Everyone Brave is Forgiven - Chris Cleave 2016-05-03

The instant New York Times bestseller from Chris Cleave—the unforgettable novel about three lives entangled during World War II, told “with dazzling prose, sharp English wit, and compassion...a powerful portrait of war’s effects on those who fight and those left behind” (People, Book of the Week). London, 1939. The day war is declared, Mary North leaves finishing school unfinished, goes straight to the War Office, and signs up. Tom Shaw decides to ignore the war—until he learns his roommate Alistair Heath has unexpectedly enlisted. Then the conflict can no longer be avoided. Young, bright, and brave, Mary is certain she’d be a marvelous spy. When she is—bewilderingly—made a teacher, she finds herself defying prejudice to protect the children her country would rather forget. Tom, meanwhile, finds that he will do anything for Mary. And when Mary and Alistair meet, it is love, as well as war, that will test them in ways they could not have imagined, entangling three lives in violence and passion, friendship, and deception, inexorably shaping their hopes and dreams. The three are drawn into a tragic love triangle and—as war escalates and bombs begin falling—further into a grim world of survival and desperation. Set in London during the years of 1939-1942, when citizens had slim hope of survival, much less victory; and on the strategic island of Malta, which was daily devastated by the Axis barrage, *Everyone Brave is Forgiven* features little-known history and a perfect wartime love story inspired by the real-life love letters between Chris Cleave’s grandparents. This dazzling novel dares us to understand that, against the great theater of world events, it is the intimate losses, the small battles, the daily human triumphs that change us most.

Human Factors in Paramedic Practice - Gary Rutherford 2020-09-22

Human factors is a scientific discipline which examines the interactions between components of a system, whilst aspiring to improve system performance and human well-being. Paramedics are often the first on scene in emergency and urgent situations, and the quality of care that patients receive is dependent on the performance of the paramedic, often working alone or as part of a small team and frequently in challenging environments. This book is an accessible and informative guide to the concepts of human factors and ergonomics in the field of paramedic practice. It shows how an understanding and application of these principles can improve paramedic performance and well-being, and ultimately patient care. The system components of paramedic practice consist of the patient, the environment, the equipment, the paramedic and their team, the organisation they work in and the wider culture. This book brings together a range of specialist contributors to consider each of these components in detail through chapters which explore situational awareness, human-centred design, the well-being of the paramedic, systems thinking and safety culture among other topics. It aims to provide paramedics with practical advice and the knowledge of human factors that they need to make their first contact with a patient in need as safe and effective as possible for all involved.

Economics Does Not Lie - Guy Sorman 2011-02

In 2005, *The Woman at the Washington Zoo* was published to major critical acclaim. The late

Marjorie Williams possessed "a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy," observed the *New York Times Book Review*. Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves "in his laborious baritone" a bank scandal's blow to his re-pu-taaaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, "tah me to the mast!" Patricia Duff sheds "precipitous tears" over her divorce from Ronald Perelman, resembling afterwards "a garden refreshed by spring rain." Reputation illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

What Every Driver Must Know (Michigan, June 2021) - State of Michigan 2021-09-26

Driving is a privilege and not a right. Drivers must drive responsibly and safely, obey traffic laws, and never drink and drive. Finally, make sure that you and your passengers are properly buckled up - it's the law! Today's vehicles are loaded with technology that was unheard of even a decade ago. Systems that warn when you are drifting from your lane, assist you in parallel parking, automatically brake in emergency situations and provide 360 degrees of vision around the vehicle via a camera are becoming standard, even on moderately priced vehicles. As remarkable as these leaps in automotive technology are, the truth is that the most important safety feature in any vehicle remains you as the driver. Therefore, it is to your benefit to continue improving and expanding your knowledge of traffic laws and safe driving practices. Driving is a privilege. Once you have been issued a driver's license, you have the responsibility to continually demonstrate the skill and knowledge to drive safely. Whether you have been behind the wheel for decades or are just starting to venture out, driving is a discipline that requires judgment, knowledge, physical and mental self-awareness, and practice. "What Every Driver Must Know" is an excellent resource for assisting you on this lifelong journey.
