Global Action Plan on Physical Activity 2018-2030 - World Health Organization 2019-01-21

Regular physical activity is proven to help prevent and treat noncommunicable diseases (NCDs) such as heart disease stroke diabetes and breast and colon cancer. It also helps to prevent hypertension overweight and obesity and can improve mental health quality of life and well-being. In addition to the multiple health benefits of physical activity societies that are more active can generate additional returns on investment including a reduced use of fossil fuels cleaner air and less congested safer roads. These outcomes are interconnected with achieving the shared goals political priorities and ambition of the Sustainable Development Agenda 2030. The new WHO global action plan to promote physical activity responds to the requests by countries for updated guidance and a framework of effective and feasible policy actions to increase physical activity at all levels. It also responds to requests for global leadership and stronger regional and national coordination and the need for a whole-of-society response to achieve a

paradigm shift in both supporting and valuing all people being regularly active according to ability and across the life course. The action plan was developed through a worldwide consultation process involving governments and key stakeholders across multiple sectors including health sports transport urban design civil society academia and the private sector.

La sanità futura - Francesco Longo 2011-02-11T00:00:00+01:00

Come saranno i sistemi sanitari tra dieci o vent'anni, alla luce delle dinamiche e delle trasformazioni in corso sul piano finanziario, istituzionale, organizzativo, tecnologico, epidemiologico e la conseguente evoluzione della medicina e dei modelli di consumo dei pazienti? In questo volume si analizzano e si discutono i possibili futuri, utilizzando la tecnica degli scenari, che per ogni variabile rilevante indica le possibili traiettorie evolutive e ne delinea i principali impatti. Gli scenari sono costruiti cercando di cogliere i "segnali" presenti nel sistema, i pareri di opinion leader del settore, i trend di alcune variabili rilevanti e il dibattito nella letteratura internazionale, oltre a quelle che potrebbero essere le principali aree di discontinuità. Per ogni scenario sono discusse le possibili implicazioni strategiche per gli attori del sistema: le aziende pubbliche e private del Servizio Sanitario Nazionale, le imprese farmaceutiche e tecnologiche e gli erogatori di servizi di supporto. Interrogarsi per tempo sulle principali criticità attese nel futuro probabilmente uno degli esercizi più rilevanti per la definizione delle strategie di organizzazioni complesse, come quelle che operano nei sistemi di welfare socio-sanitario, le quali necessitano di lunghi periodi di adattamento e di trasformazione attuativa.

Strategia e performance management nelle aziende sanitarie pubbliche - AA.VV. 2012-06-29T00:00:00+02:00

Le Aziende Sanitarie Pubbliche (ASP) sono oggi chiamate a dotarsi di sistemi manageriali volti al governo delle strategie e delle performance aziendali in risposta a un ambiente esterno caratterizzato da dinamismo epidemiologico, demografico, sociale, tecnologico ed economico. Il libro affronta il tema della strategia delle ASP e il collegamento con i sistemi di misurazione e valutazione delle performance, approfondendo: - il concetto di strategia per le ASP; - le caratteristiche delle scelte strategiche nelle ASP; - i processi di formazione delle strategie nelle ASP; - il reale svolgimento dei processi di elaborazione e realizzazione della strategia attraverso un'analisi empirica di 16 casi aziendali; - le modalità per la gestione del cambiamento per affrontare e superare le resilienze interne; - l'opportunità di costruire dei sistemi di controllo strategico con un forte collegamento con i sistemi di misurazione e valutazione delle performance. Il libro il frutto dello studio e del confronto tra i ricercatori SDA Bocconi, i professionisti e il top management delle ASP del progetto Academy of Health Care Management and Economics di SDA Bocconi e Novartis Italia.

