[Nollywood in Glocal Perspective](#) - Bala A. Musa 2019-11-16

This book gives a panoramic view of the rise and growth of Nollywood, Nigeria's movie and home video entertainment industry, into the second largest and most prolific movie-producing industry in the world. It offers an analysis of Nollywood's influence as a local and global cultural force. Scholars from Africa, the African Diaspora and beyond examine the factors that have shaped Nollywood's unique story-telling, production, and distribution system. The volume shows how internal and external economic, social, cultural and technological changes intersect to define Nollywood's film-making and entertainment ethos. It is grounded in sound theoretical perspectives that help readers understand the texts and subtexts of the industry's emergence, transformation, and impact. The range of subjects covered span Nollywood's historical roots in Nigeria pre-colonial traveling/community theatre to colonial era film-making, and its contemporary spin-offs and inspired cousins across Africa and in Europe. It illuminates the interface of artistic, business, cultural and technological innovation and creativity at the heart of Africa's local and global pop culture explosion.

[Anatomy of the Slasher Film](#) - Sotiris Petridis 2019-05-14

The term "slasher film" was common parlance by the mid-1980s but the horror subgenre it describes was at least a decade old by then--formerly referred to as "stalker," "psycho" or "slice-'em-up." Examining 74 movies--from *The Texas Chainsaw Massacre* (1974) to *Texas Chainsaw 3D* (2013)--the author identifies the characteristic elements of the subgenre while tracing changes in narrative patterns over the decades. The slasher canon is divided into three eras: the classical (1974-1993), the self-referential (1994-2000) and the neoslasher cycle (2000-2013).

Medical Visions - Kirsten Ostherr 2013-03-11

How do visual images shape the practice of medicine? What role does visual representation play in the cultivation of medical ways of seeing? And how has medicine's visual culture changed in the digital age? Kirsten Ostherr's ambitious study explores 120 years of medical image-making to explain how visual representations shape medical education and practice. Marshaling powerful, vivid examples she demonstrates how medical images created by the healthcare industry, documentary filmmakers, experimental artists, and the mass media acquire cultural meaning and influence doctors' and patients' understandings of health and disease. Her analysis proceeds chronologically, turning from the earliest experiments with medical filmmaking by the American College of Surgeons, to the place of health films in the "golden age" of instructional film in the 1960s. Ostherr considers the shift to television as the dominant medium of health education, highlighting the evolving status of realism, the techniques employed to bridge the entertainment-education divide, the role of expert consultants and sponsors, and the tradeoffs made by professionals to reach a broad audience. The rise of physician advice segments on newsmagazines forms a transition between medical dramas like *Marcus Welby, MD* and more recent reality shows like *Boston Med* and *Doctor 90210*. Concluding with a section on advertising and social media in the health care setting, the book ends with ten key lessons for the future of medical media.

Biographical Dictionary of Film - David Thomson 1980-06

[I'm Not a Film Star](#) - Ian Dixon 2022-07-14

The first collection dedicated to David Bowie's acting career shows that his film characterisations and performance styles shift and reform as decoratively as his musical personas. Though he was described as the most influential pop artis of the 20th century, whose work became synonymous with mask, mystery, sexual excess and ch-ch-ch-changing genres, Bowie also applied his genius to the craft of acting. Bowie's considerable filmography is systematically examined in 12 scholarly essays that include tributes to Bowie's performance craft in other media forms. Classic films such as *The Prestige* and *Merry Christmas*, Mr. Lawrence, cult hits *Labyrinth* and *The Man Who Fell To Earth*, as well as lesser-known roles in *The Image*, *Christiane F.* and Broadway hit *The Elephant Man* are viewed, not simply through the lens of Bowie's mega-stardom, but as the work of a serious actor with inimitable talent. This compelling analysis celebrates the risk-taking intelligence and bravura of David Bowie: actor, mime, mimic and icon.

This resource and training manual provides readers with the essential theory and instruction needed to understand and safely use x-radiation in the dental office. This edition has been completely revised to include a simulated licensure exam and the latest techniques in dental radiography. The book's 32 chapters explore a range of topics from radiation basics to legal issues.

Cross-border Cultural Production - Janet Wasko 2008

This volume addresses issues revolving around the production of mediated cultural products across borders. More specifically, the authors consider cross-border cultural production in the film and television industries and how it affects and is affected by media centers, and, more recently, established production locations. The film and television industries have long been recognized as playing important economic, political and cultural roles. And while it could be argued that, historically, these forms of cultural production often have been international endeavors, the choice of production sites has become an especially contentious issue during the last few decades as global production has expanded. While some factions, notably from the US film and television industries, refer to this issue as "runaway production," this book takes a much broader look at the implications and consequences of this phenomenon. Basically, cross-border production involves the expansion of production away from traditional centers, whether to other countries or to other locations within the same country. Thus, this study covers a wide range of issues involving economic and political considerations, as well as creative and aesthetic decision-making.

