Beyond the HIPAA Privacy Rule - Institute of Medicine 2009-03-24

In the realm of health care, privacy protections are needed to preserve patients' dignity and prevent possible harms. Ten years ago, to address these concerns as well as set guidelines for ethical health research, Congress called for a set of federal standards now known as the HIPAA Privacy Rule. In its 2009 report, *Beyond the HIPAA Privacy Rule: Enhancing Privacy, Improving Health Through Research*, the Institute of Medicine's Committee on Health Research and the Privacy of Health Information concludes that the HIPAA Privacy Rule does not protect privacy as well as it should, and that it impedes important health research.

Fundamental Questions - Ulla Weber 2021-05-11

Mit "Fundamental Questions" legt die Max-Planck-Gesellschaft zum ersten Mal einen Sammelband zur Geschlechterforschung vor. Dank des breiten Spektrums der in der Forschungsgesellschaft vertretenen Fachrichtungen und Fachkulturen präsentieren die aus verschiedenen Instituten stammenden

AutorInnen Erkenntnisse aus zahlreichen Forschungsfeldern: Recht, Kunstgeschichte, Wissenschaftsgeschichte, Neurowissenschaften und Informatik. Ebenso vielgestaltig sind die Ansätze, Themen, Fragestellungen und Methodik der versammelten Beiträge. Diese Vielfalt zeigt in bester Art und Weise, dass die Integration der Geschlechterperspektive nicht nur für angewandte Wissenschaft und Entwicklung, sondern ebenso für die Grundlagenforschung gewinnbringend ist. Mit Beiträgen von Dr. Laura A. Bechthold, Elifcan Celebi, Dr. Marina Chugunova, Dr. Luisa Stella de Oliveira Coutinho Silva, Svenja Friess, Ph.D. Giorgia Gastaldon, Dr. Lisa Hanstein, Dr. Philine Helas, Prof. Karin Hoisl, Ph.D. Michael E. Rose, Esra Sarioglu, Isabel Valera und Dr. Ulla Weber. *Social Change and Modernity - Hans Haferkamp 1992*

A Key to the Treasure of the Hakīm - J. Christoph Bürgel 2011

Includes thirteen essays by eminent scholars in the field of Persian Studies, each focusing on different aspects of the Khamsa, which is a collection of five long poems written by the Persian poet Nizami of Ganja. Nizami (1141-1209) lived and worked in Ganja in present-day Azerbaijan.

Fecal Incontinence - Carlo Ratto 2007-06-08

Fecal incontinence is a common and embarrassing condition with a devastating impact on patients' lives. Since it may result from a variety of pathophysiological situations, an accurate diagnostic work-up is crucial. A range of therapies is available, but choosing the correct option is pivotal to successful management. This book reviews the latest advances in the epidemiologic, socio-economic, psychological, diagnostic, and therapeutic aspects of fecal incontinence, helping to establish effective treatment guidelines.

A survey of the state of human freedom around the world investigates such crucial indicators as the status of civil and political liberties and provides individual country reports

Advances in Safety, Reliability and Risk

Management - Christophe Berenguer 2011-08-31

Advances in Safety, Reliability and Risk

Management contains the papers presented at the 20th European Safety and Reliability (ESREL 2011) annual conference in Troyes, France, in September 2011. The book covers a wide range of topics, including: Accident and Incident Investigation; Bayesian methods; Crisis and Emergency Management; Decision Making
The Diversity of Sacred Lands in Europe - J. -M. Mallarach 2012

The Delos Initiative focuses on the sacred natural sites in developed countries throughout the world (such as Australia, Canada, the European countries, Japan, New Zealand and the United States of America). Its main purpose is to help in maintaining both the sanctity and the biodiversity of these sites, through the understanding of the complex relationship between spiritual/cultural and natural values.

Dialogue Interpreting - Ian Mason 2014-04-23

Dialogue interpreting includes what is variously referred to in English as Community, Public Service, Liaison, Ad Hoc or Bilateral Interpreting - the defining characteristic being interpreter-

mediated communication in spontaneous face-to-face interaction. Included under this heading are all kinds of professional encounters: police, immigration and welfare services interviews, doctor-patient interviews, business negotiations, political interviews, lawyer-client and courtroom interpreting and so on. Whereas research into conference interpreting is now well established, the investigation of dialogue interpreting as a professional activity is still in its infancy, despite some highly promising publications in recent years. This special issue of *The Translator*, guest-edited by one of the leading scholars in translation studies, provides a forum for bringing together separate strands within this developing field and should create an impetus for further research. Viewing the interpreter as a gatekeeper, coordinator and negotiator of meanings within a three-way interaction, the descriptive studies included in this volume focus on issues such as role-conflict, in-group loyalties, participation status, relevance and the negotiation of face, thus linking the observation of interpreting practice to pragmatic constraints such as power, distance and face-threat and to semiotic constraints such as genres and discourses as socio-textual practices of particular cultural communities.

