putting employees first—even ahead of customers and shareholders. Putting her people first took many forms, with an extremely generous profit sharing plan and fair living wages among them. But the centerpiece and heart of LetterLogic's culture was the employee-centric practice Sherry designed called "Lunch with Lucy"—a practice that removed the hierarchical dynamics found in most organizations. On any given Wednesday, any employee could invite "Lucy" (Sherry's midday moniker) out to lunch, at a place of their

choice, with the bill picked up by Sherry. At these events, Sherry wasn't the CEO. She was "Lucy," a co-worker. By making herself 100% available, "Lucy" created a judgment-free environment where she could learn about a team member's dreams, ambitions, and challenges—and gain their insight into what she was doing right or wrong as a leader. She credits this approach with the success of her company. Lunch with Lucy's interior, refreshingly laid out like courses on a menu, invites us to see how a leader's choices directly impact employee morale, engagement, and commitment—and in this author's case, ultimately led to a healthy and hearty bottom line. Sherry's voice is new, and her honesty, humor, and humility shine through this story of a woman building a successful business through empathetic leadership and uncommon, commonsense business practices, one lunch at a time. Sit down at the table and learn about a business model that is truly transformational.

The Millionaire Fastlane - MJ DeMarco
2011-01-04

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that

reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The

leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Street Smarts - Norm Brodsky 2010-02-23
"One is tempted to say 'the only book you'll need on starting a business.' Brilliant! Genius! Choose your superlative-it'll fit."-Tom Peters People starting out in business tend to seek step-by-step formulas or rules, but in reality there are no magic bullets. Rather, says veteran company-builder Norm Brodsky, there's a mentality that

helps street- smart entrepreneurs solve problems and pursue opportunities as they arise. Brodsky shares his hard-earned wisdom every month in Inc. magazine, in the hugely popular "Street Smarts" column he cowrites with Bo Burlingham. Now they've adapted their best advice into a comprehensive guide for anyone running a small business.

Finish Big - Bo Burlingham 2014-11-28

"No two exit experiences are exactly alike. Some people wind up happy with the process and satisfied with the way it turned out while others look back on it as a nightmare. The question I hope to answer in this book is why. What did the people with 'good' exits do differently from those who'd had 'bad' exits?" When pioneering business journalist and Inc. magazine editor at large Bo Burlingham wrote *Small Giants*, it became an instant classic for its original take on a common business problem—how to handle the pressure to grow. Now Burlingham is back to tackle an even more common problem—how to

exit your company well. Sooner or later, all entrepreneurs leave their businesses and all businesses get sold, given away, or liquidated. Whatever your preferred outcome, you need to start planning for it while you still have time and options. The beautiful part is that if you start early enough, the process will lead you to build a better, stronger, more resilient company, as well as one with a higher market value.

Unfortunately, most owners don't start early enough—and pay a steep price for their procrastination. Burlingham interviewed dozens of entrepreneurs across a range of industries and identified eight key factors that determine whether owners are happy after leaving their businesses. His book showcases the insights, exit plans, and cautionary tales of entrepreneurs such as Ray Pagano: founder of a leading manufacturer of housings for security cameras. He turned down a bid for his company and instead changed his management style, resulting in a subsequent sale for four times the original

offer. Bill Niman: founder of the iconic Niman Ranch, which revolutionized the meat industry. He learned about unhappy exits when he was forced to sell to private equity investors, leaving him with nothing to show for his thirty-five years in business. Gary Hirshberg: founder of organic yogurt pioneer Stonyfield Farm. He pulled off the nearly impossible task of finding a large company that would buy out his 275 small investors at a premium price while letting him retain complete control of the business. Through such stories, Burlingham offers an illuminating and inspirational guide to one of the most stressful, and yet potentially rewarding, processes business owners must go through. And he explores the emotional challenges they face at every step of the way. At the end of the day, owning a business is about more than selling goods and services. It's about making choices that shape your entire life, both professional and personal. Finish Big helps you figure out how to face your future with

confidence and be able to someday look back on your journey with pride.

