Researching Translation and Interpreting - Claudia V. Angelelli
2015-07-16

This volume offers a comprehensive view of current research directions in Translation and Interpreting Studies, outlining the theoretical concepts underpinning that research and presenting detailed discussions of the various methods used. Organized around three factors that are responsible for shaping the study of translation and interpreting today—post-positivist theoretical approaches, developments in the language industry, and technological innovations—this volume is divided into three parts: Part I introduces the basic concepts organizing translation and interpreting research, such as the difference between qualitative and quantitative research, between product-oriented and process-oriented studies, and between prescriptive and descriptive approaches. Part II provides a theoretical mapping of current translation and interpreting research, covering the theories underlying the current conceptualization of translation and interpreting, from queer studies to cognitive science. Part III explores the key methodological approaches to research in Translation and Interpreting Studies, including corpus-based, longitudinal, observational, and ethnographic studies, as well as survey and focus group-based studies. The international range of contributors

are all leading research experts who use the methodologies in their work. They present the research aims of these methods, offer sample research questions that can—and cannot—be addressed by these methods, and discuss modes of data collection and analysis. This is an essential reference for all advanced undergraduates, postgraduates, and researchers in Translation and Interpreting Studies.

Re-Engendering Translation - Christopher Larkosh 2014-04-08
Of interest to scholars in translation studies, gender and sexuality, and comparative literary and cultural studies, this volume re-examines the possibilities for multiple intersections between translation studies and research on sexuality and gender, and in so doing addresses the persistent theoretical gaps in much work on translation and gender to date. The current climate still seems to promote the continuation of identity politics by encouraging conversations that depart from an all too often limited range of essentializing gendered subject positions. A more inclusive approach to the theoretical intersection between translation and gender as proposed by this volume aims to open up the discussion to a wider range of linguistically and culturally informed representations of sexuality and gender, one in which neither of these two theoretical terms, much less the subjects associated with them, is considered

secondary or subordinate to the other. This discussion extends not only to questions of linguistic difference as mediated through the act of translation, but also to the challenges of intersubjectivity as negotiated through culture, 'race' or ethnicity. The volume also makes a priority of engaging a wide range of cultural and linguistic spaces: Latin America under military dictatorship, numerous points of the African cultural diaspora, and voices from South, Southeast and East Asia. Such perspectives are not included merely as supplemental, 'minority' additions to an otherwise metropolitan-centred volume, but instead are integral to the volume's focus, underscoring its goal of re-engendering translation studies through a politics of alterity that encourages the continued articulation and translation of difference, be it sexual or gendered, cultural or linguistic.

A Critical Introduction to Translation Studies - Jean Boase-Beier
2011-04-07

Jean Boase-Beier's *Critical Introduction To Translation Studies* demonstrates a keen understanding of theoretical and practical translation. It looks to instances where translation might not be straightforward, where stylistics play an important role. Examples are discussed from works of literature, advertisements, journalism and others, where effects on the reader are central to the text, and are reflected in the style. It begins by setting out some of the basic problems and issues that arise in the study of translation, such as: the difference between literary and non-literary translation; the role of language, content and style; the question of universals and specifics in language and the notion of context. The book then goes on to focus more closely on style and how it enables us to characterise literary texts and literary translation. The final part looks at the translation of poetry. Throughout, it is conscious of the relationship between theory and practice in translation. This book offers a new approach to translation, grounded in stylistics, and it will be an invaluable resource for undergraduates and postgraduates approaching translation studies.

The Routledge Handbook of Applied Linguistics - James Simpson
2011-03-15

The *Routledge Handbook of Applied Linguistics* serves as an introduction and reference point to key areas in the field of applied linguistics. The five sections of the volume encompass a wide range of topics from a variety of perspectives: applied linguistics in action language learning, language education language, culture and identity perspectives on language in use descriptions of language for applied linguistics. The forty-seven chapters connect knowledge about language to decision-making in the real world. The volume as a whole highlights the role of applied linguistics, which is to make insights drawn from language study relevant to such decision-making. The chapters are written by specialists from around the world. Each one provides an overview of the history of the topic, the main current issues and possible future trajectory. Where appropriate, authors discuss the impact and use of new technology in the area. Suggestions for further reading are provided with every chapter. Reflexive Translation Studies - Silvia Kadiu 2019-04-08

