New Public Management and the Reform of Education - Helen M. Gunter 2016-07-07
New Public Management and the Reform of Education addresses complex and dynamic changes to public services by focusing on new public management as a major shaper and influencer of educational reforms within, between and across European nation states and policy actors. The contributions to the book are diverse and illustrate the impact of NPM locally but also the interplay between local and European policy spheres. The book offers: A critical overview of NPM through an analysis of debates, projects and policy actors A detailed examination of NPM within 10 nation states in Europe A robust engagement with the national and European features of NPM as a policy strategy The book actively contributes to debates and analysis within critical policy studies about the impact and resilience of NPM, and how through a study of educational reforms in a range of political systems with different traditions and purposes a more nuanced and complex picture of NPM can be built. As such the book not only speaks to educational

researchers and professionals within Europe but also to policymakers, and can inform wider education and policy communities internationally.

La laurea negata. Le politiche contro l'istruzione universitaria - Gianfranco Viesti 2018

Università e nuove forme di valutazione - Simona Colarusso 2020-07-29

Dalla fine degli anni '90, il sistema universitario italiano è stato protagonista di interventi riformisti che ne hanno cambiato la struttura didattica, le dinamiche di reclutamento, gli assetti gestionali ed organizzativi con impatti enormi sulla vita degli accademici. Negli stessi anni le immatricolazioni si sono stabilizzate, seppure con alterne fluttuazioni, configurando l'istruzione universitaria come "istruzione di massa". Parallelamente i forti tagli alla spesa per università e ricerca, contrariamente al discorso pubblico sulla transizione alla "società della conoscenza", hanno messo a dura prova la tenuta del sistema universitario nel suo complesso. In questo intricato quadro le politiche di valutazione hanno contribuito a trasformare le pratiche, le strategie e i comportamenti delle istituzioni e del corpo accademico. Nel presente volume l'attenzione è posta proprio sui mutamenti nella produzione scientifica (come espressione dell'attività di ricerca), nelle scelte strategiche e negli atteggiamenti degli accademici, tentando di evidenziare gli effetti di condizionamento a livello aggregato, di singola istituzione ed

individuale.

Capitale disumano - Roberto Ciccarelli

2022-01-10T00:00:00+01:00

Siamo tutti in alternanza scuola lavoro. Non solo il milione e mezzo di studenti delle scuole superiori, ma tutti coloro che cercano un lavoro e in questo trovano un'occupazione. Le politiche attive del lavoro, della formazione continua e del capitale umano ci obbligano ad autosfruttarci. Sin dalla scuola siamo a caccia di impieghi precari per diventare imprenditori di noi stessi. Questo libro è un risveglio dall'incubo. È un vertiginoso esercizio etico, racconta una contro-storia originale e capovolge il dispositivo che annulla la pratica dell'emancipazione politica. Loro dicono capitale umano, noi invece diciamo forza lavoro. Orientiamoci in base a questa nostra potenza e mettiamola a fuoco. Questo è il primo passo per nutrire la vita e liberarla.

Diventare musicista. Indagine sociologica sui conservatori di musica in Italia -

Clementina Casula 2018-03-22

Diventare musicista professionista non è impresa semplice, né apprezzata in Italia. Più che in altri Paesi, il percorso storico di riconoscimento sociale della professione si è rivelato incompiuto e ancora oggi la pratica musicale e artistica risulta prevalentemente associata - dall'opinione pubblica, dai media, ma anche dagli studi accademici - alla sfera del tempo libero e dell'intrattenimento, piuttosto che a una dimensione lavorativa e a un sapere specialistico. Eppure la tradizione musicale dei secoli passati e la fama di celebri compositori, cantanti, direttori, strumentisti, è annoverata tra i principali miti che alimentano l'orgoglio identitario dell'Italia in ambito mondiale. Tale paradosso è riconducibile alla storia moderna e contemporanea dell'apprendimento musicale in Italia. Qual è lo sviluppo storico di questa istituzione? Quali strutture sono state previste per organizzare la formazione musicale pre-accademica degli allievi? Quali sono stati i risultati? Queste sono solo alcune delle domande a cui risponde il presente studio.

Frontier Socialism - Monica Quirico

2021-07-05

Considering the history of workers' and socialist

movements in Europe, *Frontier Socialism* focuses on unconventional forms of anti-capitalist thought, particularly by examining several militant-intellectuals whose legacy is of particular interest for those aiming for a radical critique of capitalism. Following on the work of Michael Löwy, Quirico & Ragona identify relationships of "elective affinity" between figures who might appear different and dissimilar, at least at first glance: the German Anarchist Gustav Landauer, the Bolshevik Alexandra Kollontai, the German communist Paul Mattick, the Italian Socialist Raniero Panzieri, the Greek-born French euro-communist Nikos Poulantzas, the German-born Swedish Social Democrat Rudolf Meidner, and the French social scientist Alain Bihr as well as two historical struggle experiences, the Spanish Republic and the Italian revolutionary group "Lotta continua". *Frontier Socialism* then analyzes these thinkers' and experiences' respective paths to socialism based on and achieved through self-organization and self-government, not to build a new tradition but to suggest a path forward for both research and political activism.

