The Anti-Pirate Potato Cannon : And 101 Other Things for Young Mariners to Build, Try, and Do on the Water - David Seidman 2010-05-10

Spark a passion for sailing and the outdoors in your child From the Moonbeam Children's Book Awards bronze medal winner! Ever since humankind began seafaring, boats and shoreline adventures have produced sturdy, independent, creative, self-reliant kids. From the author of the bestselling Complete Sailor and proud father of a boy mariner, here is the book for all parents who want to introduce their kids to the world of boats, boating, sailing, the shore, and the sea. It provides dozens of adventures and activities for kids, and a plethora of projects for you and your kids to do together. Topics range from how-to to fanciful, in random organization so that each excursion into the book turns up unrelated gems on facing pages. The Anti-Pirate Potato Cannon encourages your kid to get outdoors and on the water, to build things, to try things, to cultivate their curiosity, to learn self-reliance, and to get a giant dose of the magic of seaside adventure. Loaded with things for kids to do--build a rope ladder; build a Huck Finn raft from PVC pipe; catch and fillet a fish; go crabbing; skip a stone; body surf; waterski on bare feet; chart a cove; learn the great sea battles; build a sandcastle; navigate; win a sailboat race; paddle a sea kayak; and a whole lot more. The Complete Sailor - David Seidman 1995-03

The Complete Sailor takes the reader from the first sail to a mastery of small-boat handling. Weaving his writing around 600 drawings by noted marine illustrator Kelly Mulford, David Seidman has created a book in which each double-page spread invites the eye and communicates volumes of information. The Complete Sailor goes beyond other learn-to-sail books to cover navigation, boat design, and seamanship.

Encyclopedic in scope yet warm in style, it conveys the magic as well as the techniques of sailing. Among the other topics covered: anchoring, ropework, rigging, weather, fog, squalls, currents and tides, rules of the road, trailering, and working the winds. The book is a gentle introduction for those just starting out, and a guide to new horizons for those who already sail.

The Future of the Internet--And How to Stop It - Jonathan Zittrain 2008-10-01

This extraordinary book explains the engine that has catapulted the Internet from backwater to ubiquity—and reveals that it is sputtering precisely because of its runaway success. With the unwitting help of its users, the generative Internet is on a path to a lockdown, ending its cycle of innovation—and facilitating unsettling new kinds of control. iPods, iPhones, Xboxes, and TiVos represent the first wave of Internet-centered products that can't be easily modified by anyone except their vendors or selected partners. These “tethered appliances” have already been used in remarkable but little-known ways: car GPS systems have been reconfigured at the demand of law enforcement to eavesdrop on the occupants at all times, and digital video recorders have been ordered to self-destruct thanks to a lawsuit against the manufacturer thousands of miles away. New Web 2.0 platforms like Google mash-ups and Facebook are rightly touted—but their applications can be similarly monitored and eliminated from a central source. As tethered appliances and applications eclipse the PC, the very nature of the Internet—its “generativity,” or innovative character—is at risk. The Internet's current trajectory is one of lost opportunity. Its salvation, Zittrain argues, lies in the hands of its millions of users. Drawing on generative technologies like Wikipedia that have so far survived their own successes, this book shows how to develop new technologies and social structures that allow users to work creatively and collaboratively, participate in solutions, and become true “netizens.”

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Unclean Lips - Josh Lambert 2014