Le aziende sanitarie private accreditate - Clara Carbone

2013-11-17T00:00:00+01:00

Il fine istituzionale di tutela della salute del SSN non un compito esclusivo del sistema pubblico, ma deve diventare un obiettivo dell'intero sistema sociale cui concorrono con pari dignità, sebbene con diversi ruoli, soggetti pubblici e privati. In questa logica, l'obiettivo della regolazione pubblica quello di allineare interessi diversi, al fine di creare un clima di fiducia in cui le relazioni di scambio possano svolgersi nell'interesse collettivo per la crescita e lo sviluppo economico-sociale. In particolare, il soggetto pubblico dovrebbe favorire lo sviluppo degli erogatori privati e orientarne i comportamenti attraverso una chiara definizione e applicazione degli strumenti di governo, coerentemente alle caratteristiche dei diversi assetti istituzionali e alle priorità sanitarie dei vari SSR. Il presente volume, seguendo una logica sistemica di tipo economico-aziendale, propone un approfondimento sul posizionamento e

sullo sviluppo strategico delle aziende sanitarie private accreditate in Italia. Dopo una presentazione delle peculiarità degli erogatori privati accreditati e delle loro interdipendenze con il sistema pubblico, il volume propone: una rappresentazione della spesa sanitaria privata accreditata, delle caratteristiche dimensionali e di produttività dei soggetti privati accreditati delineandone le principali tendenze degli ultimi dieci anni in una logica di sussidiarietà tra erogatori pubblici e privati accreditati; una lettura interpretativa delle regole del contesto istituzionale all'interno del quale le aziende sanitarie private accreditate operano oggi in Italia; una riflessione sullo sviluppo strategico degli erogatori privati accreditati alla luce dell'attuale posizionamento e delle regole di committenza del sistema pubblico.

Handbook on European data protection law - Council of Europe
2018-04-15

The rapid development of information technology has exacerbated the need for robust personal data protection, the right to which is safeguarded by both European Union (EU) and Council of Europe (CoE) instruments. Safeguarding this important right entails new and significant challenges as technological advances expand the frontiers of areas such as surveillance, communication interception and data storage. This handbook is designed to familiarise legal practitioners not specialised in data protection with this emerging area of the law. It provides an overview of the EU's and the CoE's applicable legal frameworks. It also explains key case law, summarising major rulings of both the Court of Justice of the European Union and the European Court of Human Rights. In addition, it presents hypothetical scenarios that serve as practical illustrations of the diverse issues encountered in this ever-evolving field.

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition - Dina Di Giacomo 2019-03-01

Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

[Delivering on Digital](#) - William D. Eggers 2016-06-07

The government reform expert and acclaimed author of *The Solution Revolution* presents a roadmap for navigating the digital government era. In October 2013, HealthCare.gov went live—and promptly crashed. Poor website design was getting in the way of government operations, and the need for digital excellence in public institutions was suddenly

crystal clear. Hundreds of the tech industry's best and brightest dedicated themselves to redesigning the government's industrial-era frameworks as fully digital systems. But to take Washington into the 21st century, we have to start by imagining a new kind of government.

Imagine prison systems that use digital technology to return nonviolent offenders promptly and securely into society. Imagine a veteran's health care system built around delivering a personalized customer experience for every Vet. We now have the digital tools—such as cloud computing, mobile devices, and analytics—to stage a real transformation. Delivering on Digital provides the handbook to make it happen. A leading authority on government reform, William D. Eggers knows how we can use tech-savvy teams, strong leadership, and innovative practices to reduce the risks and truly achieve a digitally transformed government.

Management of Cultural Firms - Paola Dubini 2021-05

Cultural organizations play a variety of roles in contemporary society: they may be tools for cultural diplomacy, tourist attractors, educational and research-oriented institutions, relevant brokers for social inclusion. They therefore need to respond to the expectations of multiple private and public actors. This book explores their specific conditions for long-term viability, which are dependent on a complex interplay between economic and non-economic factors. Cultural organizations--private, nonprofit, and public--are analyzed in their structural components and in their interactions with market and institutional players. The relationship between operating decisions and results is taken into consideration, in order to highlight the drivers of economic results.