Risk and Resilience - Alessandro Balducci

This book presents and discusses methodological approaches and operational tools aimed at increasing the awareness and skills necessary to face the social, economic and environmental challenges usually encountered in spatial planning. In addition, it deals with the concepts of risk and resilience from both a theoretical and operational point of view. The book promotes a better understanding of risk, resilience, and related notions such as vulnerability, fragility and anti-fragility in urban and landscape studies, while also analyzing new planning policies. Accordingly, it will benefit all researchers and public decision-makers looking for an interdisciplinary approach to risk and resilience. *Scritti di sociologia e politica in onore di Luigi Sturzo* - Luigi Sturzo 1953

After expanding for centuries, science is reaching its limits to growth. We can no longer afford the ever-increasing cost of exploring ever-wider research opportunities. In the competition for resources, science is becoming much more tightly organized. A radical, pervasive and permanent structural change is taking place. This already affects the whole research system, from everyday laboratory life to the national budget. The scientific enterprise cannot avoid fundamental change, but excessive managerial insistence on accountability, evaluation, 'priority setting', etc. can be very inhospitable to expertise, innovation, criticism and creativity. Can the research system be reshaped without losing many features that have made science so productive? This trenchant analysis of a deep-rooted historical process does not assume any technical knowledge of the natural sciences, or their history, philosophy, sociology, or politics. It is addressed to everybody who is concerned about the future of science and its place in society.

Decent Incomes for All - Bea Cantillon
2018-11-20

In 2000, the first social agenda in the history of the European Union was launched, and the endeavor to combat poverty came increasingly to the forefront as a specific area for EU policy cooperation and coordination. Regrettably, however, little progress has been achieved so far, either at the national or European level. On the contrary, the EU's social fabric is under major stress: convergence in national living standards has halted or reversed while progress in terms of poverty reduction in the last decades has been disappointing in most EU Member States. In Europe, despite high social spending and work-related welfare reforms, poverty often remains a largely intractable problem for policymakers and a persistent reality for many European citizens. In *Decent Incomes for All*, the authors shed new light on recent poverty trends in the European Union and the corresponding responses by European welfare states. They analyze the effect of social and fiscal policies before, during, and after the recent economic crisis and study the impact of alternative policy packages on poverty and inequality. The volume also explores how social investment and local initiatives of social innovation can contribute to tackling poverty, while recognizing that there are indeed structural constraints on the increase of the social floor and difficult trade-offs involved in reconciling work and poverty reduction. Academics and graduate students in comparative social policy, inclusion and anti-poverty policy, sociology, and public economics will find the book to be a particularly helpful resource in their work.

Chris Sampson is the media and cyberwarfare expert for the Terror Asymmetric Project and has spent fifteen years collecting and exploiting terrorism media. It also maps out the cyberspace-level tactics by which ISIS spreads its terrifying content, how it distributes tens of thousands of pieces of propaganda daily—and how to stop it in its tracks. *Hacking ISIS* is uniquely positioned to give an insider’s view into how this group spreads its ideology and brainwashes tens of thousands of followers to join the cult that is the Islamic State, and how average computer users can engage in the removal of ISIS from the internet. [Mediterranean Capitalism Revisited](#) - Luigi Burrioni 2022-01-15

Mediterranean Capitalism Revisited brings together leading experts on the political economies of southern Europe—specifically Greece, Italy, Spain, and Portugal—to closely analyze and explain the primary socioeconomic and institutional features that define "Mediterranean capitalism" within the wider European context. These economies share a number of features, most notably their difficulties to provide viable answers to the challenge of globalization. By examining and comparing such components as welfare, education and innovation policies, cultural dimensions, and labor market regulation, *Mediterranean Capitalism Revisited* attends to both commonalities and divergences between the four countries, identifying the main reasons behind the poor performance of their economies

and slow recovery from the Great Recession of 2007–2008. This volume also sheds light on the process of diversification among the four countries and addresses whether it did and still does make sense to speak of a uniquely Mediterranean model of capitalism.

