English for Accounting - Evan Frendo 2008

John Adams's Nixon in China - Professor Timothy A Johnson 2013-01-28

John Adams's opera, Nixon in China, is one of the most frequently performed operas in

the contemporary literature. Timothy A. Johnson illuminates the opera and enhances listeners' and scholars' appreciation for this landmark work. This music-analytical guide presents a detailed, in-depth analysis of the music tied to historical and political

contexts. The opera captures an important moment in history and in international relations, and a close study of it from an interdisciplinary perspective provides fresh, compelling insights about the opera. The music analysis takes a neo-Riemannian approach to harmony and to large-scale harmonic connections. Musical metaphors drawn between harmonies and their dramatic contexts enrich this approach. Motivic analysis reveals interweaving associations between the characters, based on melodic content. Analysis of rhythm and meter focuses on Adams's frequent use of grouping and displacement dissonances to propel the music forward or to illustrate the libretto. The book shows how the historical depiction in the opera is accurate, yet enriched by this operatic adaptation. The language of the opera is true to its source, but more evocative than the words spoken in 1972—due to Alice Goodman's marvelous, poetic libretto. And the music transcends its repetitive shell

to become a hierarchically-rich and musically-compelling achievement.

Screen Translation - Yves Gambier 2016-04-08

There are three fundamental issues in the field of screen translation, namely, the relationship between verbal output and pictures and soundtrack, between a foreign language/culture and the target language/culture, and finally between the spoken code and the written one. All three issues are raised and discussed by contributors to this special issue of *The Translator*. The topics covered include the following: the use of multimodal transcription for the analysis of audiovisual data; the depiction and reception of cultural otherness in Disney animated films produced in the 1990's; the way in which subtitles in Flanders strengthen the already streamlined narratives of mainstream film stories, and how they 'enhance' the characteristics of the films and their underlying ideology; developing a research

methodology for testing the effectiveness of intralingual subtitling for the deaf and hard of hearing; the pragmatic, semiotic and communicative dimensions of puns and plays on words in *The Simpsons*; the reception of translated humour in the Marx Brothers' film *Duck Soup*; and non-professional interpreting in live interviews on breakfast television in Finland. The volume also includes a detailed profile of two postgraduate courses that have been successfully piloted and run at the Universitat Autònoma de Barcelona: the Postgrado de Traducción Audiovisual and the Postgrado de Traducción Audiovisual On-line.

Audiovisual Translation: Subtitling - Jorge Díaz-Cintas
2014-06-03

"Audiovisual Translation: Subtitling" is an introductory textbook which provides a solid overview of the world of subtitling. Based on sound research and first-hand experience in the field, the book focuses on generally accepted practice but identifies

current points of contention, takes regional and medium-bound variants into consideration, and traces new developments that may have an influence on the evolution of the profession. The individual chapters cover the rules of good subtitling practice, the linguistic and semiotic dimensions of subtitling, the professional environment, technical considerations, and key concepts and conventions, providing access to the core skills and knowledge needed to subtitle for television, cinema and DVD. Also included are graded exercises covering core skills. "Audiovisual Translation: Subtitling" can be used by teachers and students as a coursebook for the classroom or for self-learning. It is also aimed at translators and other language professionals wishing to expand their sphere of activity. While the working language of the book is English, an accompanying DVD contains sample film material in Dutch, English, French, Italian and Spanish, as well as a range of dialogue lists and a

key to some of the exercises. The DVD also includes WinCAPS, SysMedia's professional subtitling preparation software package, used for broadcast television around the world and for many of the latest multinational DVD releases of major Hollywood projects.

China's New Consumers -

Elisabeth Croll 2006-09-26

Exploring China's consumer revolution over the past three decades, this book shows a continuing cycle leading to excess supply and disappointing demand, at the centre of which lies exaggerated expectations of China's new consumers. Combining economic trends with the author's anthropological background, China's New Consumers details the livelihoods and lifestyles of China's new and evolving social categories who, divided by wealth, location and generation, have both benefited from and been disadvantaged by the past two decades of reform and rapid economic growth. Given that

consumption is about so much more than shopping and spending, this book focuses on the perceptions, priorities and concerns of China's new consumers which are an essential part of any contemporary narrative about China's domestic market. Documenting the social consequences of several decades of rapid economic growth and the new interest in 'all-round' social development, China's New Consumers will be of value to students, entrepreneurs and a wide variety of readers who are interested in social trends and concerns in China today.

Interaction of Morphology and Syntax - Zygmunt Frajzyngier 2008

The present volume deals with hitherto unexplored issues on

the interaction of morphology and syntax. These selected and invited papers mainly concern Cushitic and Chadic languages, the least-described members of the Afroasiatic family. Three papers in the volume explore one or more typological characteristics across an entire language family or branch, while others focus on one or two languages within a family and the implications of their structures for the family, the phylum, or linguistic typology as a whole. The diversity of topics addressed within the present volume reflects the great diversity of language structures and functions within the Afroasiatic phylum.

