China's Digital Nationalism - Florian Schneider 2018-08-16

Nationalism, in China as much as elsewhere, is today adopted, filtered, transformed, enhanced, and accelerated through digital networks. And as we have increasingly seen, nationalism in digital spheres interacts in complicated ways with nationalism "on the ground". If we are to understand the social and political complexities of the twenty-first century, we need to ask: what happens to nationalism when it goes digital? In *China's Digital Nationalism*, Florian Schneider explores the issue by looking at digital China first hand, exploring what search engines, online encyclopedias, websites, hyperlink networks, and social media can tell us about the way that different actors construct and manage a crucial topic in contemporary Chinese politics: the protracted historical relationship with neighbouring Japan. Using two cases, the infamous Nanjing Massacre of 1937 and the ongoing disputes over islands in the East China Sea, Schneider shows how various stakeholders in China construct networks and deploy power to shape nationalism for their own ends. These dynamics provide crucial lessons on how nation states adapt to the shifting terrain of the digital age and highlight how digital nationalism is today an emergent property of complex communication networks.

Partner to the Poor - Paul Farmer 2010

"Dr. Paul Farmer is one of the most extraordinary people I've ever known. *Partner to the Poor* recounts his relentless efforts to eradicate disease, humanize health care, alleviate poverty, and increase opportunity and empowerment in the developing world. It will inspire us all to do our parts."--William J. Clinton "If the world is curious about Paul Farmer, there is a reason for that. No one has done more than he has in bringing modern medicine to the poor across the globe and no one has exceeded him in making us appreciate the diverse barriers that prevent proper medicine from reaching the underdogs of the world. In this wonderful collection of essays, putting together Paul Farmer's writings

over more than two decades, we can see how his far-reaching ideas have developed and radically enhanced the understanding of the challenges faced by healthcare in the uneven world in which we live. This is an altogether outstanding book."--Amartya Sen, Nobel Laureate, Economics "To delve into these pages is to join one of the world's great explorers on an epic life journey--to grapple with culture, poverty, disease, health care, ethics, and ultimately our common humanity in the Age of AIDS. Paul Farmer is a pioneer, guide, and inspiration at a time of unprecedented contrasts: between wealth and poverty, power and powerlessness, health and disease, compassion and neglect. His medical expertise, anthropological vision, and unflinching decency have helped to recharge our world with moral purpose."--Jeffrey D. Sachs, Columbia University "Wow! Perfect for teaching. This is more than vintage Farmer. Editor Haun Saussy knows Farmer's work inside out and has assembled and organized 25 classic articles that project the heart of Farmer's brilliant, radical, inspiring, eminently practical and (dare I say) genuinely subversive work."--Philippe Bourgois, author of Righteous Dopefiend "If they gave Nobel Prizes for raising moral awareness, Paul Farmer would have won his a long time ago. For several decades now, his work has posed a challenge to anyone who dares say that radically improving the health of the world's poor can't be done. This splendid compilation of the best of his work allows us to follow a restless, creative, compassionate mind in action, in and out of prisons and barrios and mud huts and hospital wards, from Haiti to Rwanda to Moscow, never taking 'no' for an answer."--Adam Hochschild, author of Bury the Chains "Paul Farmer is a deep scholar of Haitian society, a formidable medical anthropologist, an implacable theorist of structural violence and health as a human right, and an ethicist for whom the place of social justice in medicine and in the world is an existential need. This book is the platform of interconnected intellectual, academic, and practical engagements upon which the amazing, world-transforming life of Farmer stands."--Arthur Kleinman, author of What Really Matters: Living a Moral Life amidst Uncertainty and Danger "This collection shows the impressive catalytic effects of original scholarship when combined with action, activism, and a

commitment to social justice in health. Paul Farmer and his PIH colleagues have twice changed World Health Organization policies; they continue to have a lasting impact on the global health movement and on the lives of the poor."--Peter Brown, Emory University
