Too Much Free Speech? -

Randall P. Bezanson

2012-10-15

In *Too Much Free Speech?*,

Randall P. Bezanson takes up an essential and timely inquiry

into the Constitutional limits of the Supreme Court's power to create, interpret, and enforce one of the essential rights of American citizens. Analyzing contemporary Supreme Court decisions from the past fifteen years, Bezanson argues that judicial interpretations have fundamentally and drastically expanded the meaning and understanding of "speech." Bezanson focuses on judgments such as the much-discussed *Citizens United* case, which granted the full measure of constitutional protection to speech by corporations, and the *Doe vs. Reed* case in Washington state, which recognized the signing of petitions and voting in elections as acts of free speech. In each case study, he questions whether the meaning of speech has been expanded too far and critically assesses the Supreme Court's methodology in reaching and explaining its expansive conclusions. Bezanson's measured approach and deep insights reveal the complexities of speech in the realms of

human behavior and constitutional law. His wide-ranging analysis of relevant Supreme Court cases arms readers with the facts and perspectives necessary to reach independent conclusions about whether the Court's conduct befitted the independent judicial branch and to understand the consequences of its decisions for a representative democracy.

Daemon in the Sanctuary - Wendy C. Hamblet 2013

"Daemon in the Sanctuary" explores the uncanny contradiction between the phenomenological experience of home as a site of nurture and security and the empirical reality that people are far more likely to be hurt and even killed in their own homes by their intimates, rather than at the hands of strangers. Moving from the syrupy tributes of the god of love in Plato's "Symposium" to the subject of domestic violence appears to be a giant leap, but the author shows that embroidered romantic ideas about love prepare the initiate poorly for the reality of intimate connection. Poets and philosophers who lead us to believe that love is heaven sent can leave us craving an extreme experience. We crave an earth-shaking, life-altering intrusion on our tranquility as evidence that love is real. Thus the naive initiate can easily mistake the flutter of the pulse, the quickening of the heart rate, the flush, the confused emotions, and the painful longing as signs of the god's

gift. But these are also the signs of fear! Wendy C. Hamblet, a philosopher in the phenomenological lineage, examines the truth value of phenomenological experience, through the lens of the problem of intimate violence. If Husserl is right and phenomenological method provides the ground of all empirical truth, then what is to be made of the fundamental contradiction between the lived experience of home as a site of nurture and security and of intimates as guardians and caretakers, and the empirical fact, evident in every human society, that people are far more likely to be harmed, and even killed, in their homes or in the homes of their intimates and at the hands of those charged with their care? Hamblet carefully choreographs a dance between the two opposing 'truths' to expose how the lived sense of home, colored by ideals, can tint people's expectations about intimate connection and cloud their ability to recognize the signs of intimate abuse. This book illuminates the

dangers and pitfalls of unhealthy intimacy and offers a regimen for loosening the grip of a sickened love's pathological hold.

Designing and Evaluating Usable Technology in Industrial Research - Clare-Marie Karat 2010

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin

the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to

be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research *Design and Prototyping for Drupal* - Dani Nordin 2011-12-15 "Learn strategies for sketching, wireframing, and designing effective layouts; Break down a

Raising Children in Love, Justice and Truth - Barry Long 1998

Barry Long's approach to parenting includes not only love for the child, but practical ways of bringing truth and justice into the family. He explains that what children also need from parents is the example of an honest and responsible life. To introduce truth, teach the child to observe the fact of the world. To introduce justice, ask of the child only what you are prepared to do yourself. He also has radical things to say about the development of the personality and the

encouragement of imagination. The book is compiled from conversations with parents, so it is possible to understand Barry Long's approach in the actual circumstances of the many families who shared their problems with him. Their experience gives readers a complete picture of the benefit that harmony in the home brings to the next generation.

His head tilted, looking down at me. His eyes found my bare ass, submissively up in the air. A growl rumbled from him as he fell onto me... Don't you dare dismiss me as another gay college dude with a drug problem. That's all true, but it's not all I am. I didn't have it hard growing up, but I made some bad decisions. Those lead to more bad decisions, and one day I get a phone call that makes everything else seem insignificant. My Dad had died, and I had no way to cope with that. So I fled to the secluded family cabin in the woods, where I hoped to find some

kind of closure. Instead I found two handsome trespassers, and I thought the weekend might take a more interesting turn. Some crazy shit went down, and I found myself treating one of the trespassers for gunshot wounds, but somehow his wounds had healed. He opened his eyes, golden and terrifying. Downie 2011-05-25
On the English Channel Island of Guernsey, Detective Inspector Ed Moretti and his new partner, Liz Falla, investigate vicious attacks on Epicure Films. The international production company is shooting a movie based on British bad-boy author Gilbert Ensor's bestselling novel about an Italian aristocratic family at the end of the Second World War, using fortifications from the German occupation of Guernsey as locations, and the manor house belonging to the expatriate Vannonis. When vandalism escalates into murder, Moretti must resist the attractions of Ensor's glamorous American wife, Sydney, consolidate his working relationship with Falla, and establish whether the murders on Guernsey go beyond the island. Why is the Marchesa Vannoni in Guernsey? What is the significance of the design that appears on the daggers used as murder weapons, as well as on the Vannoni family crest? And

what role does the marchesas statuesque niece, Giulia, who runs the family business and is probably bisexual, really play?

Electrical Codes, Standards, Recommended Practices and Regulations - Robert J. Alonzo 2009-12-21

Electrical codes, standards, recommended practices and regulations can be complex subjects, yet are essential in both electrical design and life safety issues. This book demystifies their usage. It is a handbook of codes, standards, recommended practices and regulations in the United States involving electrical safety and design. Many engineers and electrical safety professionals may not be aware of all of those documents and their applicability. This book identifies those documents by category, allowing the ready and easy access to the relevant requirements. Because these documents may be updated on a regular basis, this book was

written so that its information is not reliant on the latest edition or release of those codes, standards, recommended practices or regulations. No single document on the market today attempts to not only list the majority of relevant electrical design and safety codes, standards, recommended practices and regulations, but also explain their use and updating cycles. This book, one-stop-information-center for electrical engineers, electrical safety professionals, and designers, does. Covers the codes, standards, recommended practices and regulations in the United States involving electrical safety and design, providing a comprehensive reference for engineers and electrical safety professionals Documents are identified by category, enabling easy access to the relevant requirements Not version-specific; information is not reliant on the latest edition or release of the codes, standards, recommended practices or regulations

Analyzing the Music of Living

Composers (and Others) - Jack Boss 2014-07-24

Analyzing the Music of Living Composers (and Others) is a collection of essays that grew out of the 2010 annual meeting of the West Coast Conference of Music Theory and Analysis. The stated purpose was to apply traditional music-analytic techniques, as well as new, innovative techniques, to describing the music of composers of the late 20th and early 21st centuries. The goal was to take steps toward making the music of our time a bit less impenetrable for our colleagues, students and other listeners by showing how it follows, varies, and sometimes controverts the organizational schemes of older music. This collection includes chapters analyzing music of older eras as well, including a number that throw light on the analysis of recent music in unexpected ways, and there are also several chapters that propose innovative analytic approaches to recent popular music and jazz.