Managing - Henry Mintzberg 2009-09

A half century ago Peter Drucker put management on the map. Leadership has since pushed it off. Henry Mintzberg aims to restore management to its proper place: front and center. "We should be seeing managers as leaders." Mintzberg writes, "and leadership as management

practiced well." This landmark book draws on Mintzberg's observations of twenty-nine managers, in business, government, health care, and the social sector, working in settings ranging from a refugee camp to a symphony orchestra. What he saw—the pressures, the action, the nuances, the blending—compelled him to describe managing as a practice, not a science or a profession, learned primarily through experience and rooted in context. But context cannot be seen in the usual way. Factors such as national culture and level in hierarchy, even personal style, turn out to have less influence than we have traditionally thought. Mintzberg looks at how to deal with some of the inescapable conundrums of managing, such as, How can you get in deep when there is so much pressure to get things done? How can you manage it when you can't reliably measure it? This book is vintage Mintzberg: iconoclastic, irreverent, carefully researched, myth-breaking. Managing may be the most revealing book yet written about what managers do, how they do it, and how they can do it better.

Advances and Applications in Computer Science, Electronics and Industrial Engineering - Jyrki Nummenmaa 2019-10-23

This book presents the proceedings of the Conference on Computer Science, Electronics and Industrial Engineering (CSEI 2019), held in Ambato in October 2019, with participants from 13 countries and guest speakers from Chile, Colombia, France, Japan, Spain, Portugal, and United States. Featuring 23 peer-reviewed papers, it discusses topics such as the use of metaheuristic for non-deterministic problem solutions, software architectures for supporting e-government initiatives, and the use of electronics in e-learning and industrial environments. It also includes contributions illustrating how new approaches on these converging research areas are impacting the development of human societies around the world into Society 5.0. As such, it is a valuable resource for scholars and practitioners alike.

Production, Operations and Supply Chain Management - Giuseppe Stabilini 2021-11

The book describes a management-focused treatment with multiple quantitative insights and applications of illustrated key tools and

algorithms. The following issues are deeply investigated: Analysis of production systems; Operations and supply chain strategy decision making; Performance measurement: Problem setting and solving; Production planning and inventory control; Production Scheduling; Lean, procurement and vendor management; Supply chain, operations data and information systems management; Digital manufacturing and Industry 4.0. The book is also designed to provide the reader with information in processes of analysis, diagnosis and improvement of industrial processes and logistics.

Una politica a tutto gas - Matteo Verda 2011-11-25T00:00:00+01:00

Un quarto dell'energia consumata in Europa proviene dal gas: una fonte in continuo sviluppo negli ultimi decenni, sia per gli usi domestici e industriali sia, soprattutto, per la generazione di elettricità. L'energia non è solo una questione economica, ma anche politica. Tutti i governi nazionali sono infatti impegnati nel garantire che un'interruzione delle forniture non si traduca in vasti danni economici e sociali. In Europa questo è vero in particolare per il gas naturale, che richiede migliaia di chilometri di tubature e miliardi di euro di investimenti per raggiungere i consumatori. Gestire le relazioni con i paesi fornitori e con quelli di transito rappresenta dunque una priorità in grado di influenzare profondamente e per decenni la politica estera dei principali stati europei. Il libro ricostruisce la portata e i potenziali sviluppi delle relazioni che riguardano l'Italia, l'Europa e i loro partner energetici.

From Novice to Expert - Patricia Benner 2001

This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what

nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. For nurses and healthcare professionals.

Julius Caesar's Disease - Francesco M. Galassi 2016-11-30

In this groundbreaking study, two medical historians present a provocative new diagnosis of the ailment that famously afflicted Julius Caesar. It is generally accepted as a historical fact that Julius Caesar suffered from epilepsy, an illness which in classical times was sometimes associated with divinely bestowed genius. The ancient sources describe several episodes when, sometimes at critical junctures, one of the most accomplished military commanders in history was incapacitated by a condition referred to as morbus comitialis. But does the evidence of his illness really suggest a diagnosis of epilepsy? And if it was not epilepsy that afflicted Caesar, what was it? These are the questions that doctors Francesco M. Galassi and Hutan Ashrafian seek to answer by applying modern medical knowledge to the symptoms and circumstances described by primary source documents—including statements made by Caesar himself. The result is a fascinating piece of historical-pathological detective work that challenges received wisdom about one of the most famous men of all time.