Personally Speaking - Candace Spigelman 2004-10-07

Responding to contemporary discussion about using personal accounts in academic writing, *Personally Speaking: Experience as Evidence in Academic Discourse* draws on classical and current rhetorical theory, feminist theory, and relevant examples from both published writers and first-year writing students to illustrate the advantages of blending experiential and academic perspectives. Candace Spigelman examines how merging personal and scholarly worldviews produces useful contradictions and contributes to a more a

complex understanding in academic writing. This rhetorical move allows for greater insights than the reading or writing of experiential or academic modes separately does. Personally Speaking foregrounds the semi-fictional nature of personal stories and the rhetorical possibilities of evidence as Spigelman provides strategies for writing instructors who want to teach personal academic argument while supplying practical mechanisms for evaluating experiential claims. The volume seeks to complicate and intensify disciplinary debates about how compositionists should write for publication and what kinds of writing should be taught to composition students. Spigelman not only supplies evidence as to why the personal can count as evidence but also relates how to use it effectively by including student samples that reflect particular features of personal writing. Finally, she lays the groundwork to move narrative from its current site as confessional writing to the domain of academic discourse.

The English Record - 2005

Anatomy of Wonder - Neil Barron 2004

Barron's classic work has been updated and reorganized to reflect changes in the genre over the past decade, and meet the needs and tastes of today's readers and those who work with them. Renowned experts in the field have provided authoritative historical and contemporary coverage of the best in science fiction. Users will find succinct, critical discussions of more than 1,400 science fiction novels, story collections, and anthologies, along with a comprehensive survey of the "secondary" literature, chapters on teaching science fiction, titles appropriate for--or appealing to--teens, a directory of libraries containing significant collections of science fiction, and award-winning titles and titles of literary merit. Author, title, and theme indexes provide additional points of access. An essential tool for collection development, research, and reference, this book also supports readers' advisory work.

The Films of Robin Williams - Johnson Cheu 2019-05-28

From his first appearance as Mork from Ork on the 1970s sitcom Happy Days, Robin Williams was heralded as a singular talent. In the pre-cable television era, he was one of the few performers to successfully transition from TV to film. An Oscar-winning actor and preternaturally quick-witted comedian, Williams became a cultural icon, leaving behind a large and varied body of work when he unexpectedly took his own life in 2014. This collection of new essays brings together a range of perspectives on Williams and his oeuvre, including beloved hits like Mrs. Doubtfire, Good Morning, Vietnam, Good Will Hunting, The Fisher King, Dead Poets Society and Aladdin. Contributors explore his earlier work (Mork and Mindy, The World According to Garp) and his political and satirical films (Moscow on the Hudson, Toys). Williams's darker, less well-known fare, such as Being Human, One Hour Photo, Final Cut and Boulevard, is also covered. Williams's artistry has become woven into the fabric of our global media culture.

Teaching Sound Film - R. J. Cardullo 2016-10-26

Teaching Sound Film: A Reader is a film analysis-and-criticism textbook that contains 35 essays on 35 geographically diverse, historically significant sound films. The countries represented here are France, Italy, England, Belgium, Russia, India, China, Cuba, Germany, Japan, Romania, Czechoslovakia, Brazil, Taiwan, Austria, Afghanistan, South Korea, Finland, Burkina Faso, Mexico, Iran, Israel, Colombia, and the United States. The directors represented include Jean Renoir, Orson Welles, Akira Kurosawa, Federico Fellini, Woody Allen, Aki Kaurismäki, Ken Loach, Tomás Gutiérrez Alea, Abbas Kiarostami, Michael Haneke, and Hong Sang-soo. Written with university students (and possibly also advanced high school students) in mind, the essays in Teaching Sound Film: A Reader cover some of the central films treated—and central issues raised—in today's cinema courses and provide students with practical models to help them improve their own writing and analytical skills. These essays are clear and readable—that is, sophisticated and meaty yet not overly technical or jargon-heavy. This makes them perfect introductions to their respective films as well as important contributions to the field of film studies in general. Moreover, this book's scholarly apparatus features credits, images, bibliographies for all films discussed, filmographies for all the directors, a list of topics for writing and discussion, a glossary of film terms, and an appendix containing three essays, respectively, on film acting, avant-garde cinema, and theater vs. film.

