Hybrid Ecologies - Susanne Witzgall 2022-02-19

A new approach to the notion of ecology emphasizing its relevance for art and design. The notion of ecology not only figures centrally in current debates around climate change, but also traverses contemporary discourses in the arts, the humanities, and the social and techno sciences. In this present form, ecology refers to the multilayered and multidimensional nexus of living processes and technological and media practices--that is, to the complex relations of human and nonhuman agents. Hybrid Ecologies understands ecology as an ambivalent notion, whose very broadness simultaneously opens up new fields of action and raises provocative questions, not least concerning its genealogy. This interdisciplinary volume explores the political and social effects of rethinking

community in ecological terms, with a particular emphasis on what the contemporary notion of ecology might mean for artistic and design practices. The result of the fifth annual program of the cx centre for interdisciplinary studies, which was conceived in cooperation with the Chair of Philosophy | Aesthetic Theory at the Academy of Fine Arts in Munich, Hybrid Ecologies is a timely and thought-provoking study of one of the most important themes of our time.

The Innovation Navigator - Tucker J Marion 2018-11-23
Innovation is a top strategic priority for firms across all industries. In The Innovation Navigator, Tucker J. Marion and Sebastian K. Fixson explore four innovation archetypes or modes □ "specialist," "venture," "community," and "network" □ which feature prominently in the expanding innovation landscape. Specialists employ technologies to achieve entirely new solutions and superior product performance. New corporate ventures lower the barriers for employees to self-select into entrepreneurial projects, while reducing the constraints of bureaucracy. The community brings new sources of knowledge by expanding past the firm's boundaries, dramatically increasing the number of participants. The network creates partnerships and ecosystems that create innovations that could not be

developed by individual companies alone. The Innovation Navigator guides the reader in exploring and exploiting these different modes of innovation. Individual chapters provide key insights into the inherent opportunities and challenges from a number of vantage points: from the impact on organizational resources to the role of incentives. The book also provides a framework for how firms can leverage dynamic mode shifts and multimode strategies. Firms across the industrial spectrum are profiled, from new additive manufacturing companies such as Formlabs, community-based solution providers like Forth, to traditional firms exploring new modes like GE Appliances and their FirstBuild initiative. The Innovation Navigator will assist executives in building the capabilities for peak performance in this new innovation landscape.

. . . And His Lovely Wife - Connie Schultz 2008-05-13
Writing with warmth and humor, Connie Schultz reveals the rigors, joys, and absolute madness of a new marriage at midlife and campaigning with her husband, Sherrod Brown,

now the junior senator from Ohio. She describes the chain of events leading up to Sherrod's decision to run for the Senate (he would not enter the fray without his wife's unequivocal support), and her own decision to step down from writing her Pulitzer Prize-winning column during the course of one of the nation's most intensely watched races. She writes about the moment her friends in the press became not so friendly, the constant campaign demands on her marriage and family life, and a personal tragedy that came out of the blue. Schultz also shares insight into the challenges of political life: dealing with audacious bloggers, ruthless adversaries, and political divas; battling expectations of a political wife; and the shock of having staffers young enough to be her children suddenly directing her every move. Connie Schultz is passionate and outspoken about her opinions—in other words, every political consultant's nightmare, and every reader's dream. "[Schultz is] a Pulitzer

Prize—winning journalist with a mordant wit. . . . The [campaign memoir] genre takes on new life.” -The Washington Post Book World “With her characteristic wit and reportorial thoroughness, [Schultz] describes the behind-the-scenes chaos, frustration and excitement of a political campaign and the impact it has on a candidate’s family.”

-Minneapolis Star Tribune “Witty and anecdotal, whether read by a Democrat or a Republican.” -Deseret Morning News “Frank and feisty . . . a spunky tribute to the survival of one woman’s spirit under conditions in which it might have been squelched.” -The Columbus Dispatch

Mastering ArcGIS Pro - Maribeth Hughett Price 2023

"Welcome to Mastering ArcGIS Pro, a detailed primer on learning the latest ArcGIS software by Esri®, Inc. This book is designed to offer everything you need to master the basic elements of GIS. Notice: ArcGIS Pro, ArcGIS, ArcMap, ArcCatalog, ArcGIS Desktop, ArcInfo Workstation, and the other program names used in this text are registered trademarks of Esri, Inc. The

software names and the screen shots used in the text are reproduced by permission. For ease of reading, the symbol has been omitted from the names; however, no infringement or denial of the rights of Esri® is thereby intended or condoned by the author. A new text for a new GIS experience Although the concepts of GIS have remained fairly constant over time, the software is continually evolving. With the release of ArcGIS Pro, the latest software in the Esri GIS family, a new generation of GIS has arrived. ArcGIS Pro has a 64-bit, multithreaded architecture, uses ribbon-style menus, integrates 2D and 3D applications, and is closely tied to ArcGIS Online. This text constitutes a major rewrite of Mastering ArcGIS, a book that covered GIS concepts and skills using the ArcGIS Desktop programs of ArcMap and ArcCatalog. Although the GIS concepts largely remain the same in both texts, the implementation, and in some cases the terminology, has changed. The new software has

also prompted a reorganization of the book in several important ways. First, the book has been refocused on the basics of GIS. The ArcGIS Pro software capabilities are improving with each new version but have not yet completely matched the capabilities of ArcMap. Partly for this reason, and partly to better match the rhythm of a semester, the book is now presented in 12 chapters, leaving time for instructors to better incorporate exams and projects within the semester. Some of the more advanced and less frequently used skills, such as planar topology and standards-based metadata, have been left for students to explore on their own. Second, the book includes some new topics. Raster data management has been discussed in a new chapter to acquaint students with compiling and processing raster data sets, supplementing a similar chapter on vector data management. ArcGIS Pro was designed to foster the sharing of GIS data and

workflows, and these enhanced capabilities are explored in another new chapter, including

how to prepare a database for collecting data using mobile devices"--