In the past decades, translation studies have increasingly focused on the ethical dimension of translational activity, with an emphasis on

reflexivity to assert the role of the researcher in highlighting issues of visibility, creativity and ethics. In *Reflexive Translation Studies*, Silvia Kadiu investigates the viability of theories that seek to empower translation by making visible its transformative dimension; for example, by championing the visibility of the translating subject, the translator's right to creativity, the supremacy of human translation or an autonomous study of translation. Inspired by Derrida's deconstructive thinking, Kadiu presents practical ways of challenging theories that argue reflexivity is the only way of developing an ethical translation. She questions the capacity of reflexivity to counteract the power relations at play in translation (between minor and dominant languages, for example) and problematises affirmative claims about (self-)knowledge by using translation itself as a process of critical reflection. In exploring the interaction between form and content, *Reflexive Translation Studies* promotes the need for an experimental, multi-sensory and intuitive practice, which invites students, scholars and practitioners alike to engage with theory productively and creatively through translation.

on courses such as the History of Translation Studies, Translation Theory, and Trends in Translation Studies.

The Routledge Handbook of Translation and Politics - Jonathan Evans 2018-04-19

The *Routledge Handbook of Translation and Politics* presents the first comprehensive, state of the art overview of the multiple ways in which 'politics' and 'translation' interact. Divided into four sections with thirty-three chapters written by a roster of international scholars, this handbook covers the translation of political ideas, the effects of political structures on translation and interpreting, the politics of translation and an array of case studies that range from the Classical Mediterranean to contemporary China. Considering established topics such as censorship, gender, translation under fascism, translators and interpreters at war, as well as emerging topics such as translation and development, the politics of localization, translation and interpreting in democratic movements, and the politics of translating popular music, the handbook offers a global and interdisciplinary introduction to the intersections between translation and interpreting studies and politics. With a substantial introduction and extensive bibliographies, this handbook is an indispensable resource for students and researchers of translation theory, politics and related areas.

Routledge Encyclopedia of Translation Studies - Mona Baker 2009-03-04

Praise for the previous edition of the *Encyclopedia of Translation Studies*: 'Translation has long deserved this sort of treatment. Appropriate for any college or university library supporting a program in linguistics, this is vital in those institutions that train students to become translators.' - Rettig on Reference 'Congratulations should be given to Mona Baker for undertaking such a mammoth task and...successfully pulling it off. It will certainly be an essential reference book and starting point for anyone interested in translation studies.' - ITI Bulletin 'This excellent volume is to be commended for bringing together some of [its] most recent research. It provides a series of extremely useful short histories, quite unlike anything that can be found elsewhere. University

teachers will find it invaluable for preparing seminars and it will be widely used by students.' - The Times Higher Education Supplement ' ... a pioneering work of reference ...'- Perspectives on Translation The Routledge Encyclopedia of Translation Studies has been the standard reference in the field since it first appeared in 1998. The second, extensively revised and extended edition brings this unique resource up-to-date and offers a thorough, critical and authoritative account of one of the fastest growing disciplines in the humanities. The Encyclopedia is divided into two parts and alphabetically ordered for ease of reference. Part One (General) covers the conceptual framework and core concerns of the discipline. Categories of entries include: central issues in translation theory (e.g. equivalence, translatability, unit of translation) key concepts (e.g. culture, norms, ethics, ideology, shifts, quality) approaches to translation and interpreting (e.g. sociological, linguistic, functionalist) types of translation (e.g. literary, audiovisual, scientific and technical) types of interpreting (e.g. signed language, dialogue, court). New additions in this section include entries on globalisation, mobility, localization, gender and sexuality, censorship, comics, advertising and retranslation, among many others. Part Two (History and Traditions) covers the history of translation in major linguistic and cultural communities. It is arranged alphabetically by linguistic region. There are entries on a wide range of languages which include Russian, French, Arabic, Japanese, Chinese and Finnish, and regions including Brazil, Canada and India. Many of the entries in this section are based on hitherto unpublished research. This section includes one new entry: Southeast Asian tradition. Drawing on the expertise of over 90 contributors from 30 countries and an international panel of consultant editors, this volume offers a comprehensive overview of translation studies as an academic discipline and anticipates new directions in the field. The contributors examine various forms of translation and interpreting as they are practised by professionals today, in addition to research topics, theoretical issues and the history of translation in various parts of the world. With key terms defined and discussed in context, a full index, extensive cross-references, diagrams and a full

bibliography the Routledge Encyclopedia of Translation Studies is an invaluable reference work for all students and teachers of translation, interpreting, and literary and social theory. Mona Baker is Professor of Translation Studies at the University of Manchester, UK. The Routledge Handbook of Translation Studies and Linguistics - Kirsten Malmkjaer 2017-10-01