Vital Signs - Institute of Medicine 2015-08-26

Thousands of measures are in use today to assess health and health care in the United States. Although many of these measures provide useful information, their usefulness in either gauging or guiding performance improvement in health and health care is seriously limited by their sheer number, as well as their lack of consistency, compatibility, reliability, focus, and organization. To achieve better health at lower cost, all stakeholders - including health professionals, payers, policy makers, and members of the public - must be alert to what matters most. What are the core measures that will yield the clearest understanding and focus on better health and well-being for Americans? *Vital Signs* explores the most important issues - healthier people, better quality care, affordable care, and engaged individuals and communities - and specifies a streamlined set of 15 core measures. These measures, if standardized and applied at national, state, local, and institutional levels across the country, will transform the effectiveness, efficiency, and burden of health measurement and help accelerate focus and progress on our highest health priorities. *Vital Signs* also describes the leadership and activities necessary to refine, apply, maintain, and revise the measures over time, as well as how they can improve the focus and utility of measures outside the core set. If health care is to become more effective and more efficient, sharper attention is required on the elements most important to health and health care. *Vital Signs* lays the groundwork for the adoption of core measures that, if systematically applied, will yield better health at a lower cost for all Americans.

COVID-19 and Higher Education in the Global Context - Ravichandran Ammigan 2020-10-01

COVID-19 and Higher Education in the Global Context: Exploring Contemporary Issues and Challenges addresses the lasting impact of the novel coronavirus (COVID-19) in the higher education sector and offers insights that inform

policy and practice. Framed in a global context, this timely book captures a wide variety of topics, including student mobility, global partnerships and collaboration, student health and wellbeing, enrollment management, employability, and graduate education. It is designed to serve as a resource for scholar-practitioners, policymakers, and university administrators as they reimagine their work of comparative and international higher education in times of crisis. The collection of chapters assembled in this volume calls for a critical reflection on the opportunities and challenges that have emerged as a result of the global pandemic and provides as a basis for how tertiary education systems around the world can learn from past experiences and shared viewpoints as institutions recalibrate operations, innovate programs, and manage change on their respective campuses.

FreeBSD Handbook - FreeBSD Documentation Project 2000

The *FreeBSD Handbook* is a comprehensive FreeBSD tutorial and reference. It covers installation, day-to-day use of FreeBSD, and much more, such as the Ports collection, creating a custom kernel, security topics, the X Window System, how to use FreeBSD's Linux binary compatibility, and how to upgrade your system from source using the 'make world' command, to name a few.

Railway Track Allocation - Thomas Schlechte 2012-03

This thesis is about mathematical optimization for the efficient use of railway infrastructure. We address the optimal allocation of the available railway track capacity - the track allocation problem. This track allocation problem is a major challenge for a railway company, independent of whether a free market, a private monopoly, or a public monopoly is given. Planning and operating railway transportation systems is extremely hard due to the combinatorial complexity of the underlying discrete optimization problems, the technical intricacies, and the immense sizes of the problem instances. Mathematical models and optimization techniques can result in huge gains for both railway customers and operators, e.g., in terms of cost reductions or service quality improvements. We tackle this challenge by

developing novel mathematical models and associated innovative algorithmic solution methods for large scale instances. This allows us to produce for the first time reliable solutions for a real world instance, i.e., the Simplon corridor in Switzerland.

Four Centuries of Italian-American History - Giovanni Ermenegildo Schiavo 1992

A review of the state of the art in the field of Italian migration studies. The 27 papers are organized under five headings: Italian identity and ethnicity in North America; Italian immigrants in Latin America; the Italian diaspora--similarities and differences; Italians and Italian-Americans--past legacy and future prospects; and documenting Italian immigration. Most of the papers grew out of presentations made at the Columbus People Symposium, held at NYU in May 1992. Nine are original essays prepared especially for this volume. American Psychiatric Association Practice Guidelines - American Psychiatric Association 1996

The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other

medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Plato's Styles and Characters - Gabriele Cornelli 2015-11-27

The significance of Plato's literary style to the content of his ideas is perhaps one of the central problems in the study of Plato and Ancient Philosophy as a whole. As Samuel Scolnicov points out in this collection, many other philosophers have employed literary techniques to express their ideas, just as many literary authors have exemplified philosophical ideas in their narratives, but for no other philosopher does the mode of expression play such a vital role in their thought as it does for Plato. And yet, even after two thousand years there is still no consensus about why Plato expresses his ideas in this distinctive style. Selected from the first Latin American Area meeting of the International Plato Society (www.platosociety.org) in Brazil in 2012, the following collection of essays presents some of the most recent scholarship from around the world on the wide range of issues related to Plato's dialogue form. The essays can be divided into three categories. The first addresses general questions concerning Plato's literary style. The second concerns the relation of his style to other genres and traditions in Ancient Greece. And the third examines Plato's characters and his purpose in using them.

