The Craft of Research, 2nd edition - Wayne C. Booth 2008-04-15

Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of*

Research explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

Fixed Income Securities - Bruce Tuckman
2011-10-13

Fixed income practitioners need to understand the conceptual frameworks of their field; to master its quantitative tool-kit; and to be well-

versed in its cash-flow and pricing conventions. *Fixed Income Securities, Third Edition* by Bruce Tuckman and Angel Serrat is designed to balance these three objectives. The book presents theory without unnecessary abstraction; quantitative techniques with a minimum of mathematics; and conventions at a useful level of detail. The book begins with an overview of global fixed income markets and continues with the fundamentals, namely, arbitrage pricing, interest rates, risk metrics, and term structure models to price contingent claims. Subsequent chapters cover individual markets and securities: repo, rate and bond forwards and futures, interest rate and basis swaps, credit markets, fixed income options, and mortgage-backed securities. *Fixed Income Securities, Third Edition* is full of examples, applications, and case studies. Practically every quantitative concept is illustrated through real market data. This practice-oriented approach makes the book particularly useful for the working professional. This third edition is a considerable revision and expansion of the second. Most examples have been updated. The chapters on fixed income options and mortgage-backed securities have been considerably expanded to include a broader range of securities and valuation methodologies. Also, three new chapters have been added: the global overview of fixed income markets; a chapter on corporate bonds and credit default swaps; and a chapter on discounting with bases, which is the foundation for the relatively recent practice of discounting swap cash flows with curves based on money market rates. [FOR THE UNIVERSITY EDITION] This university edition includes problems which students can use to test and enhance their understanding of the text.

The Resilient Sector - Lester M. Salamon
2003-08-29

The Resilient Sector makes available in an updated form the concise overview of the state of health of America's nonprofit organizations that Johns Hopkins scholar Lester Salamon recently completed as part of the "state of nonprofit America" project he undertook in cooperation with the Aspen Institute. Contrary to popular understanding, Salamon argues, America's nonprofit organizations have shown remarkable resilience in recent years in the face of a variety of difficult challenges, significantly

re-engineering themselves in the process. But this very resilience now poses risks for the sector's continued ability to perform the tasks that we have long expected of it. The Resilient Sector offers nonprofit practitioners, policymakers, the press, and the public at large a lively assessment of this set of institutions that we have long taken for granted, but that the Frenchman Alexis de-Toqueville recognized to be "more deserving of our attention" than almost any other part of the American experiment.

Fixed Income Securities - Pietro Veronesi
2010-01-12

The deep understanding of the forces that affect the valuation, risk and return of fixed income securities and their derivatives has never been so important. As the world of fixed income securities becomes more complex, anybody who studies fixed income securities must be exposed more directly to this complexity. This book provides a thorough discussion of these complex securities, the forces affecting their prices, their risks, and of the appropriate risk management practices. Fixed Income Securities, however, provides a methodology, and not a shopping list. It provides instead examples and methodologies that can be applied quite universally, once the basic concepts have been understood.

Manual of Procedures for Wildlife Disease Risk Analysis - Richard M. Jakob-Hoff 2014

Manual for Facilitators in Non-formal Education Involved in Preparing and Delivering the Programme of Study Sessions at European Youth Centres - Sabine Klöcker
2009-01-01

The aim of the Council of Europe's youth policy is to provide young people - girls and boys, young women and young men - with equal opportunities and experience which will enable them to develop the knowledge, skills and competencies to play a full part in all aspects of society. The programme of activities aims at associating young people, through governmental and non-governmental youth partners, with the aims and priorities of the youth policy of the Council of Europe. The participants in the education and training activities are multipliers who, within their youth organisations or institutions, are involved in training other young people and/or in designing activities and programmes that put into practice the values, standards and objectives that preside over the youth policy of the Council of Europe. The use of non-formal learning principles is combined with experiential learning approaches, the most apt at making the learning experiences meaningful and relevant. Activities are implemented in

accordance with quality standards agreed with partners of and participants in the activities. The quality of these activities depends, to a large extent, on the competences and abilities of the facilitators of these educational processes, many of whom are volunteers within youth and community organisations. This manual was developed in order to support them in that role, particularly when they are part of the educational teams of study sessions at the European Youth Centre. The manual provides essential information and practical tips for all who are involved in planning and delivering non-formal education intercultural activities on an occasional basis. This manual is part of the endeavour of the Council of Europe's youth sector to support and develop the quality of non-formal education activities across Europe and, in doing so, contribute to further their recognition.

At the National Library of Estonia, this group explored how to create and sustain international collaborations to support the preservation of our digital cultural memory. This publication contains a collection of peer-reviewed essays that were developed by conference panels and attendees in the months following ANADP. Rather than simply chronicling the event, the volume intends to broaden and deepen its impact by reflecting on the ANADP presentations and conversations and establishing a set of starting points for building a greater alignment across digital preservation initiatives. Above all, it highlights the need for strategic international collaborations to support the preservation of our collective cultural memory.

Railroads in the Old South - Aaron W. Marrs
2009-03-10

Aaron W. Marrs challenges the accepted understanding of economic and industrial growth in antebellum America with this original study of the history of the railroad in the Old South. Drawing from both familiar and overlooked sources, such as the personal diaries of Southern travelers, papers and letters from civil engineers, corporate records, and

contemporary newspaper accounts, Marrs skillfully expands on the conventional business histories that have characterized scholarship in this field. He situates railroads in the fullness of antebellum life, examining how slavery, technology, labor, social convention, and the environment shaped their evolution. Far from seeing the Old South as backward and premodern, Marrs finds evidence of urban life, industry, and entrepreneurship throughout the region. But these signs of progress existed alongside efforts to preserve traditional ways of life. Railroads exemplified Southerners' pursuit of progress on their own terms: developing modern transportation while retaining a conservative social order. Railroads in the Old South demonstrates that a simple approach to the Old South fails to do justice to its complexity and contradictions. -- Dr. Owen Brown and Dr. Gale E. Gibson