The Routledge Handbook of Translation Studies and Linguistics explores the interrelationships between Translation Studies and Linguistics in six sections of state-of-the-art chapters, written by leading specialists from around the world. The first part, on the nature of language, translation and interpreting, begins by addressing the relationships between translation studies and linguistics as major topics of study in themselves before focusing, in individual chapters, on the relationships between translation on the one hand and semantics, semiotics and the sound system of language on the other. Part II is concerned with the nature of meaning and the ways in which meaning can be shared or semi-shared in texts pairs that are related to each other as first-written texts and their translations, while Part III focuses on relationships between translation

and interpreting and the written and spoken word. In part IV, the users of language, and language in use in situations involving more than one language are covered, and in Part V technological tools that can assist language users are brought onto the scene. Finally, Part VI presents chapters on the links between areas of applied linguistics and translation and interpreting. With an introduction by the editor and an extensive bibliography, this handbook is an indispensable resource for advanced students of translation studies, interpreting studies and applied linguistics.

Teaching Literature in Translation - Brian James Baer 2022-07-29

The teaching of texts in translation has become an increasingly common practice, but so too has the teaching of texts from languages and cultures with which the instructor may have little or no familiarity. The authors in this volume present a variety of pedagogical approaches to promote translation literacy and to address the distinct phenomenology of translated texts. The approaches set forward in this volume address the nature of the translator's task and how texts travel across linguistic and cultural boundaries in translation, including how they are packaged for new audiences, with the aim of fostering critical reading practices that focus on translations as translations. The organizing principle of the book is the specific pedagogical contexts in which translated texts are being used, such as courses on a single work, survey courses on a single national literature or a single author, and courses on world literature. Examples are provided from the widest possible variety of world languages and literary traditions, as well as modes of writing (prose, poetry, drama, film, and religious and historical texts) with the aim that many of the pedagogical approaches and strategies can be easily adapted for use with other works and traditions. An introductory section by the editors, Brian James Baer and Michelle Woods, sets the theoretical stage for the volume. Written and edited by authorities in the field of literature and translation, this book is an essential manual for all instructors and lecturers in world and comparative literature and literary translation.

Domestication and Foreignization in Translation Studies - Hannu Kempanen 2012-06-01

Papers from a conference held September 29-October 1, 2011 in Joensuu, Finland.

The Routledge Handbook of Chinese Translation - Chris Shei 2017-10-16
The Routledge Handbook of Chinese Translation presents expert and new research in analysing and solving translation problems centred on the Chinese language in translation. The Handbook includes both a review of and a distinctive approach to key themes in Chinese translation, such as translatability and equivalence, extraction of collocation, and translation from parallel and comparable corpora. In doing so, it undertakes to synthesise existing knowledge in Chinese translation, develops new frameworks for analysing Chinese translation problems, and explains translation theory appropriate to the Chinese context. The Routledge Handbook of Chinese Translation is an essential reference work for advanced undergraduate and postgraduate students and scholars actively researching in this area.

Translation and the Making of Modern Russian Literature - Brian James Baer 2015-11-19

Brian James Baer explores the central role played by translation in the construction of modern Russian literature. Peter I's policy of forced Westernization resulted in translation becoming a widely discussed and highly visible practice in Russia, a multi-lingual empire with a polyglot elite. Yet Russia's accumulation of cultural capital through translation occurred at a time when the Romantic obsession with originality was marginalizing translation as mere imitation. The awareness on the part of Russian writers that their literature and, by extension, their cultural identity were "born in translation" produced a sustained and sophisticated critique of Romantic authorship and national identity that has long been obscured by the nationalist focus of traditional literary studies. By offering a re-reading of seminal works of the Russian literary canon that thematize translation, alongside studies of the circulation and reception of specific translated texts, *Translation and the Making of Modern Russian Literature* models the long overdue integration of translation into literary and cultural studies.