Rethinking education: towards a global common good? - UNESCO 2015-05-26

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Buroc/razzismo e arte - Antonio Bisaccia
2021-01-22T00:00:00+01:00

Il progetto di riforma di Accademie di Belle Arti, Conservatori di Musica, Istituti Superiori per le Industrie Artistiche, Accademia Nazionale di Danza e Accademia Nazionale d'Arte Drammatica ha subito nell'ultimo quarto di secolo una tragica battuta d'arresto. Non è chiaro il motivo: se s'interrogano i politici di turno, i governi passati e presenti, non si troverà nessuno che non voglia risolvere l'ormai storica disparità di trattamento dell'afam. Senza, poi, agire di conseguenza. Tutto fa pensare all'uso deliberato di una forma di "razzismo burocratico" nei confronti dell'Alta Formazione Artistica, Musicale e Coreutica. E questo mentre nel resto del mondo, da tempo, essa è assorbita all'interno delle strutture universitarie, e gode di equiparabile dignità e rispetto. Oltre a presentare un'impeccabile analisi del passato - burocratico e non solo -, Antonio Bisaccia suggerisce una credibile proposta per donare un futuro diverso alle istituzioni afam in Italia, indicando gli artisti-ricercatori come soggetti in grado di alimentare, se non sovvertire, l'asset strategico del Made in Italy.

Political Economy of Contemporary Italy -
Nicolò Giangrande 2021-09-17

Drawing on Kaleckian and Kaldorian approaches, *Political Economy of Contemporary Italy: The Economic Crisis and State Intervention* explores the reasons behind the stagnation of the Italian economy from the 1970s and suggests policy solutions to ease the crisis. The central thesis of the book is that from the early 1990s Italy experienced a constant reduction of both private and public investment which, combined with increasing labour precariousness and wage moderation, contributed to the decline of both labour productivity and economic growth. It is argued that lack of industrial policies amplified the problem of the poor macroeconomic performance, since Italian firms - small-sized and non-innovating - were incapable of staying competitive on the global scene. Net exports did not compensate for the decline of public spending, private investment and consumption. It is also shown that, in these respects, Italy presents an interesting case study with wider ramifications for it was involved in the global process of intensifying the neoliberal agenda but at a faster rate than other OECD countries. The book concludes with a call for an alternative economic policy in order to promote innovation, reduce unemployment and stimulate economic growth. This book marks a significant

I Am Malala - Malala Yousafzai 2013-10-08

A MEMOIR BY THE YOUNGEST RECIPIENT OF THE NOBEL PEACE PRIZE As seen on Netflix with David Letterman "I come from a country that was created at midnight. When I almost died it was just after midday." When the Taliban took control of the Swat Valley in Pakistan, one girl spoke out. Malala Yousafzai refused to be silenced and fought for her right to an education. On Tuesday, October 9, 2012, when she was fifteen, she almost paid the ultimate price. She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. I AM MALALA is the remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. I AM MALALA will make you believe in the power of one person's voice to inspire change in the world.

Changing Governance in Universities - Giliberto Capano 2017-01-09

This book critically examines the ramifications of reforms to higher education institutions. All of the higher education system reforms implemented in western countries over the last three decades have had one fundamentally important aim: namely, that of changing the existing institutional and system governance arrangements. This book argues that within this general framework, Italy is a relative latecomer to a scenario where attempts at university reform have been characterized by considerable difficulties, and have been blighted by the arguably poor quality of policy design. By focusing on the Italian reform trajectory as an emblematic case, and providing a comprehensive of the historical evolution of

higher education in Italy and further afield, this book adopts a comparative perspective to show how reforms of governance in higher education may achieve different degrees of success depending on the characteristics of their policy design, and why these reforms inevitably lead to a series of unintended consequences. It will be vital reading for those interested in education policy and the history of education.

Economic Policy, Crisis and Innovation -

Maria Cristina Marcuzzo 2019-11-21

This book is a Festschrift to Annamaria Simonazzi and embraces the themes that she has contributed to over the years through her insightful and inspiring works. It brings together contributions from a number of distinguished European economists, which pay tribute to her by engaging in a dialogue with her research, simultaneously reflecting on the process of growing economic disintegration in the European Union, its causes and its possible remedies. The book shows the deep interrelations between macroeconomic issues and the social sphere, and points to the need to rethink the very foundations of European economic policies as an effective antidote to growing imbalances and disintegration. In particular, the effects of austerity are assessed alongside the dimensions of inequality, gender discrimination, poverty, and unemployment, broadening the perspective also beyond the Eurozone. The authors envision a progressive society, in which investments in research and intelligent industrial policies govern the processes of technological change and drive the economy towards a more efficient and more equal model of development characterized by

high productivity and high wages. While some chapters deal directly with policy issues, policy suggestions and proposals are scattered throughout the whole book. This volume will appeal to academics, economists, and policy-makers interested in understanding the policy response of European institutions to the challenges posed by both the Great Recession and subsequent developments in the European economies. The book is written in an engaging and accessible way, and the themes are broad enough to generate interest from the international public.