When the Facts Change - Tony Judt 2015-01-22

“In an era of growing anti-intellectualism, [Judt's] essays remind us of what we gain when we stick fast to high ethical and intellectual standards, and what is lost when we let them slip.” —Mark Mazower, Financial Times “Scintillating journalism . . . This collection is a reminder of Judt's clear mind and prose and, as Homans says in her lovely

introduction, his fidelity to hard facts and to honest appraisal of the modern scene.” —Samuel Moyn, The New York Times Book Review In an age in which the lack of independent public intellectuals has often been sorely lamented, the historian Tony Judt played a rare and valuable role, bringing together history and current events, Europe and America, what was and what is with what should be. In *When the Facts Change*, Tony Judt’s widow and fellow historian Jennifer Homans has assembled an essential collection of the most important and influential pieces written in the last fifteen years of Judt’s life, the years in which he found his voice in the public sphere. Included are seminal essays on the full range of Judt’s concerns, including Europe as an idea and in reality, before 1989 and thereafter; Israel, the Holocaust and the Jews; American hyperpower and the world after 9/11; and issues of social inclusion and social justice in an age of increasing inequality. Judt was at once most at home and in a state of what he called internal exile from his native England, from Europe, and from America, and he finally settled in New York—between them all. He was a historian of the twentieth century acutely aware of the dangers of ethnic exceptionalism, and if he was shaped by anything, it was the Jewish past and his own secularism. His essays on Israel ignited a firestorm debate for their forthright criticisms of Israeli government policies relating to the Palestinians and the occupied territories. Those crucial pieces are published here in book form for the first time, including an essay, never previously published, called “What Is to Be Done?” These pieces are suffused with a deep compassion for the Israeli dilemma, a compassion that instilled in Judt a sense of responsibility to speak out and try to find a better path, away from what he saw as a road to ruin. *When the Facts Change* also contains Judt’s homages to the culture heroes who were some of his greatest inspirations: Amos Elon, François Furet, Leszek Kolakowski, and perhaps above all Albert Camus, who never accepted the complacent view that the problem of evil couldn't lie within us as well as outside us. Included here too is a magnificent two-part essay on the social and political importance of railway travel to our modern conception of a good society; as well as the urgent text of “What Is Living and What Is Dead in Social

Democracy,” the final public speech of his life, delivered from a wheelchair after he had been stricken with a terrible illness; and a tender and wise dialogue with his then-teenage son, Daniel, about the different outlooks and burdens of their two generations. To read *When the Facts Change* is to miss Tony Judt’s voice terribly, but to cherish it for what it was, and still is: a wise, human, deeply informed view on our most pressing concerns, delivered in good faith.

La sanità futura - Francesco Longo 2010

World Development Report 2019 - World Bank 2018-10-31

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person’s lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the

available evidence.

International Perspectives on Spinal Cord Injury - World Health Organization 2013

"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Social media e comunicazione della salute. Profili istituzionali e pratiche digitali - Alessandro Lovari 2020-05-15

Cerchiamo diagnosi e cure su «Dr. Google». Leggiamo blog alla ricerca di recensioni su specialisti e ospedali. Interagiamo con il medico su WhatsApp. Contattiamo le Asl su Facebook e Twitter. Sempre più, oggi, Internet e i social media sono ambienti comunicativi in cui ricercare

informazioni sulla salute, ma anche piattaforme per mettersi in relazione e comunicare con medici, cittadini e strutture sanitarie. In questi anni la comunicazione della salute si è profondamente modificata, grazie a innovative pratiche digitali, in uno scenario caratterizzato da profondi cambiamenti nel sistema dei media e nella comunicazione pubblica e istituzionale. Il volume prende spunto da questi fattori per analizzare come i social media trasformano i processi e le pratiche comunicative tra istituzioni pubbliche della salute, medici e cittadini/pazienti. Attraverso la lente della comunicazione pubblica, si ripercorrono usi, pratiche, opportunità e criticità legati all'adozione dei social media per la comunicazione della salute. Un percorso di ricerca che si snoda tra la gestione strategica di profili istituzionali social e le pratiche digitali di cittadini connessi, che danno visibilità a temi di salute sempre più controversi e richiedono una voce pubblica credibile, presente e autorevole. Una ricerca tra consapevolezza e competenze, tra retoriche dell'innovazione tecnologica e sperimentazioni 2.0, tra teorie e studi empirici a livello internazionale e nazionale. Una nuova sfida per la sanità, i comunicatori pubblici e i cittadini. Un affascinante ambito di indagine per chi studia e fa ricerca in comunicazione.