secret—no matter what industry you're in—is finding and keeping automatic customers. These days virtually anything you need can be purchased through a subscription, with more convenience than ever before. Far beyond Spotify, Netflix, and New York Times subscriptions, you can sign up for weekly or monthly supplies of everything from groceries (AmazonFresh) to cosmetics (Birchbox) to razor blades (Dollar Shave Club). According to John Warrillow, this emerging subscription economy offers huge opportunities to companies that know how to turn customers into subscribers. Automatic customers are the key to increasing cash flow, igniting growth, and boosting the value of your company. Consider Whatsapp, the internet-based messaging service that was purchased by Facebook for \$19 billion. While other services bombarded users with invasive ads in order to fund a free messaging platform, Whatsapp offered a refreshingly private tool on a subscription platform, charging just \$1 per year.

Their business model enabled the kind of service that customers wanted and ensured automatic customers for years to come. As Warrillow shows, subscriptions aren't limited to technology or media businesses. Companies in nearly any industry, from start-ups to the Fortune 500, from home contractors to florists, can build subscriptions into their business. Warrillow provides the essential blueprint for winning automatic customers with one of the nine subscription business models, including:

- The Membership Website Model: Companies like The Wood Whisperer Guild, ContractorSelling, and DanceStudioOwner offer access to highly specialized, high quality information, recognizing that people will pay for good content. This model can work for any business with a tightly defined niche market and insider information.
- The Simplifier Model: Companies like Mosquito Squad (pest control) and Hassle Free Homes (home maintenance) take a recurring task off your to-do list. Any business

serving busy consumers can adopt this model not only to create a recurring revenue stream, but also to take advantage of the opportunity to cross-sell or bundle their services. • The Surprise Box Model: Companies like BarkBox (dog treats) and Standard Cocoa (craft chocolate) send their subscribers curated packages of goodies each month. If you can handle the logistics of shipping, giving customers joy in something new can translate to sales on your larger e-commerce site. This book also shows you how to master the psychology of selling subscriptions and how to reduce churn and provides a road map for the essential statistics you need to measure the health of your subscription business. Whether you want to transform your entire business into a recurring revenue engine or just pick up an extra 5 percent of sales growth, The Automatic Customer will be your secret weapon. Small Giants - Bo Burlingham 2016-10-11

How maverick companies have passed up the growth treadmill — and focused on greatness instead. It's an axiom of business that great companies grow their revenues and profits year after year. Yet quietly, under the radar, a small number of companies have rejected the pressure of endless growth to focus on more satisfying business goals. Goals like being great at what they do, creating a great place to work, providing great customer service, making great contributions to their communities, and finding great ways to lead their lives. In *Small Giants*, veteran journalist Bo Burlingham takes us deep inside fourteen remarkable companies that have

chosen to march to their own drummer. They include Anchor Brewing, the original microbrewer; CitiStorage Inc., the premier independent records-storage business; Clif Bar & Co., maker of organic energy bars and other nutrition foods; Righteous Babe Records, the record company founded by singer-songwriter Ani DiFranco; Union Square Hospitality Group, the company of restaurateur Danny Meyer; and Zingerman's Community of Businesses, including the world-famous Zingerman's Deli of Ann Arbor. Burlingham shows how the leaders of these small giants recognized the full range of choices they had about the type of company they could create. And he shows how we can all benefit by questioning the usual definitions of business success. In his new afterward, Burlingham reflects on the similarities and learning lessons from the small giants he covers in the book.

