Buttress's World Guide to Abbreviations of Organizations - Jean C. Swinbank 2012-12-06

This edition of over 60 000 entries, including significantly more than 20% new or revised material, not only updates its predecessor but also continues the policy of extending coverage to areas dealt with only sparsely in previous editions. Special attention has been paid to the Far East, Australasia and Latin America in general, and to the People's Republic of China in particular. The cross-referencing between a defunct organization and its successor (indicated by ex and now) introduced into the last edition, has been extended. Otherwise the policies adopted in previous editions have been retained. All kinds of organizations are included - international, national, governmental, individual, large or small - but strictly local organizations have been omitted. The subject scope includes

activities of all kinds, in the fields of commerce and industry, education, law, politics, public administration, religion, recreation, medicine, science and technology. The country of origin of a national organization is given in brackets, unless it is the home country of the title language or can be deduced readily from the title itself. Acronyms of parent bodies of subsidiary organizations are also added in brackets. Equivalences are used to link acronyms in different languages for the same organization. A select bibliography guides the reader to specialist works providing more detailed information.

Microbiologia degli alimenti - James M. Jay 2009-03-27

Questo volume rappresenta la versione italiana dell'ultima edizione di uno dei testi più autorevoli e completi sulla microbiologia degli alimenti - Modern Food Microbiology - già

tradotto in varie lingue, tra le quali cinese e hindi. La trattazione introduce i fattori intrinseci ed estrinseci che influenzano la crescita microbica negli alimenti e quindi approfondisce il ruolo e la rilevanza dei diversi microrganismi prendendo in esame le principali categorie di prodotti alimentari, compresi quelli di quarta gamma e pronti al consumo. Una parte del volume è specificamente dedicata alle tecniche di ricerca dei microrganismi e dei loro metaboliti, dalle metodiche tradizionali a quelle più avanzate. I diversi aspetti e le problematiche della conservazione degli alimenti sono trattati in relazione alle tecniche disponibili e ai fattori e alle forme di resistenza dei diversi gruppi microbici. Sono inoltre approfonditi i temi della valutazione e dell'analisi del rischio e degli indicatori di qualità e di sicurezza in tutte le fasi della produzione alimentare. Conclude il volume un'esaustiva rassegna delle principali malattie trasmesse da alimenti, dei patogeni responsabili e delle misure di controllo e prevenzione.

Tomatoes, 2nd Edition - Ep Heuvelink

2018-08-01

This new edition of a successful, practical book provides a comprehensive and accessible overview of all aspects of the production of the tomato crop, within the context of the global tomato industry. Tomatoes are one of the most important horticultural crops in both temperate and tropical regions and this book explores our current knowledge of the scientific principles underlying their biology and production.

Tomatoes 2nd Edition covers genetics and breeding, developmental processes, crop growth

and yield, fruit ripening and quality, irrigation and fertilisation, crop protection, production in the open field, greenhouse production, and postharvest biology and handling. It has been updated to reflect advances in the field, such as developments in molecular plant breeding, crop and product physiology, and production systems. It includes a new chapter on organic tomato production and presents photos in full colour throughout. Authored by an international team of experts, this book is essential for growers, extension workers, industry personnel, and horticulture students and lecturers.

The European Court of Justice and External Relations Law - Marise Cremona 2014-09-25

This edited collection appraises the role, self-perception, reasoning and impact of the European Court of Justice on the development of European Union (EU) external relations law. Against the background of the recent recasting of the EU Treaties by the Treaty of Lisbon and at a time when questions arise over the character of the Court's judicial reasoning and the effect of international legal obligations in its case law, it discusses the contribution of the Court to the formation of the EU as an international actor and the development of EU external relations law, and the constitutional challenges the Court faces in this context. To what extent does the position of the Court contribute to a specific conception of the EU? How does the EU's constitutional order, as interpreted by the Court, shape its external relations? The Court still has only limited jurisdiction over the EU's Common Foreign and Security Policy: why has this

decision been taken, and what are its implications? And what is the Court's own view of the relationship between court(s) and foreign policy, and of its own relationship with other international courts? The contributions to this volume show that the Court's influence over EU external relations derives first from its ability to shape and define the external competence of the EU and resulting constraints on the Member States, and second from its insistence on the autonomy of the EU legal order and its role as 'gatekeeper' to the entry and effect of international law into the EU system. It has not - in the external domain - overtly exerted influence through shaping substantive policy, as it has, for example, in relation to the internal market. Nevertheless the rather 'legalised' nature of EU external relations and the significance of the EU's international legal commitments mean that the role of the Court of Justice is more central than that of a national court with respect to the foreign policy of a

nation state. And of course its decisions can nonetheless be highly political.

World Guide to Abbreviations of Organizations - F. A. Buttress 2012-12-06

This edition of well over 50,000 entries not only updates its predecessor but considerably increases the coverage of Latin America and Eastern Europe. I have been aided in this work by two colleagues at Glasgow University Library, Dr Lloyd Davies and Barbara MacMillan, and in general revision by Kate Richard. Close on 20% of the text has been altered. The equivalences, introduced into the last edition, linking acronyms in different languages for the same organization, have been extended. New to this edition is the cross-referencing between a

defunct organization and its successor. Otherwise the policies adopted in previous editions have been retained: strictly local organizations are omitted, but the subject scope includes activities of all kinds; the country of origin of a national organization is given in brackets, unless it is the home country of the title language or can be readily deduced from the title itself. Acronyms of parent bodies of subsidiary organizations are also added in brackets. A select bibliography guides the reader to specialist works providing more detailed information. Particularly at a time of such widespread political change affecting organizational structures in so many countries, it is impossible to ensure complete up-to-date accuracy in a work of this kind. Readers are earnestly invited to inform me of any errors and omissions for attention in a later edition of this work. H. H. Bibliography Acronyms, Initialisms and Abbreviations Dictionary. 13th edn. Buttress's World Guide to Abbreviations of Organizations - L. Pitman 2012-12-06

The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is

broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all Subjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support. L. M. Pitman Bibliography Adams, R. (ed.)