Towards a New Standard - Massimo Cerruti 2017-01-11

In many European languages the National Standard Variety is converging with spoken, informal, and socially marked varieties. In Italian this process is giving rise to a new standard variety called Neo-standard Italian, which partly consists of regional features. This book contributes to current research on standardization in Europe by offering a comprehensive overview of the re-

standardization dynamics in Italian. Each chapter investigates a specific dynamic shaping the emergence of Neo-standard Italian and Regional Standard Varieties, such as the acceptance of previously non-standard features, the reception of Old Italian features excluded from the standard variety, the changing standard language ideology, the retention of features from Italo-Romance dialects, the standardization of patterns borrowed from English, and the developmental tendencies of standard Italian in Switzerland. The contributions investigate phonetic/phonological, prosodic, morphosyntactic, and lexical phenomena, addressed by several empirical methodologies and theoretical vantage points. This work is of interest to scholars and students working on language variation and change, especially those focusing on standard languages and standardization dynamics.

Freedom in the World 1997-1998 - Roger Kaplan 1998-04

The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year. Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union

movement, academics and journalists. During the past year. Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow. Parental Alienation, DSM-5, and ICD-11 - William Bernet 2010

Parental alienation is an important phenomenon that mental health professionals should know about and thoroughly understand, especially those who work with children, adolescents, divorced adults, and adults whose parents divorced when they were children. In this book, the authors define parental alienation as a mental condition in which a child - usually one whose parents are engaged in a high- conflict divorce - allies himself or herself strongly with one parent (the preferred parent) and rejects a relationship with the other parent (the alienated parent) without legitimate justification. This process leads to a tragic outcome when the child and the alienated parent, who previously had a loving and mutually satisfying relationship, lose the nurture and joy of that relationship for many years and perhaps for their lifetimes. We estimate that 1 percent of children and adolescents in the U.S. experience parental alienation. When the phenomenon is properly recognized, this condition is preventable and treatable in many instances. The authors of this book believe that parental alienation is not simply a minor aberration in the life of a family, but a serious mental condition. Because of the false belief that the alienated parent is a dangerous or unworthy person, the child loses one of the most important relationships in his or her life. This book contains much information about the validity, reliability, and prevalence of parental alienation. It also includes a comprehensive international bibliography

regarding parental alienation with more than 600 citations. In order to bring life to the definitions and the technical writing, several short clinical vignettes have been included. These vignettes are based on actual families and real events, but have been modified to protect the privacy of both the parents and children.

The History of the Popes - Leopold von Ranke 1889

FreeBSD Handbook - Murray Stokely 2001

Atlas of Regional Anatomy of the Brain Using MRI - Jean C. Tamraz 2006-02-08

A unique review of the essential topographical anatomy of the brain from an MRI perspective, correlating high-quality anatomical plates with high-resolution MRI images. The book includes a historical review of brain mapping and an analysis of the essential reference planes used. It provides a detailed review of the sulcal and the gyral anatomy of the human cortex, guiding readers through an interpretation of the individual brain atlas provided by high-resolution MRI. The relationship between brain structure and function is approached in a topographical fashion with an analysis of the necessary imaging methodology and displayed anatomy. An extensive coronal atlas rounds off the book.

Printing and Publishing Chinese Religion and Philosophy in the Dutch Republic, 1595-1700 - Trude Dijkstra 2021

"Trude Dijkstra discusses how Chinese religion and philosophy were represented in printed works produced in the Dutch Republic between 1595 and 1700. By focusing on books, newspapers, learned journals, and pamphlets, this study sheds new light on the cultural encounter between China and western Europe in the early modern period. Form, content, and material-technical aspects of different media in Dutch and French are analysed, providing new insights into the ways in which readers could take note of Chinese religion and philosophy. This study thereby demonstrates that there was no singular image of Chinese religion and philosophy, but rather a varied array of notions on the subject"--

