Sitting Pretty - Rebekah Taussig 2020-08-25

A memoir-in-essays from disability advocate and creator of the Instagram account @sitting_pretty Rebekah Taussig, processing a lifetime of memories to paint a beautiful, nuanced portrait of a body that looks and moves differently than most. Growing up as a paralyzed girl during the 90s and early 2000s, Rebekah Taussig only saw disability depicted as something monstrous (The Hunchback of Notre Dame), inspirational (Helen Keller), or angelic (Forrest Gump). None of this felt right; and as she got older, she longed for more stories that allowed disability to be complex and ordinary, uncomfortable and fine, painful and fulfilling. Writing about the rhythms and textures of what it means to live in a body that doesn't fit, Rebekah reflects on everything from the complications of kindness and charity, living both independently and dependently, experiencing intimacy, and how the pervasiveness of ableism in our everyday media directly translates to everyday life. Disability affects all of us, directly or indirectly, at one point or another. By exploring this truth in poignant and lyrical essays, Taussig illustrates the need for more stories and more voices to understand the diversity of humanity. *Sitting Pretty* challenges us as a society to be patient and vigilant, practical and imaginative, kind and relentless, as we set to work to write an entirely different story.

Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, *College Essay Essentials* is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

Industrial Engineering - George Worthington 1952-07

A History of the Electron - Jaume Navarro 2012-09-06

Two landmarks in the history of physics are the discovery of the particulate nature of cathode rays (the electron) by J. J. Thomson in 1897 and the experimental demonstration by his son G. P. Thomson in 1927 that the electron exhibits the properties of a wave. Together, the Thomsons are two of the most significant figures in modern physics, both winning Nobel prizes for their work. This book presents the intellectual biographies of the father-and-son physicists, shedding new light on their combined understanding of the nature of electrons and, by extension, of the continuous nature of matter. It is the first text to explore J. J. Thomson's early and later work, as well as the role he played in G. P. Thomson's education as a physicist and how he reacted to his son's discovery of electron diffraction. This fresh perspective will interest academics and graduate students working in the history of early twentieth-century physics.

Surviving the College Admissions Madness - Kevin Robert Martin 2021-06-08

Unconventional. Irreverent. Brutal. Entertaining. Unlike any book written about higher education, *Surviving the College Admissions Madness* is a complete takedown of a deeply flawed and thoroughly broken system. Kevin Robert Martin argues that elite universities do not care about their applicants. He observes that college admissions is highly undemocratic and dehumanizing. University bureaucracies alienate applicants from their humanity and sense of self. Reading essay advice books might help you get in, but they won't help you stay sane. Surviving and even thriving depend on digging deep into your beliefs and understanding your behaviors within the broader context of society. This isn't another Admissions 101 "how-to to write a killer essay" book or a promise of "six easy steps" for Ivy League acceptance. Martin provides helpful advice for avoiding application mistakes, building a reasonable college list, minimizing debt, identifying cognitive errors and distortions, and helping applicants reframe their college applications. This book equips readers with the vocabulary, frameworks, and tools to make sense of America's broken higher education system, starting with the admissions gatekeepers. *Admissions Madness* is the first of its kind to integrate applicant psychology with the sociology and economics of higher education. Martin observes that a system of bad incentives in education and society wastes hundreds of millions of hours each admissions cycle. It produces profound suffering for tens of thousands of students each year. He writes for families and high school educators who want a deeper understanding of the truth. Elite college admissions undermines students whether they're privileged or marginalized, rich or poor, black or white, rural or urban, first-time freshman or transfer, and domestic or international. Almost everyone loses, even those who get into their dream schools. Elite universities are neither accountable to nor transparent with the public. Early Decision policies and aggressive recruitment and questionable enrollment management practices monopolize universities' leverage over families' well-being. Power disparities between universities and families explain why the admissions process is so stressful and exasperating. Waitlists, appeals, and deferrals keep students in limbo. Endless essay requirements, recommendations, and interviews benefit the

university while wasting applicants' time and making them lose sleep and their sanity. Holistic review corrupts students' interests and high school learning environments. Students and families rarely realize that the system doesn't have to be this way. Application numbers skyrocket while first-year student class sizes remain the same despite COVID-19 virtual learning disruptions. Elite universities claim to care about diversity and college access, yet they are hypocrites. Admission by holistic review has noble origins in the civil rights movement, but nowadays, it serves as a tool for oppression. Holistic review is arbitrary,

capricious, and prone to error and bias. Martin proposes admission by partial lottery as one reform among many. American meritocracy is a myth. Rather than vehicles for upward mobility, elite universities squeeze out the middle class and contribute to wealth inequality. Universities prioritize generating revenue over a genuine commitment to diversity and access. Understanding these and other inconvenient truths will help students and families survive the college admissions madness.