Translation and Violent Conflict - Moira Inghilleri 2010-01-30

First Published in 2010. Routledge is an imprint of Taylor & Francis, an informa company.

Evaluation in Translation - Jeremy Munday 2012-06-14

In this book, Jeremy Munday presents advances towards a general theory of evaluation in translator decision-making that will be of high importance to translator and interpreter training and to descriptive translation analysis. By 'evaluation' the author refers to how a translator's subjective stance manifests itself linguistically in a text. In a world where translation and interpreting function as a prism through which opposing personal and political views enter a target culture, it is crucial to investigate how such views are processed and sometimes subjectively altered by the translator. To this end, the book focuses on the translation process (rather than the product) and strives to identify more precisely those points where the translator is most likely to express judgment or evaluation. The translations studied cover a range of languages (Arabic, Chinese, Dutch, French, German, Indonesian, Italian, Japanese, Russian, Spanish and American Sign Language) accompanied by English glosses to facilitate comprehension by readers. This is key reading for researchers and postgraduates studying translation theory within Translation and Interpreting Studies.

Iberian and Translation Studies - Esther Gimeno Ugalde 2021-08-15

Iberian and Translation Studies: Literary Contact Zones offers fertile reflection on the dynamics of linguistic diversity and multifaceted literary translation flows taking place across the Iberian Peninsula. Drawing on cutting-edge theoretical perspectives and on a historically diverse body of case studies, the volume's sixteen chapters explore the key role of translation in shaping interliterary relations and cultural identities within Iberia. Mary Louise Pratt's contact zone metaphor is used as an overarching concept to approach Iberia as a translation(al) space where languages and cultural systems (Basque, Catalan, Galician, Portuguese, and Spanish) set up relationships either of conflict, coercion, and resistance or of collaboration, hospitality, and solidarity. In bringing together a variety of essays by multilingual scholars whose conceptual and empirical research places itself at the intersection of translation and

literary Iberian studies, the book opens up a new interdisciplinary field of enquiry: Iberian translation studies. This allows for a renewed study of canonical authors such as Joan Maragall, Fernando Pessoa, Camilo José Cela, and Bernardo Atxaga, and calls attention to emerging bilingual contemporary voices. In addition to addressing understudied genres (the *entremes* and the picaresque novel) and the phenomena of self-translation, indirect translation, and collaborative translation, the book provides fresh insights into Iberian cultural agents, mediators, and institutions.

Translation in Modern Japan - Indra Levy 2017-07-05

The role of translation in the formation of modern Japanese identities has become one of the most exciting new fields of inquiry in Japanese studies. This book marks the first attempt to establish the contours of this new field, bringing together seminal works of Japanese scholarship and criticism with cutting-edge English-language scholarship.

Collectively, the contributors to this book address two critical questions: 1) how does the conception of modern Japan as a culture of translation affect our understanding of Japanese modernity and its relation to the East/West divide? and 2) how does the example of a distinctly East Asian tradition of translation affect our understanding of translation itself? The chapter engage a wide array of disciplines, perspectives, and topics from politics to culture, the written language to visual culture, scientific discourse to children's literature and the Japanese conception of a national literature. *Translation in Modern Japan* will be of huge interest to a diverse readership in both Japanese studies and translation studies as well as students and scholars of the theory and practice of Japanese literary translation, traditional and modern Japanese history and culture, and Japanese women's studies.

The Situatedness of Translation Studies - 2021-03-15

In *The Situatedness of Translation Studies*, Luc van Doorslaer and Ton Naaijken reassess some outdated views about Translation Studies. They present ten chapters about lesser-known conceptualizations of translation and translation theory in various cultural contexts, such as Chinese, Estonian, Greek, Russian and Ukrainian.