In the Sea There are Crocodiles - Fabio Geda
2011-08-09

When ten-year-old Enaiatollah Akbari's small village in Afghanistan falls prey to Taliban rule in early 2000, his mother shepherds the boy across the border into Pakistan but has to leave him there all alone to fend for himself. Thus begins Enaiat's remarkable and often punishing five-year

ordeal, which takes him through Iran, Turkey, and Greece before he seeks political asylum in Italy at the age of fifteen. Along the way, Enaiat endures the crippling physical and emotional agony of dangerous border crossings, trekking across bitterly cold mountain pathways for days on end or being stuffed into the false bottom of a truck. But not everyone is as resourceful, resilient, or lucky as Enaiat, and there are many heart-wrenching casualties along the way. Based on Enaiat's close collaboration with Italian novelist Fabio Geda and expertly rendered in English by an award-winning translator, this novel reconstructs the young boy's memories, perfectly preserving the childlike perspective and rhythms of an intimate oral history. Told with humor and humanity, *In the Sea There Are Crocodiles* brilliantly captures Enaiat's moving and engaging voice and lends urgency to an epic story of hope and survival.

A Winter Walk - Henry David Thoreau 2018-07

A Winter Walk Henry David Thoreau New England transcendentalist Henry David Thoreau's 1843 essay "A Winter Walk" is a loving celebration of winter and walking. Hacking Chinese - Olle Linge
2016-03-26

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them!

Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best

learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every

hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in

Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

The Rise of the Chinese Consumer - Jonathan Garner 2005-11-01

In this book Jonathan Garner and his colleagues at Credit Suisse First Boston, argue that by 2014 the Chinese consumer will likely have displaced the US consumer as the engine of growth in the global economy. Government policy is rebalancing demand within the

Chinese economy from investment spending to consumption spending. Strong trend economic growth over the cycle, a rise in the consumption to GDP ratio and steady exchange rate appreciation will likely generate an 18% compound annual growth rate in the US dollar value of Chinese consumption spending over the next ten years and lead to a quadrupling in China's share of global consumption spending. In order to identify the companies and brands which are best placed to succeed in China's rapidly developing mass consumer market, Garner and his colleagues discuss the results of the first comprehensive survey of consumer attitudes and preferences to have been conducted in China, covering 2,700 persons in eight major Chinese cities. This survey provides valuable data for the business executive or academic seeking detailed local information on sectors including automobiles, beverages, electronic goods,

financial services, food producers, food retail, food services, household & personal care, luxury goods, telecommunication equipment, tobacco, and transport and leisure travel. "China is likely to be the single most important influence on the fortunes of investors and corporates alike over the next five years, and yet little is known of what motivates and drives the Chinese consumer. By canvassing the people that matter and reflect the changing face of this massive country, Jonathan Garner has provided investors with a unique insight." ANNO 2016 IL DNA DEGLI
ITALIANI SECONDA PARTE -
ANTONIO GIANGRANDE

E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta...." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso...." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati,

pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Cognitive Linguistics: Basic Readings - Dirk Geeraerts
2006-01-01

Over the past decade, Cognitive Linguistics has grown to be one of the most broadly appealing and dynamic frameworks for the study of natural language. Essentially, this new school of linguistics focuses on the meaning side of language: linguistic form is analysed as an expression of meaning. And meaning itself is not something that exists in isolation, but it is integrated with the full spectrum of human experience: the fact that we are embodied beings just as much as the fact that we are cultural beings. *Cognitive Linguistics: Basic Readings* brings together twelve foundational articles, each of which introduces one of the basic concepts of Cognitive Linguistics, like conceptual metaphor, image schemas, mental spaces, construction grammar, prototypicality and

radial sets. The collection features the founding fathers of Cognitive Linguistics: George Lakoff, Ron Langacker, Len Talmy, Gilles Fauconnier, and Charles Fillmore, together with some of the most influential younger scholars. By its choice of seminal papers and leading authors, Basic Readings is specifically suited for an introductory course in Cognitive Linguistics. This is further supported by a general introduction to the theory and, specifically, the practice of Cognitive Linguistics and by trajectories for further reading that start out from the individual chapters.

This is the second edition of the Workbook 4, which corresponds to Textbook 4. Each lesson is divided into two parts: 1. Listening and speaking exercises; 2. Reading and writing exercises. Readers are exposed to genuine Chinese materials to improve their integrated skills in listening, speaking, reading and writing. A CD of MP3 file is attached to the book, providing the recording of the listening

This work considers the impact of technology on our command of (foreign) languages, and the effects that our (lack of) linguistic skills have on technology, even though modern communications technology implies multilingualism, yet at the same time paves the way for the development of a "lingua franca". The challenges are not only industrial, political, social

administrative, judicial, ethical; they are also cultural and linguistic. This volume is a collection of essays and the edited results of some of the presentations and debates from two international forums on the subject.