Film Theory and Contemporary Hollywood Movies - Warren Buckland 2009-06-03

Film theory no longer gets top billing or plays a starring role in film studies today, as critics proclaim that theory is dead and we are living in a post-theory moment. While theory may be out of the limelight, it remains an essential key to understanding the full complexity of cinema, one that should not be so easily discounted or discarded. In this volume, contributors explore recent popular movies through the lens of film theory, beginning with industrial-economic analysis before moving into a predominately aesthetic and interpretive framework. The Hollywood films discussed cover a wide range from 300 to Fifty First Dates, from Brokeback Mountain to Lord of the Rings, from Spider-Man 3 to Fahrenheit 9/11, from Saw to Raiders of the Lost Ark, and much more. Individual essays consider such topics as the rules that govern new blockbuster franchises, the 'posthumanist realism' of digital cinema, video game adaptations, increasingly restricted stylistic norms, the spatial stories of social networks like YouTube, the mainstreaming of queer culture, and the cognitive paradox behind enjoyable viewing of traumatic events onscreen. With its cast of international film scholars, Film Theory and Contemporary Hollywood Movies demonstrates the remarkable contributions theory can offer to film studies and moviegoers alike.

The Dublin Dissector, Or System of Practical Anatomy. Fifth Edition - Robert HARRISON (M.D.) 1847

Quain's Elements of Anatomy - Jones Quain 1912

American Pie - Bill Osgerby 2019-10-08

American Pie represents the most commercially successful example of the vulgar teen comedy, and this book analyses the film's development, audience-appeal and cultural significance. American Pie (1999) is a film that exemplifies that most disparaged of movie genres – the vulgar teen comedy. Largely aimed at young audiences, the vulgar teen comedy is characterised by a brazenly over-the-top humour rooted in the salacious, the scatological and the squirmingly tasteless. In this book, consideration is given to the relationship between American Pie's success and broad shifts within both the youth market and the film business. Attention is also given to the film's representations of youth, gender and sexuality, together with the distinctive character of its comedy and the enduring place of such humour in contemporary popular culture. While chiefly focusing on the original American Pie movie, the book also considers the development of the franchise, with discussion of the movie's three sequels and four direct-to-DVD releases. The book also charts the history, nature and appeal of vulgar teen comedy as a whole, providing the first concerted analysis of this generally overlooked category of youth film. Clear, concise and comprehensive, the book is ideal for students, scholars and general readership worldwide.

Twenty-One Landmark European Films 1939-1999 - Bert Cardullo 2015-04-01

The essays in this insightful film-analysis text show cover twenty-one of the best European films made between the coming of World War II and the end of the twentieth century, showing what makes each of them outstanding. These essays are clear and readable—that is, sophisticated and meaty yet not overly technical or jargon-heavy. They will make perfect introductions to their respective films as well as important contributions to the field of film studies in general. Written with university students in mind, these essays cover some of the central films treated—and central issues raised—in today's cinema courses and provide students with practical models to help them improve their own writing and analytical skills. A list of questions for discussion is included, to trigger further thinking among film buffs and to help educators prepare for class. The book is aimed at students, teachers, and cinephiles with an interest in European cinema in particular and cinema studies in general, as well as at those educated readers with an interest in the practice of film analysis and criticism. The only competition comes from Stanley Kauffmann's relatively brief Ten Great Films (136 pp., 2012). The current work offers twenty-one illustrated essays (Kauffmann's book contains no images) and focuses on Europe. (The countries represented are France, Italy, England, Hungary, Belgium, Sweden, Scotland, Denmark, Russia, Spain, Germany, Scotland, and Finland.) Twenty-One Landmark European Films, 1939-1999 overlaps with Kauffmann's book only in the case of L'avventura, though the two approach this film from vastly different angles. Moreover, the book provides a complete critical apparatus—notes, bibliographies, credits, and filmographies, whereas Kauffmann's has none. This book could be one of the primary texts for courses in film analysis, to

accompany a work like Timothy Corrigan's A Short Guide to Writing about Film (8th edition, 2011). It would also be a suitable supplementary or secondary text in such courses as 'Introduction to Film' or 'Film Appreciation'; 'Western European Cinema'; 'History of Film' or 'Global Cinema'; and 'Film Directors' or 'Film Style and Imagination.'