Queer Theory and Translation Studies - Brian James Baer 2020-07-22

This groundbreaking book explores the relevance of queer theory to Translation Studies and of translation to Global Sexuality Studies. Beginning with a comprehensive overview of the origins and evolution of queer theory, this book places queer theory and Translation Studies in a productive and mutually interrogating relationship. After framing the discussion of actual and potential interfaces between queer sexuality and queer textuality, the chapters trace the transnational circulation of queer texts, focusing on the place of translation in "gay" anthologies, the packaging of queer life writing for global audiences, and the translation of lyric poetry as a distinct site of queer performativity. Baer analyzes fictional translators in literature and film, the treatment of translation in historical and ethnographic studies of sexual and linguistic others, the work of queer translators, and the reception of queer texts in translation. Including a range of case studies to exemplify key ethical issues relevant to all scholars of global sexuality and postcolonial studies, this book is essential reading for advanced students, scholars, and researchers in Translation Studies, gender and sexuality studies, and related areas.

Recent Trends in Translation Studies - Sara Laviosa 2021-09-10

This volume offers a snapshot of current perspectives on translation studies within the specific historical and socio-cultural framework of Anglo-Italian relations. It addresses research questions relevant to English historical, literary, cultural and language studies, as well as empirical translation studies. The book is divided into four chapters, each covering a specific research area in the scholarly field of translation studies: namely, historiography, literary translation, specialized translation and multimodality. Each case study selected for this volume has been conducted with critical insight and methodological rigour, and makes a valuable contribution to scientific knowledge in the descriptive and applied branches of a discipline that, since its foundation nearly 50 years ago, has concerned itself with the description, theory and practice of translating and interpreting.

Critical Translation Studies - Douglas Robinson 2017-02-17

This book offers an introduction for Translation Studies (TS) scholars to

Critical Translation Studies (CTS), a cultural-studies approach to the study of translation spearheaded by Sakai Naoki and Lydia H. Liu, with an implicit focus on translation as a social practice shaped by power relations in society. The central claim in CTS is that translators help condition what TS scholars take to be the primal scene of translation: two languages, two language communities, with the translator as mediator. According to Sakai, intralingual translation is primal: we are all foreigners to each other, making every address to another "heterolingual", thus a form of translation; and it is the order that these acts of translation bring to communication that begins to generate the "two separate languages" scenario. CTS is dedicated to the historicization of the social relations that create that scenario. In three sets of "Critical Theses on Translation," the book outlines and explains (and partly critiques) the CTS approach; in five interspersed chapters, the book delves more deeply into CTS, with an eye to making it do work that will be useful to TS scholars.

A Critical Introduction to Translation Studies - Jean Boase-Beier

2011-06-09

>

Teaching Translation - LAWRENCE VENUTI 2016-08-05

Over the past half century, translation studies has emerged decisively as an academic field around the world, and in recent years the number of academic institutions offering instruction in translation has risen along with an increased demand for translators, interpreters and translator trainers. Teaching Translation is the most comprehensive and theoretically informed overview of current translation teaching.

Contributions from leading figures in translation studies are preceded by a substantial introduction by Lawrence Venuti, in which he presents a

view of translation as the ultimate humanistic task – an interpretive act that varies the form, meaning, and effect of the source text. 26 incisive chapters are divided into four parts, covering: certificate and degree programs teaching translation practices studying translation theory, history, and practice surveys of translation pedagogies and key textbooks The chapters describe long-standing programs and courses in the US, Canada, the UK, and Spain, and each one presents an exemplary model for teaching that can be replicated or adapted in other institutions. Each contributor responds to fundamental questions at the core of any translation course – for example, how is translation defined? What qualifies students for admission to the course? What impact does the institutional site have upon the course or pedagogy? Teaching Translation will be relevant for all those working and teaching in the areas of translation and translation studies. Additional resources for Translation and Interpreting Studies are available on the Routledge Translation Studies Portal.

Horizon Above and Beyond - Tharun Kurian Alex 2016-05-12

This compilation, *Horizon Above and Beyond*, is the outcome of the hard efforts of past two years. Unlike other projects or approaches that attempt to pool out literature and language from each other, the following text has attempted not to catalog either the text or the contents into any particular class of subjects of concern and, thus, keeping it broad and wide. It sheds the limelight onto the research works done by the scholars of various disciplines. The technical aspect of language, such as linguistics and translation, along with literary criticism and the researches on novels, poems, short stories, films, religion, etc., are brought under a single haven, thereby extending the subjectivity of research on language and literature. Similarly the rigidity, fluidity, and hypocrisy of the various social institutions are also put into scrutiny respectively in different areas. Therefore, instead of choosing the works that are purely literary, those tinted with the flavor of other styles and outlooks are muddled together here.

