*Julian the Apostate* - Gaetano Negri 1905

**Socially Symbolic Acts** - Joseph Francese 2006

This book discusses issues of broad cultural consequence by examining the work of three of Italy's most prominent living novelists, Umberto Eco, Vincenzo Consolo, and Antonio Tabucchi. The introductory chapter continues a discussion of some of the topics already broached in the author's *Narrating Postmodern Time and Space* (1997). It uses an approach that is both historicist and psychoanalytic to critically address topics in cultural studies and Italian studies. The book deals with fictions of very recent publication, many of which have been published after the turn of the millennium, filling important gaps in the critical bibliography. Close readings relate texts to their historical and cultural contexts, critiquing their ideology while preserving their Utopian moments.

*A Window on the Italian Female Modernist Subjectivity* - Rossella M. Riccobono 2013-09-17

This collection of essays surveys some of the artistic productions by female figures who stood at the forefront of Italian modernity in the fields of literature, photography, and even the theatre, in order to explore how artistic engagement in women informed their views on, and reactions to the challenges of a changing society and a 'disinhibiting' intellectual landscape. However, one other objective takes on a central role in this volume: that of opening a window on the re-definition of the subjectivity of the self that occurred during an intriguing and still not fully studied period of artistic and societal changes. In particular, the present volume aims to define a female Italian Modernism which can be seen as complementary, and not necessarily in opposition, to its male counterpart.

*Eye of the Century* - Francesco Casetti 2008

Acclaimed film scholar Francesco Casetti situates the cinematic experience within discourses of 20th century modernity. He suggests that film defined a unique gaze not only because it recorded many of the centuries most important events, but also because it determined the manner in which they were received.

**Finance and the Common Good** - Cor van Beuningen 2019-07-16

Over the past fifty years, (financial) capitalism has brought about an enormous growth in wealth. Millions around the world have been lifted out of poverty. However, the downsides of the present global economic constitution are rapidly becoming evident as well. Rising inequality, soaring debt levels, and repeated cycles of boom and bust have proven to be some of its key characteristics. After the 2008 crisis brought the financial system to the brink of collapse, new regulations, stricter supervision, higher capital requirements, and ethical codes were introduced to the sector. Today we find ourselves in the middle of

another economic boom. Yet one pressing question remains: has anything changed? Have the (necessary) repairs fixed the flaws in the system? Or do we require even more fundamental reforms? This volume builds on the observation that society has co-evolved with the financial sector. We cannot simply claim that 'finance' was the sole instigator of the 2008 crisis. Society itself has become financialized; the process of replacing relations, structures of trust and reciprocity, by anonymous and systemic transactions. The volume poses vital questions with regard to this societal development. How did this happen? And more importantly: is change possible? If yes, how? This volume contains 21 essays on the themes mentioned above. Authors include Jan Peter Balkenende, Wouter Bos, Lans Bovenberg, Govert Buijs, and Herman Van Rompuy. A recommendation by Dutch Minister of Finance Wopke Hoekstra is also included.

*Aquinas and the Market* - Mary L. Hirschfeld 2018-11-26

Economists investigate the workings of markets and tend to set ethical questions aside. Theologians often dismiss economics, losing insights into the influence of market incentives on individual behavior. Mary L. Hirschfeld bridges this gap by showing how a humane economy can lead to the good life as outlined in the thought of St. Thomas Aquinas.

*Innovation Contested* - Benoît Godin 2015-01-09

Innovation is everywhere. In the world of goods (technology), but also in the world of words: innovation is discussed in the scientific and technical literature, but also in the social sciences and humanities. Innovation is also a central idea in the popular imaginary, in the media and in public policy. Innovation has become the emblem of the modern society and a panacea for resolving many problems. Today, innovation is spontaneously understood as technological innovation because of its contribution to economic "progress". Yet for 2,500 years, innovation had nothing to do with economics in a positive sense. Innovation was pejorative and political. It was a contested idea in philosophy, religion, politics and social affairs. Innovation only got de-contested in the last century. This occurred gradually beginning after the French revolution. Innovation shifted from a vice to a virtue. Innovation became an instrument for achieving political and social goals. In this book, Benoît Godin lucidly examines the representations and meaning(s) of innovation over time, its diverse uses, and the contexts in which the concept emerged and changed. This history is organized around three periods or episteme: the prohibition episteme, the instrument episteme, and the value episteme.

*The Oxford Latin Syntax* - Harm Pinkster 2015

The goal of this work is to present an up-to-date successor to Keuhner-Stegmann's *Ausführliche Grammatik der lateinischen Sprache*, taking into account new editions of Latin texts with better knowledge of the manuscripts, the publication and study of texts unknown in Keuhner-Stegmann's time, recent linguistic studies, and new methods and models in linguistics.