The Magic World of Orson Welles - James Naremore 2015-07-30

Prodigy. Iconoclast. Genius. Exile. Orson Welles remains one of the most discussed figures in cinematic history. In the centenary year of Welles's birth, James Naremore presents a revised third edition of this incomparable study, including a new section on the unfinished film *The Other Side of the Wind*. Naremore analyzes the political and psychological implications of the films, Welles's idiosyncratic style, and the biographical details--both playful and vexing--that impacted each

work. Itself a historic film study, *The Magic World of Orson Welles* unlocks the soaring art and quixotic methods of a master.

La fragilità degli anziani - Gabriele Cavazza 2014-05

Ogni professionista parla oggi della sua fragilità, di quella che incontra e osserva nelle persone che prende in carico. Psicologi, medici di famiglia, geriatri, infermieri, assistenti sociali, infatti, in virtù della loro professione, percepiscono un diverso aspetto della fragilità. Questo libro racconta un progetto sperimentale realizzato a Bologna. Si propone di formulare una definizione di fragilità che tenga conto di queste molteplici sfaccettature, di essere uno strumento concreto per affrontare la tematica in modo scientifico, e di offrire riflessioni e suggerimenti per un cambiamento del welfare. Purtroppo infatti il welfare che conosciamo oggi non risponde più in modo adeguato alle richieste e aspettative di cittadini, operatori e amministratori che si interfacciano con questa condizione così diffusa. Serve invece innovazione nel pensiero e nelle azioni messe in campo, e la sperimentazione di nuove progettualità.

Gabriele Cavazza Medico, specialista in Igiene, Epidemiologia e Sanità Pubblica, Direttore del Distretto di committenza e garanzia della Città di Bologna. Cristina Malvi Farmacista, dipendente dell'Azienda USL di Bologna, si occupa di fragilità della popolazione e di valorizzazione ed empowerment del Terzo Settore nella prevenzione di comunità.

Management della sanità - Federico Lega 2013-11-17T00:00:00+01:00

La tutela della salute è fondamentale per lo sviluppo economico ed il benessere sociale di un paese. In Italia la sanità è la prima voce di spesa delle Regioni (pesa tra il 60 e 70% dei bilanci regionali), è il secondo datore di lavoro nell'impiego pubblico (circa 700.000 impiegati nel SSN)

ed è il primo volano dell'economia, se si considera la spesa complessiva per la sanità (oltre il 9% del PIL) e l'indotto collegato (industria farmaceutica, biotecnologie, servizi di supporto, tecnologie sanitarie, infrastrutture, ecc.). Le aziende sanitarie sono organizzazioni ultra-complesse da gestire, per la natura professionale (maggioranza dei lavoratori sono professionisti laureati), l'elevata tecnologia, l'impatto sociale ed economico delle attività, lo stretto collegamento con il sistema politico. Quali politiche sanitarie e quali cambiamenti gestionali servono per affrontare la crisi economica e le sfide che caratterizzano il settore della salute? Nel libro sono spiegate e discusse le dinamiche caratterizzanti il settore e le esperienze di innovazione che possono ispirare nuove e più efficaci scelte di politica sanitaria e di governo delle strutture sanitarie pubbliche e private.

Pragmatics of Human Communication: A Study of Interactional Patterns, Pathologies and Paradoxes - Paul Watzlawick 2011-04-25

The properties and function of human communication. Called "one of the best books ever about human communication," and a perennial bestseller, *Pragmatics of Human Communication* has formed the foundation of much contemporary research into interpersonal communication, in addition to laying the groundwork for context-based approaches to psychotherapy. The authors present the simple but radical idea that problems in life often arise from issues of communication, rather than from deep psychological disorders, reinforcing their conceptual explorations with case studies and well-known literary examples. Written with humor and for a variety of readers, this book identifies simple properties and axioms of human communication and demonstrates how all communications are actually a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; meta-communication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.