Winner of the 2014 Jordan Schnitzer Book Award presented by the Association for Jewish Studies Jews have

played an integral role in the history of obscenity in America. For most of the 20th century, Jewish entrepreneurs and editors led the charge against obscenity laws. Jewish lawyers battled literary censorship even when their non-Jewish counterparts refused to do so, and they won court decisions in favor of texts including *Ulysses*, *A Howl*, *Lady Chatterley's Lover*, and *Tropic of Cancer*. Jewish literary critics have provided some of the most influential courtroom testimony on behalf of freedom of expression. The anti-Semitic stereotype of the lascivious Jew has made many historians hesitant to draw a direct link between Jewishness and obscenity. In *Unclean Lips*, Josh Lambert addresses the Jewishness of participants in obscenity controversies in the U.S. directly, exploring the transformative roles played by a host of neglected figures in the development of modern and postmodern American culture. The diversity of American Jewry means that there is no single explanation for Jews' interventions in this field. Rejecting generalizations, this book offers case studies that pair cultural histories with close readings of both contested texts and trial transcripts to reveal the ways in which specific engagements with obscenity mattered to particular American Jews at discrete historical moments. Reading American culture from Theodore Dreiser and Henry Miller to *Curb Your Enthusiasm* and *FCC v. Fox*, *Unclean Lips* analyzes the variable historical and cultural factors that account for the central role Jews have played in the struggles over obscenity and censorship in the modern United States.

Cutters Don't Cry - Christine Dzidrums 2016-06-10

19-year-old Charity Graff engages in self-harm. More specifically she cuts herself to numb emotions. In a series of raw journal entries, the confused teenager writes to her estranged father, filling him in on what's happened in her life since he left her nearly 18 years ago. Throughout the course of her letter writing, Charity chronicles her penchant for cutting, a serious struggle with depression and her inability to vocally express her feelings.

[The Complete Rigger's Apprentice: Tools and Techniques for Modern and Traditional Rigging](#) - Brion Toss 1997-08-22

Combining and updating the renowned *Rigger's Apprentice* and *Rigger's Locker*, meets the changing face of modern materials and technology while remaining true to rigging's best traditional principles and practices. It's much more than a knot book, though the knots a sailor needs are all here. It's a book for sailors who want the satisfaction and hard-cash savings of stepping their own masts, inspecting and maintaining their own rigs, and turning their own tailsplines and wire eyesplines. It is for boatowners who want to replace an entire gang of rigging themselves--measuring, choosing appropriate wire, turning soft eyes, leathering, and serving. It is for bluewater voyagers who want to feel secure in the knowledge that, should a shroud carry away far at sea, they will be able to repair it. *The Complete Rigger's Apprentice* is also a free-roaming collection of useful ideas and tips on everything from supplementing winches with block and tackle, to rigging snubbers at anchor, to using pantyhose for an emergency fanbelt. In short, it's the definitive book on the art of rigging, written by its most entertaining practitioner.

To be at Home - James Williams 2018-09-24

Houses and homes are dynamic spaces within which people work to organize and secure their lives, livelihoods and relationships. Written by a team of renowned historians and anthropologists, and accompanied by original photography by Maurice Weiss, *To Be at Home: House, Work, and Self in the Modern World* compares the ways people in different societies and historical periods strive to make and keep houses and homes under conditions of change, upheaval, displacement, impoverishment and violence. These conditions speak to the challenges of life in our modern world. The contributors of this volume position the home as a new nodal point between work, the self and the world to explore people's creativity, agency and labour. Houses and homes prove complex and powerful concepts - if also often elusive - invoking places, persons, objects, emotions, values, attachments and fantasies. This book demonstrates how the relations between houses, work and the self have transformed dramatically and unpredictably under conditions of capitalism and modernity - and continue to change today.

Walking with Giants - Sindiso Mfenyana 2017

The autobiography has as its primary focus political history, in particular the history of the ANC in South Africa and in exile. The author records in a refreshingly straightforward way how he and his peers experienced life in South Africa in the 1950's. His politicization in Cradock through such events as the 1952

Defiance Campaign and later at the University of Fort Hare give the background for his recruitment into the ANC underground. A true non-racialist with a broad view of the world, he reflects a generation of South Africans who were educated in the East European socialist countries. He was widely read and knowledgeable about global affairs; he understood the politics of most African countries and hoped to contribute to the building of a new South Africa.