*The Oxford Latin Syntax* - Harm Pinkster 2021-03-31

In this two-volume work, the first full-scale treatment of its kind in English, Harm Pinkster applies contemporary linguistic theories and the findings of traditional grammar to the study of Latin syntax. He takes a non-technical and principally descriptive approach, based on literary and non-literary texts dating from c.250 BC to c.450 AD. The volumes contain a wealth of examples to illustrate the grammatical phenomena under discussion, many of them from the works of Plautus and Cicero, alongside extensive references to other sources of examples such as the Oxford Latin Dictionary and the Thesaurus Linguae Latinae. While the first volume explored the simple clause, this second volume focuses on the complex sentence and discourse. The first three chapters examine different types of subordinate clause; the following four then explore relative clauses, coordination, comparison, and secondary predicates. Later chapters investigate information structure and extraclausal expressions, word order, and discourse and related features. The Oxford Latin Syntax will be a valuable and up-to-date resource both for professional Latinists and all linguists with an interest in Classics.

**The Value of Worthless Lives** - Ilaria Serra 2007

There are many good books on Italian immigration to the United States, including success biographies, field researches and historical investigations. What is lacking however is an account of the immigrant experience from a "grassroots" point of view. This book tells the stories of a normal people, the great majority of the immigrant population, through their own, sometimes almost illiterate, words. With this book I

aim to contribute to this country's story of immigration with these first-hand accounts of those who lived it, first-generation immigrants. It was said once, by Giuseppe Prezzolini, that Italian immigration left tears and sweat but not "words." The material of this book proves such arrogance wrong. I tried to be as thorough as possible in my field research looking for such "words" on both sides of the Ocean. I consulted Italian and American archives, I looked for books out of print, and scavenged for unpublished ones in private houses and forgotten drawers. What I found fills a silence and gives a wider spectrum of the immigrant experience, from the miner to the tailor, from the janitor to the professor. The book will interest scholars of Italian immigration because it adds information from within the protagonists' self. Their tales may be average, their memory may be inaccurate but their drive toward a new life and their immigrant "philosophy," made of grinding teeth and hope, is all there in its most fresh features. The book will also interest scholars of the autobiographical genre because it adds a new facet to the autobiographical voice. There are only a few studies on the life writing of the lower class (which come from France and England, not the US). I have tried to formulate new concepts that describe the autobiographical "I" of these works, conc

**Rethinking education: towards a global common good?** - UNESCO 2015-05-26

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Nostalgia - Helmut Illbruck 2012-10-31

Helmut Illbruck traces the concept of nostalgia from the earliest uses of the term in the seventeenth century to today as it evolves with different meanings and intensities in the discourses of medicine, literature, philosophy, and aesthetics. Following nostalgia's troubled relations to the philosophical project of the Enlightenment, Illbruck's study builds a cumulative argument about nostalgia's modern significance that often revises and thoroughly enriches our understanding of cultural, literary, and intellectual history. Illbruck concludes with an attempt at a reinterpretation and defense of nostalgia, which seduces us to read and think with, rather than against, nostalgia's wistful yearning for the past. *Nostalgia: Origins and Ends of an Unenlightened Disease* is a comprehensive, insistent, and profound interdisciplinary investigation of the history of an idea. It should appeal to readers interested in the cultural makings of the Enlightenment and modernity or in the histories of medicine, literature, and philosophy.

**Latin by the Natural Method** - William Most 2015-08-05

From the Preface: Most Americans who have studied Latin, with our priests and seminarians included, have employed this method, which they thought was 'traditional'. But as something fully developed, this tradition scarcely goes farther back than 1880; and even in its beginnings it hardly antedates the seventeenth century. In contrast to this method of grammatical analysis, Father Most's textbooks reproduce much of the "natural method" by which children learn their native language. Hence, the significance of Father Most's books is manifestly great for the Latin classes in any Catholic high schools or colleges. So much of our Catholic doctrine and culture have been deposited in Latin that we want many of our educated Catholics to be able to use Latin with ease. But the special significance of Father Most's texts is for the Latin classes in our seminaries. Here the students still have much the same cogent motives to master the art of using Latin with ease as the pupils of the thirteenth or sixteenth century. They need it as an indispensable means of communicating thought in their higher studies, and afterwards throughout life. The objectives (knowledge about Latin and training of mind) and corresponding methods (grammatical analysis and translation) "traditional" since 1880 have taken over in our seminaries; and there too the students have been experiencing an ever growing inability to use Latin. Father Most's textbooks can contribute much towards revolutionizing the teaching of Latin by bringing back, as the chief objective, the art of reading, writing, and (when desired) speaking Latin with ease." Fr. Most's textbooks can be classed in categories of similar texts, such as Hans Ørberg's *Lingua Latina*, as well as *Ecce Romani* which is a simplification of Ørberg or others which aim to teach Latin not even so much as a modern language, as to teach it by a method more natural to the philosophy of learning Languages. Fr. Most's text, however, is tailored to a Christian perspective. The work begins with readings in Roman History bringing in simple sentences and gradually building up the student with additions of vocabulary to reading accounts of Scripture, Ancient Egypt, Gilgamesh as well as amusing tales with a parrot. This is an excellent text applying the "natural method" with English language instruction to help the student read and understand Latin natively, with numerous vehicles for simplifying the necessary memorization as well as aiding in truly understanding Latin without constant need to look in a dictionary for rudimentary sentences. This is