Friendship and Social Interaction - Valerian J. Derlega 2012-12-06

A neglected topic in the field of personal relationships has been the study of friendships. Social psychologists have studied how and why individuals are attracted to one another and the processes of interaction during initial encounters, but they have not paid much attention to ongoing friendships. A major goal of the present volume is to develop theories and integrate research on the development and maintenance of friendships. Another major goal is to build bridges between social psychologists and other social scientists by presenting an interdisciplinary approach. Although a majority of the contributors are social psychologists, other authors include sociologists as well as developmental, personality, and clinical psychologists. The chapters also present research on friendship based on a wide range of research methodologies, including laboratory research as well as longitudinal, naturalistic, and clinical studies. Hence, the book incorporates a variety of conceptual and methodological approaches that should contribute to a cross-fertilization of ideas among disciplines. The first chapter, by Barbara A. Winstead and Valerian J. Derlega, provides an overview of theory and research on friendship. The second chapter, by Daniel Perlman and Beverley Fehr, provides a summary and conceptual critique of social psychological theories of social attraction that are relevant to the study of friendship. Adopting a developmental approach, Duane Buhrmester and Wyndol Furman, in Chapter 3, demonstrate the particular importance of friendship during middle childhood and adolescence in fulfilling interpersonal needs.

Intersection and Interchange Design - National Research Council (U.S.). Transportation Research Board 1993

Violence at Work - Duncan Chappell 2006
Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in

three sections: understanding violence at work; responding to violence at work; future action.

Review of the Environmental Protection Agency's Draft IRIS Assessment of Formaldehyde

- National Research Council

2011-05-31

Formaldehyde is ubiquitous in indoor and outdoor air, and everyone is exposed to formaldehyde at some concentration daily. Formaldehyde is used to produce a wide array of products, particularly building materials; it is emitted from many sources, including power plants, cars, gas and wood stoves, and cigarettes; it is a natural product in some foods; and it is naturally present in the human body as a metabolic intermediate. Much research has been conducted on the health effects of exposure to formaldehyde, including effects on the upper airway, where formaldehyde is deposited when inhaled, and effects on tissues distant from the site of initial contact. The U.S. Environmental Protection Agency (EPA) released noncancer and cancer assessments of formaldehyde for its Integrated Risk Information System (IRIS) in 1990 and 1991, respectively. The agency began reassessing formaldehyde in 1998 and released a draft IRIS assessment in June 2010. Given the complexity of the issues and the knowledge that the assessment will be used as the basis of regulatory decisions, EPA asked the National Research Council (NRC) to conduct an independent scientific review of the draft IRIS assessment. In this report, the Committee to Review EPA's Draft IRIS Assessment of Formaldehyde first addresses some general issues associated with the draft IRIS assessment. The committee next focuses on questions concerning specific aspects of the draft assessment, including derivation of the reference concentrations and the cancer unit risk estimates for formaldehyde. The committee closes with recommendations for improving the IRIS assessment of formaldehyde and provides some general comments on the IRIS development process.

Guiding Principles: The Spirit of Our Traditions

- Fellowship of Narcotics Anonymous
2019-08-30

The NA Twelve Traditions are a set of guiding principles for working together. This book tools, text, and questions meant to facilitate discussion and inspire action in our groups, in workshops, and in sponsorship. It is a collection of experience and ideas on how to work through issues together, using the principles embodied in the Traditions.

On Diary - Philippe Lejeune 2009-04-30

On Diary is the second collection in English of the groundbreaking and profoundly influential work of one of the best-known and provocative theorists of autobiography and diary. Ranging from the diary's historical origins to its pervasive presence on the Internet, from the spiritual journey of the sixteenth century to the diary of Anne Frank, and from the materials and methods of diary writing to the question of how diaries end, these essays display Philippe Lejeune's expertise, eloquence, passion, and humor as a commentator on the functions, practices, and significance of keeping or reading a diary. Lejeune is a leading European critic and theorist of diary and autobiography. His landmark essay, "The Autobiographical Pact," has shaped life writing studies for more than thirty years, and his many books and essays have repeatedly opened up new vistas for scholarship. As Michael Riffaterre notes, "Lejeune's work on autobiography is the most original, powerful, effective approach to a difficult subject. . . . His style is very personal, lively. It grabs the reader as scholarship rarely does. Lejeune's erudition and methodology are impeccable." Two substantial introductory essays by Jeremy Popkin and Julie Rak place Lejeune's work within its critical and theoretical traditions and comment on his central importance within the fields of life writing, literary genetic studies, and cultural studies.

The Autobiography of St. Anthony Mary Claret

- St. Anthony Mary Claret
Bares the soul of a saint and reveals the methods which were so successful for him in converting others. From age 5 he was haunted by the thought of the souls about to fall into Hell. This insight fueled his powerful drive to save as many souls as he could.
