Left of Bang - Patrick Van Horne 2014-06-19

"At a time when we must adapt to the changing character of conflict, this is a serious book on a serious issue that can give us the edge we need." —General James Mattis, USMC, Ret. "Left of Bang offers a crisp lesson in survival in which Van Horne and Riley affirm a compelling truth: It's better to detect sinister intentions early than respond to violent actions late. Left of Bang helps readers avoid the bang." —Gavin de Becker, bestselling author of *The Gift of Fear* "Rare is the book that is immediately practical and interesting. Left of Bang accomplishes this from start to finish. There is something here for everyone in the people business and we are all in the people business." —Joe Navarro, bestselling author of *What Every BODY is Saying*. "Left of Bang is a highly important and innovative book that offers a substantial contribution to answering the challenge of Fourth Generation war (4GW)." —William S. Lind, author of *Maneuver Warfare Handbook* "Like Sun Tzu's *The Art of War*, Left of Bang isn't just for the military. It's a must read for anyone who has ever had a gut feeling that something's not quite right...be it walking down the street, sitting in a corporate boardroom, or even entering an empty home." --Steven Pressfield, bestselling author of *The Lion's Gate*, *The Warrior Ethos* and *Gates of Fire* "An amazing book! Applying the lessons learned during the longest war in American history, and building on seminal works like *The Gift of Fear* and *On Combat*, this book provides a framework of knowledge that will bring military, law enforcement, and individual citizens to new

levels of survival mindset and performance in life-and-death situations. Left of Bang is an instant classic." --Lt. Colonel Dave Grossman, U.S. Army Ret., author of *On Combat* and *On Killing* -- You walk into a restaurant and get an immediate sense that you should leave. -- You are about to step onto an elevator with a stranger and something stops you. -- You interview a potential new employee who has the resume to do the job, but something tells you not to offer a position. These scenarios all represent LEFT OF BANG, the moments before something bad happens. But how many times have you talked yourself out of leaving the restaurant, getting off the elevator, or getting over your silly "gut" feeling about someone? Is there a way to not just listen to your inner protector more, but to actually increase your sensitivity to threats before they happen? Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps' Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear, LEFT OF BANG is the result.

*Stainless Steels for Design Engineers* - Michael F. McGuire 2008

The rate of growth of stainless steel has outpaced that of other metals and alloys, and by 2010 may surpass aluminum as the second most widely used metal after carbon steel. The 2007 world production of stainless steel was approximately 30,000,000 tons and has nearly doubled in the last ten years. This growth is occurring at the same time that the production of stainless steel continues to become more consolidated. One result of this is a more widespread need to understand stainless steel with fewer resources to provide that information. The concurrent technical evolution in stainless steel and increasing volatility of raw material prices has made it more important for the engineers and designers who use stainless steel to make sound technical judgments about which stainless steels to use and how to use them.

*Safeguarding the Euro in Times of Crisis* - 2019

This book tells the inside story of those who played key roles in setting up the organisations and combatting the crisis. In exclusive interviews, global financial leaders and ESM insiders provide a rich stock of perspectives and anecdotes that bring to life the urgency of the crisis as well as the innovative solutions found to resolve it. The European Stability Mechanism and its temporary predecessor the EFSF provided billions of euros in loans to five hard-hit euro area countries during the European financial and sovereign debt crisis of the early 2000s, helping to safeguard the stability of those countries and the euro area as a whole. Initially, the crisis-torn euro area was ill-equipped institutionally, but the rapid establishment of the firewalls, the assistance programmes, deep-seated country reforms, the strengthening of European institutions, and extraordinary European Central Bank measures shielded Europe from a euro area break-up. With the

EFSF/ESM set-up, its managers aspired to create a new, more entrepreneurial international financial institution, one that is agile enough to respond quickly to new challenges, while still ensuring the strict governance befitting an organisation pursuing a public mission. The euro area has emerged from near disaster in more robust shape. As Europe strives to further strengthen its architecture in preparation for any possible future crises, it is important to reflect upon how the euro area reinvigorated its fortunes and draw the relevant lessons for future crisis management in Europe and beyond.

*Frontiers of Political Economy* - Guglielmo Carchedi 1991

Transcending the arid formalism of present-day economic theory, *Frontiers of Political Economy* develops a new and accessible perspective on the world economy. Guglielmo Carchedi identifies and analyses three key features of modern capitalism: the rapidly increasing share of human labour needed for the advancement of science and technology rather than for the production of goods; the global, rather than national, nature of production, distribution and consumption; and the dominance of the oligopolies. This analysis enables Carchedi to explore new theoretical frontiers: from an original theory of mental and material labour to an investigation of the conditions under which mental labour produces value; from an assessment of the class structure of modern capitalism to an appraisal of the social content of science and technology; from an alternative account of crises, inflation and stagflation to a study of their relation to the destruction of value

and to arms production. He also cast fresh light on a number of basic contemporary issues--including the present financial and monetary crisis--and surveys the most important recent controversies in language accessible to non-specialists. Rigorous and wide-ranging, but written with great lucidity, *Frontiers of Political Economy* is an essential book for both specialists and students in economics and politics.

**Early History of Cosmic Ray Studies** - Yataro Sekido 2012-12-06

On the occasion of the International Conference on Cosmic Rays held in Kyoto in August 1979 five aged members of the cosmic ray fraternity, H. Elliot, V. L. Ginzburg, B. Peters, Y. Sekido, and J. A. Simpson met together as a dinner party devoted to the enjoyment of Japanese cuisine and reminiscences of our younger days. This pleasant occasion called to of our own age as well as some eminent seniors not present at the mind the many friends conference whose

recollections would have further enriched and enlivened our evening. By the time the dinner came to an end we had agreed that the compilation of a more extensive collection of personal reminiscences would be an interesting and worthwhile undertaking. Accordingly, the next day we held an editorial meeting to draw up a list of potential authors and two of us, the present editors, started work on the project. In putting the book together our intention has been to try to capture and record through these personal accounts something of the atmosphere, the excitement and the frustrations of research in cosmic rays as experienced at first hand by some of the practitioners in the field. It has never been our intention that it should comprise a systematic history of the subject. Neither, unfortunately, can it be a fully representative collection since practical limits to the size of the volume alone would preclude that.