Principles and Methods of Toxicology, Fifth Edition - A. Wallace Hayes 2007-09-25

Founded on the paradox that all things are poisons and the difference between poison and remedy is quantity, the determination of safe dosage forms the base and focus of modern toxicology. In order to make a sound determination there must be a working knowledge of the biologic mechanisms involved and of the methods employed to define these mechanisms. While the vastness of the field and the rapid accumulation of data may preclude the possibility of absorbing and retaining more than a fraction of the available information, a solid understanding of the underlying principles is essential. Extensively revised and updated with four new chapters and an expanded glossary, this fifth edition of the classic text, Principles and Methods of Toxicology provides comprehensive coverage in a manageable and accessible format. New topics include 'toxicoponomics', plant and animal poisons, information resources, and non-animal testing alternatives. Emphasizing the cornerstones of toxicology—people differ, dose matters, and things change, the book begins with a review of the history of toxicology and followed by an explanation of basic toxicological principles, agents that cause toxicity, target organ toxicity, and toxicological testing methods including many of the test protocols required to meet regulatory needs worldwide. The book examines each method or procedure from the standpoint of technique and interpretation of data and discusses problems and pitfalls that may be associated with each. The addition of several new authors allow for a broader and more diverse treatment of the ever-changing and expanding field of toxicology. Maintaining the high-quality information and organizational framework that made the previous editions so successful, Principles and Methods of Toxicology, Fifth Edition continues to be a valuable resource for the advanced practitioner as well as the new disciple of toxicology.

Imaging Atlas of Human Anatomy E-Book - Jonathan D. Spratt 2010-03-02

Imaging Atlas of Human Anatomy, 4th Edition provides a solid foundation for understanding human anatomy. Jamie Weir, Peter Abrahams, Jonathan D. Spratt, and Lonie Salkowski offer a complete and 3-dimensional view of the structures and relationships within the body through a variety of imaging modalities. Over 60% new images—showing cross-sectional views in CT and MRI, nuclear medicine imaging, and more—along with revised legends and labels ensure that you have the best and most up-to-date visual resource. This atlas will widen your applied and clinical knowledge of human anatomy. Features orientation drawings that support your understanding of different views and orientations in images with tables of ossification dates for bone development. Presents the images with number labeling to keep them clean and help with self-testing. Features completely revised legends and labels and over 60% new images—cross-sectional views in CT and MRI, angiography, ultrasound, fetal anatomy, plain film anatomy, nuclear medicine imaging, and more—with better resolution for the most current anatomical views. Reflects current radiological and anatomical practice through reorganized chapters on the abdomen and pelvis, including a new chapter on cross-sectional imaging. Covers a variety of common and up-to-date modern imaging—including a completely new section on Nuclear Medicine—for a view of living anatomical structures that enhance your artwork and dissection-based comprehension. Includes stills of 3-D images to provide a visual understanding of moving images.

The Eye - John V. Forrester 2015-06-01

The Eye: Basic Sciences in Practice provides highly accessible, concise coverage of all the essential basic science required by today's ophthalmologists and optometrists in training. It is also essential reading for those embarking on a career in visual and ophthalmic science, as well as an invaluable, current refresher for the range of practitioners working in this area. This new fourth edition has now been fully revised and updated in line with current curricula, key research developments and clinical best practice. It succinctly incorporates the massive strides being made by genetics and functional genomics based on the Human Genome Project, the new understanding of how the microbiome affects all aspects of immunology, the remarkable progress in imaging technology now applied to anatomy and neurophysiology, as well as exciting new molecular and other diagnostic methodologies now being used in microbiology and pathology. All this and more collectively brings a wealth of new knowledge to students and practitioners in the fields of ophthalmology and visual science. For the first time, this (print) edition also now comes with bonus access to the complete, fully searchable electronic text - including carefully selected additional information and new video content to further explain and expand on key concepts - making The Eye a more flexible, comprehensive and engaging learning package than ever before. The only all-embracing textbook of basic science suitable for trainee ophthalmologists, optometrists and vision scientists - other books concentrate on the individual areas such as anatomy. Attractive page design with clear, colour diagrams and text boxes make this a much more accessible book to learn from than many postgraduate textbooks. Presents in a readable form an account of all the basic sciences necessary for an understanding of the eye - anatomy, embryology, genetics, biochemistry, physiology, pharmacology, immunology, microbiology and infection and pathology. More on molecular pathology. Thorough updating of the sections on pathology, immunology, pharmacology and immunology. Revision of all other chapters. More colour illustrations Comes with complete electronic version

Current Techniques in Small Animal Surgery, Fifth Edition - M. Joseph Bojrab 2014-10-24

Current Techniques in Small Animal Surgery, Fifth Edition provides current information regarding surgical techniques from the perspective of clinicians who are performing specific procedures on a regular basis. It is intended to be concise, well illustrated, and reflective of the writer's experience, both good and bad. The emphasis with this volume is technique. The pathophysiologic principles and applications are covered in the companion volume, Mechanisms of Disease in Small Animal Surgery, Third Edition. These two books are regarded by most practitioners and students as being a two-volume set.