Built to Last - Jim Collins 2002-08-20
Drawing upon a six-year research project at the Stanford University Graduate School of Business, James C. Collins and Jerry I. Porras took eighteen truly exceptional and long-lasting

companies and studied each in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from the comparison companies and what were the common practices these enduringly great companies followed throughout their history?" Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the 21st century and beyond.

thousands of hours of commitment, grit, and hard work. It's no wonder why more than half of new businesses close within six years of opening, and fewer than 5 percent will ever earn more than \$1 million annually. 12 Months to \$1 Million condenses the startup phase into one fast-paced year that has helped hundreds of new entrepreneurs hit the million-dollar level by using an exclusive and foolproof formula. By cutting out the noise and providing a clear and proven plan, this roadmap helps even brand-new entrepreneurs make decisions quickly, get their product up for sale, and launch it to a crowd that is ready and waiting to buy. This one-year plan will guide you through the three stages to your first \$1 million: • The Grind (Months 0-4): This step-by-step plan will help you identify a winning product idea, target customers that are guaranteed to buy, secure funding, and take your first sale within your first four months. • The Growth (Months 5 - 8): Once you're in business, you will discover how to use cheap and

effective advertising strategies to get your product to at least 25 sales per day, so you can prove you have a profitable business. • The Gold (Months 9-12): It's time to establish series of products available for sale, until you are averaging at least 100 sales per day, getting you closer to the million-dollar mark every single day. Through his training sessions at Capitalism.com, Ryan Daniel Moran has helped new and experienced entrepreneurs launch scalable and sustainable online businesses. He's seen more than 100 entrepreneurs cross the seven-figure barrier, many of whom go on to sell their businesses. If your goal is to be a full-time entrepreneur, get ready for one chaotic, stressful, and rewarding year. If you have the guts to complete it, you will be the proud owner of a million-dollar business and be in a position to call your own shots for life.

Product-Led Growth - Wes Bush 2019-05

Can your software sell itself? Convention and the trillion-dollar sales industry claim that it's impossible for your product to sell itself. Yet successful software businesses like Slack, Dropbox, Atlassian, and HubSpot make millions selling to customers who never once reached out to a sales rep. In Product-Led Growth: How to Build a Product That Sells Itself, growth consultant Wes Bush challenges the traditional SaaS marketing and sales playbook and introduces a completely new way to sell products. Bush reveals how your product--not expensive sales teams--can be the main vehicle

to acquire, convert, and retain customers. In this step-by-step guide to Product-Led Growth, Bush explains: Why you should flip the traditional sales process on its head and turn your product into a sales machine; How to decide whether your business should use a free trial, freemium, or hybrid model; How to turn free users into happy, paying customers. History tells us that "how" you sell is just as important as "what" you sell. Blockbuster couldn't compete with Netflix by selling the same digital content, and you need to decide "when" not "if" you'll innovate on the way you sell. Are you going to be product-led? Or will you be disrupted, too?

The Lean Startup - Eric Ries 2011-09-13

Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “validated learning,” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it’s too late. Ries

provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

Traction - Justin Mares 2014-08-26

Most startups end in failure. Almost every failed startup has a product. What failed startups don't have are enough customers. Traction Book changes that. We provide startup founders and employees with the framework successful companies use to get traction. It helps you determine which marketing channel will be your key to growth. "If you can get even a single distribution channel to work, you have a great business." -- Peter Thiel, billionaire PayPal founder The number one traction mistake founders and employees make is not dedicating as much time to traction as they do to developing a product. This shortsighted

approach has startups trying random tactics -- some ads, a blog post or two -- in an unstructured way that will likely fail. We developed our traction framework called Bullseye with the help of the founders behind several of the biggest companies and organizations in the world like Jimmy Wales (Wikipedia), Alexis Ohanian (Reddit), Paul English (Kayak.com), Alex Pachikov (Evernote) and more. We interviewed over forty successful founders and researched countless more traction stories -- pulling out the repeatable tactics and strategies they used to get traction. "Many entrepreneurs who build great products simply don't have a good distribution strategy." -- Mark Andreessen, venture capitalist Traction will show you how some of the biggest internet companies have grown, and give you the same tools and framework to get traction.