Music and Levels of Narration in Film - Guido Heldt 2013-05-01

Music and Levels of Narration in Film is the first book-length study to synthesize scholarly contributions toward a narrative theory of film music. Moving beyond the distinction between diegetic and nondiegetic music - or music that is not understood as part of a film's 'story world' - Guido Heldt systematically discusses music at different levels of narration, from the extrafictional to 'focalizations' of subjectivity. Heldt then applies this conceptual toolkit to study the narrative strategies of music in individual films, as well as genres, including musicals and horror films. The resulting volume will be an indispensable resource for anyone researching or studying film music or film narratology. A PDF version of this book is available for free in open access via the OAPEN Library platform. Armed Conflict and Environment - Detlef Briesen 2018-11-05

Erstmals werden die vielfältigen Wechselwirkungen zwischen bewaffneten Konflikten und den menschlichen und natürlichen Umwelten zugleich geschichts- und sozialwissenschaftlich analysiert. Haben die meisten bisherigen Forschungen dieses Thema vor allem mit Blick auf Umweltzerstörungen durch Kriegshandlungen oder durch Aufrüstung schon in Friedenszeiten behandelt, so geht diese Veröffentlichung einen Schritt weiter. Daher wird der historische Wandel dieser komplexen Wechselbeziehung an konkreten Beispielen sichtbar gemacht: vom Zweiten Weltkrieg in Europa und Asien über den klassischen Stellvertreterkrieg in Vietnam bis zu den aktuellen asymmetrischen Kriegen in Südasien. Dabei stehen zugleich systematische Fragestellungen im Mittelpunkt: Wie beeinflussen Umwelten bewaffnete Konflikte? Wie verändern Kriege Umwelten? Und wie entstehen komplette "Kriegslandschaften" (warscapes), in denen Krieg und Militarisierung die Beziehungen zwischen Menschen und Umwelten nachhaltig verändern. Mit Beiträgen von Detlef Briesen, Anthony Goreau-Ponceaud, David Pickus, Sarada Prasanna Das, Nguyen Thi Hanh, Nguyen Thi Thuy Hang, Dao Duc Thuan/Nguyen Van Ngoc, Tim Kaiser, Dam Thi Phuong Thuy/Nguyen Van Bac, Brigitte Sébastia, Manish Tiwari, Babu Rangaiah/Kumaresan Raja, Martin Dinges.

How To Watch Television - Ethan Thompson 2013-09-16

Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

Cultures of Participation - Hajo Greif 2011

From a variety of theoretical, empirical and methodological perspectives, this volume explores participation in different social realms - from everyday life, interpersonal relationships, work and leisure activities to collective and political action.

Algorithmic Cultures - Robert Seyfert 2016-10-04

This book provides in-depth and wide-ranging analyses of the emergence, and subsequent ubiquity, of algorithms in diverse realms of social life. The plurality of Algorithmic Cultures emphasizes: 1) algorithms' increasing importance in the formation of new epistemic and organizational paradigms; and 2) the multifaceted analyses of algorithms across an increasing number of research fields. The authors in this volume address the complex interrelations between social groups and algorithms in the construction of meaning and social interaction. The contributors highlight the performative dimensions of algorithms by exposing the dynamic processes through which algorithms - themselves the product of a specific approach to the world - frame reality, while at the same time organizing how people think about society. With contributions from leading experts from Media Studies, Social Studies of Science and Technology, Cultural and Media Sociology from Canada, France, Germany, UK and the USA, this volume presents cutting edge empirical and conceptual research that includes case studies on social media platforms, gaming, financial trading and mobile security infrastructures.