Place, Setting, Perspective - Eleanor Andrews 2014-09-26

Place, Setting, Perspective examines the films of the Italian filmmaker, Nanni Moretti, from a fresh viewpoint, employing the increasingly significant research area of space within a filmic text. The book is conceived with the awareness that space cannot be studied only in aesthetic or narrative terms: social, political, and cultural aspects of narrated spaces are equally important if a thorough appraisal is to be achieved of an oeuvre such as Moretti's, which is profoundly associated with socio-political commentary and analysis. After an exploration of various existing frameworks of narrative space in film, the book offers a particular definition of the term based on the notions of Place, Setting, and Perspective. Place relates to the physical aspect of narrative space and specifically involves cityscapes, landscapes, interiors, and exteriors in the real world. Setting concerns genre characteristics of narrative space, notably its differentiated use in melodrama, detective stories, fantasy narratives, and gender based scenarios. Perspective encompasses the point of view taken optically by the camera which supports the standpoint of Moretti's personal philosophy expressed through the aesthetic aspects which he employs to create narrative space. The study is based on a close textual analysis of Moretti's eleven major feature films to date, using the formal film language of mise-en-scène, cinematography, editing, and sound. The aim is to

show how Moretti selects, organizes, constructs, assembles, and manipulates the many elements of narrative space into an entire work of art, to enable meanings and pleasures for the spectator.

"Textual History and Editing Principles" provides an overview of the textual controversies and ambiguities perpetually surrounding Heart of Darkness. - Background and source materials on colonialism and the Congo, nineteenth-century attitudes toward race, Conrad in the Congo, and Conrad on art and literature. - Fifteen illustrations. - Seven contemporary responses to the novella along with eighteen essays in criticism—ten of them new to the Fifth Edition, including an entirely new subsection on film adaptations of Heart of Darkness. - A Chronology and an updated Selected Bibliography.

Surgical Technology for the Surgical Technologist - Association of Surgical Technologists 2001
Surgical technology educators and students previously had no choice but to rely on textbooks written for OR nurses that often contained too little information on the role of the surgical technologist and not enough of the subtle observations and nuances that come from years in the field. Until now. Surgical Technology for the Surgical Technologist is the first text for surgical technology students and faculty that is precise, focused and helpful. Information is presented in a thorough and consistent manner that encourages student learning of both the information and the process. The writers' 50 years of expertise in the field give Surgical Technology for the Surgical Technologist a depth not found in other texts.(KEYWORDS: Surgical Technology, technologist, OR, Nurses, operating)

Sith, Slayers, Stargates & Cyborgs - John R. Perlich 2008

The beginning of the twenty-first century has already seen its fair share of modern myths with heroes such as Spider-Man, Superman, and Harry Potter. The authors in this volume deconstruct, discuss, engage, and interrogate the mythologies of the new millennium in science fiction fantasy texts. Using literary and rhetorical criticism - paired with philosophy, cultural studies, media arts, psychology, and communication studies - they illustrate the function, value, and role of new mythologies, and show that the universal appeal of these texts is their mythic power, drawing upon archetypes of the past which resonate with individuals and throughout culture. In this way they demonstrate how mythology is timeless and eternal.

Challenging Misrepresentations of Black Womanhood - Marquita M. Gammage 2019-03-22

'Challenging Misrepresentations of Black Womanhood' investigates the stereotyping of Black womanhood and the larger sociological impact on Black women's self-perceptions. It details the historical and contemporary use of stereotypes against Black women and how Black women work to challenge and dispel false perceptions, and highlights the role of racist ideas in the reproduction and promotion of stereotypes of Black femaleness in media, literature, artificial intelligence and the perceptions of the general public.

Contributors in this collection identify the racists and sexist ideologies behind the misperceptions of Black womanhood and illuminate twenty-first-century stereotypical treatment of Black women such as Michelle Obama and Serena Williams, and explore topics such as comedic expressions of Black motherhood, representations of Black women in television dramas and literature, and identity reclamation and self-determination. The five sections of the book provide a brief historical overall of the long-standing use of stereotypes used against Black women; explore the systematic attack on Black motherhood and how Black mothers use self-determination to thrive; investigate treatments of Black womanhood in media, television

and literature; examine the political impact of stereotyped frameworks used for deconstructing Black female public figures; and discuss self-affirmation and identity reclamation among African women.

'Challenging Misrepresentations of Black Womanhood' establishes the criteria with which to examine the role of stereotypes in the lives of Black females and, more specifically, its impact on their social and psychological well-being.