the second edition, correcting certain errors in the original. The reprint is from the 1960 edition, and follows the presentation of the text found in that edition.

Italian Pocket Dictionary - Giuspanio Graglia 1833

*Discourse on the State of the Jews* - Simone Luzzatto 2019-07-08

In 1638, a small book of no more than 92 pages in octavo was published "appresso Gioanne Calleoni" under the title "Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice." It was dedicated to the Doge of Venice and his counsellors, who are labelled "lovers of Truth." The author of the book was a certain Simone (Simḥa) Luzzatto, a native of Venice, where he lived and died, serving as rabbi for over fifty years during the course of the seventeenth century. Luzzatto's political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly on overseas commercial activity. This plan is highly recommendable because the Jews are "wellsuited for trade," much more so than others (such as "foreigners," for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto's argument is that this talent could be put at the service of the Venetian government in order to maintain - or, more accurately, recover - its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions, disregarding the classic categorisation of Judaism's alleged privileged religious status in world history. Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto's resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto's texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. By approaching his texts from this point of view, the editors hope to open a new path in research into Jewish culture and philosophy that will enable other scholars to develop new directions and new perspectives, stressing the interpenetration between Jews and the surrounding Christian and secular cultures.

**A New Language, A New World** - Nancy C. Carnevale 2010-10-01

An examination of Italian immigrants and their children in the early twentieth century, *A New Language, A New World* is the first full-length historical case study of one immigrant group's experience with language in America. Incorporating the interdisciplinary literature on language within a historical framework, Nancy C. Carnevale illustrates the complexity of the topic of language in American immigrant life. By looking at language from the perspectives of both immigrants and the dominant culture as well as their interaction, this book reveals the role of language in the formation of ethnic identity and the often coercive context within which immigrants must negotiate this process.

Useful Cinema - Charles R. Acland 2011-10-14

By exploring the use of film in mid-twentieth-century institutions, including libraries, museums, classrooms, and professional organizations, the essays in *Useful Cinema* show how moving images became an ordinary feature of American life. In venues such as factories and community halls, people encountered industrial, educational, training, advertising, and other types of "useful cinema." Screening these films transformed unlikely spaces, conveyed ideas, and produced subjects in the service of public and private aims. Such functional motion pictures helped to shape common sense about cinema's place in contemporary life. Whether measured in terms of the number of films shown, the size of audiences, or the economic activity generated, the "non-theatrical sector" was a substantial and enduring parallel to the more spectacular realm of commercial film. In *Useful Cinema*, scholars examine organizations such as UNESCO, the YMCA, the Amateur Cinema League, and the Metropolitan Museum of Art. They also consider film exhibition sites in schools, businesses, and industries. As they expand understanding of this other American cinema, the contributors challenge preconceived notions about what cinema is. Contributors. Charles R. Acland, Joseph Clark, Zoë Druick, Ronald Walter Greene, Alison Griffiths, Stephen Groening, Jennifer Horne, Kirsten Ostherr, Eric Smoodin, Charles Tepperman, Gregory A. Waller, Haidee Wasson. Historical Roots of Linguistic Theories - Lia Formigari 1995-01-01

Most of the papers collected in this volume concentrate on the history of linguistic ideas in France and Italy in the modern period (from the Renaissance to the present day). Some of them are specifically focused on the links between the two traditions of reflection on language. The contributions have a common methodological outlook: the authors do not believe that the history of linguistic ideas is a separate activity from research on language or that it is marginal with respect to the latter. On the contrary, they are convinced that in contemporary research into language we can still discern the influence — positive or negative as this may be — of factors deriving from the (sometimes distant) past. A historical analysis of these factors — whether it rejects them as superseded, or redefines them in order to elicit the fruitful suggestions they may still contain — has a contribution to make to the progress of theory.