Handbook of Translation Studies - Yves Gambier 2013-12-20

As a meaningful manifestation of how institutionalized the discipline has

become, the new Handbook of Translation Studies is most welcome. It joins the other signs of maturation such as Summer Schools, the development of academic curricula, historical surveys, journals, book series, textbooks, terminologies, bibliographies and encyclopedias. The HTS aims at disseminating knowledge about translation and interpreting and providing easy access to a large range of topics, traditions, and methods to a relatively broad audience: not only students who often adamantly prefer such user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars and experts from other disciplines (among which linguistics, sociology, history, psychology). In addition the HTS addresses any of those with a professional or personal interest in the problems of translation, interpreting, localization, editing, etc., such as communication specialists, journalists, literary critics, editors, public servants, business managers, (intercultural) organization specialists, media specialists, marketing professionals. The usability, accessibility and flexibility of the HTS depend on the commitment of people who agree that Translation Studies does matter. All users are therefore invited to share their feedback. Any questions, remarks and suggestions for improvement can be sent to the editorial team at hts@kuleuven.be. Next to the book edition (in printed and electronic, PDF, format), HTS is also available as an online resource, connected with the Translation Studies Bibliography. Readers, Reading and Reception of Translated Fiction in Chinese - Leo Tak-hung Chan 2014-04-08

Translated fiction has largely been under-theorized, if not altogether ignored, in literary studies. Though widely consumed, translated novels are still considered secondary versions of foreign masterpieces. *Readers, Reading and Reception of Translated Fiction in Chinese* recognizes that translated novels are distinct from non-translated novels, just as they are distinct from the originals from which they are derived, but they are neither secondary nor inferior. They provide different models of reality; they are split apart by two languages, two cultures and two literary systems; and they are characterized by cultural hybridity, double voicing and multiple intertextualities. With the continued popularity of translated fiction, questions related to its reading and reception take on increasing significance. Chan draws on insights from textual and narratological studies to unravel the processes through which readers interact with translated fiction. Moving from individual readings to collective

reception, he considers how lay Chinese readers, as a community, 'received' translated British fiction at specific historical moments during the late twentieth and early twenty-first centuries. Case studies discussed include translations of stream-of-consciousness novels, fantasy fiction and postmodern works. In addition to lay readers, two further kinds of reader with bilingual facility are examined: the way critics and historians approach translated fiction is investigated from structuralist and poststructuralist perspectives. A range of novels by well-known British authors constitute the core of the study, including novels by Oscar Wilde, James Joyce, D.H. Lawrence, Virginia Woolf, John Fowles, Helen Fielding and J.K. Rowling.

Translation and Conflict - Mona Baker 2018-10-25

Translation and Conflict was the first book to demonstrate that translators and interpreters participate in circulating as well as resisting the narratives that create the intellectual and moral environment for violent conflict and social tensions. Drawing on narrative theory and with numerous examples from historical and current contexts of conflict, Mona Baker provides an original and coherent model of analysis that pays equal attention to the circulation of narratives in translation and to questions of dominance and resistance. With a new preface by Sue-Ann Harding, *Translation and Conflict* is more than ever the essential text for any student or researcher interested in the study of translation and social movements.

Translation Theory and Development Studies - Kobus Marais 2014-07-16

This book aims to provide a philosophical underpinning to translation and relate translation to development. The second aim flows from the first section's argument that societies emerge out of, amongst others, complex translational interactions amongst individuals. It will do so by conceptualising translation from a complexity and emergence point of view and relating this view on emergent semiotics to some of the most recent social research. It will further fulfill its aims by providing empirical data from the South African context concerning the relationship between translation and development. The book intends to be interdisciplinary in nature and to foster interdisciplinary research and dialogue by relating the newest trends in translation theory, i.e. agency theory in the sociology of translation, to development theory within sociology. Data in the volume will be drawn from fields that have received very little if any attention in translation studies, i.e. local economic development, the knowledge economy and the informal economy.