The Gendered Brain - Gina Rippon 2020-02-13

Barbie or Lego? Reading maps or reading emotions? Do you have a female brain or a male brain? Or is that the wrong question? On a daily basis we face deeply ingrained beliefs that our sex determines our skills and preferences, from toys and colours to career choice and salaries. But what does this mean for our thoughts, decisions and behaviour? Using the latest cutting-edge neuroscience, Gina Rippon unpacks the stereotypes that bombard us from our earliest moments and shows how these messages mould our ideas of ourselves and even shape our brains. Rigorous, timely and liberating, *The Gendered Brain* has huge repercussions for women and men, for parents and children, and for how we identify ourselves. 'Highly accessible... Revolutionary to a glorious degree' Observer

An Introduction to Criminological Theory - Roger Hopkins Burke 2018-11-01

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action,

desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including 'the myth of the crime drop', the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those studying criminology and taking courses on theoretical criminology, understanding crime, and crime and deviance

Taxing Choice - William Shughart II 2018-04-24

Taxing behavior deemed "politically incorrect" has long been a convenient way for politicians to fund programs benefiting special interest groups, to the public's disadvantage. Government policy toward various goods - drugs, tobacco and alcohol, for example - has been locked into a regulatory cycle of tax and taboo. Support for legalizing other substances is buttressed by the revenue-generating power of so-called "sin" taxes. And the products subjected to excise taxation have varied from soft drinks, fishing gear and margarine to airline tickets, telephone calls and gasoline. *Taxing Choice* thoroughly addresses the costs and benefits of these predatory public policies. Shughart notes that the record of such punitive selective taxation has been anything but successful, hindering economic progress and failing to deliver the promised social benefits. In addition, the costs of selective taxes fall disproportionately on lower-income people, while more politically powerful interest groups benefit. At the same time, such policies are a poor way to raise funding for public services, and foster political corruption and self-serving bureaucracies accountable to no one. Indeed, policies discriminating against certain products may represent ominous trends easily extended into virtually every facet of people's lives. One can envision policies proscribing foods, sun bathing, obesity, and even books, films, and political and religious beliefs deemed "dangerous." Part I is devoted to the political economy of selective taxation. Contributors trace the history and politics of selective excise taxes in the United States, discussing the range of products that have been subject to such taxation from the founding period to the present. Part II explains how these taxes emerge in a political marketplace with opposing pressure groups scrambling for wealth transfers in their own favor. Part III looks at taxes on specific products as well as such banning policies as Prohibition and the war on drugs. Constitutional, economic, and civil liberty issues, including civil asset forfeiture and product liability, are discussed in Part IV. With the accelerating national debate over tax reform and the downsizing of government, *Taxing Choice* is a timely and far-reaching contribution to a debate of great interest to economists, policymakers, historians, sociologists, and taxpayers in general.

Honey Badger Don't Care - Randall 2012-01-24

Never before has wildlife narration been this bold and this hilarious. More than 40 million people have viewed Randall's honey badger video, "The Crazy Nastyass Honey Badger." "It has no regard for anyone or anything—it just takes what it wants! What a little badass!" When viewing wildlife footage, who hasn't thought at times, "Ewww! What the hell is that?!" Randall thinks it — and says so! In *Honey Badger Don't Care*, Randall examines and humorously informs on a dozen crazy, nasty animals of the wild kingdom employing his unique style of telling it like it is! His wildlife writing is refreshingly honest. If an animal

scares Randall, he's not afraid to share. Unlike most nature writers, Randall doesn't deliver the sugarcoated or drab description. He "goes there" and shares his true feelings with his audience. Because of this, his readers feel that they can relate. Randall loves animals—even the ones that terrify him. He may not agree with how these animals conduct themselves in the world, but Randall wants everyone to know who they are. Just as he introduced the world to the honey badger, the Jesus lizard, and others, so will Randall shed light on twelve bizarre and interesting animals. Designed with callouts, sidebars, and more than fifty photos, *Honey Badger Don't Care* presents a wildlife book for adults—hilarious, irreverent, profane, yet charming, chatty, and informative. Don't be stupid—buy this book!

A Gravity's Rainbow Companion - Steven C. Weisenburger 2011-03-15

Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's indispensable guide to Thomas Pynchon's *Gravity's Rainbow*. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of *Gravity's Rainbow*--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal American editions of *Gravity's Rainbow*: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty "Great Books of the Twentieth Century."
