Lateral Cooking - Niki Segnit 2019-11-05

A groundbreaking handbook--the "method" companion to its critically acclaimed predecessor, *The Flavor Thesaurus*--with a foreword by Yotam Ottolenghi. Niki Segnit used to follow recipes to the letter, even when she'd made a dish a dozen times. But as she tested the combinations that informed *The Flavor Thesaurus*, she detected the basic rubrics that underpinned most recipes. *Lateral Cooking* offers these formulas, which, once readers are familiar with them, will prove infinitely adaptable. The book is divided into twelve chapters, each covering a basic culinary category, such as "Bread," "Stock, Soup & Stew," or "Sauce." The recipes in each chapter are arranged on a continuum, passing from one to another with just a tweak or two to the method or ingredients. Once you've got the hang of flatbreads, for instance, then its neighboring dishes (crackers, soda bread, scones) will involve the easiest and most intuitive adjustments. The result is greater creativity in the kitchen: *Lateral Cooking* encourages improvisation, resourcefulness, and, ultimately, the knowledge and confidence to cook by heart. *Lateral Cooking* is a practical book, but, like *The Flavor Thesaurus*, it's also a highly enjoyable read, drawing widely on culinary science, history, ideas from professional kitchens, observations by renowned food writers, and Segnit's personal recollections. Entertaining, opinionated, and inspirational, with a handsome three-color design, *Lateral Cooking* will have you torn between donning your apron and settling back in a comfortable chair.

Eating and Healing - Andrea Pieroni 2006-03-15

Discover neglected wild food sources—that can also be used as medicine! The long-standing notion of "food as medicine, medicine as food," can be traced back to Hippocrates. *Eating and Healing: Traditional Food As Medicine* is a global overview of wild and semi-domesticated foods and their use as medicine in traditional societies. Important cultural information, along with extensive case studies, provides a clear, authoritative look at the many neglected food sources still being used around the world today. This book bridges the scientific disciplines of medicine, food science, human ecology, and environmental sciences with their ethno-scientific counterparts of ethnobotany, ethnoecology, and ethnomedicine to provide a valuable multidisciplinary resource for education and instruction. *Eating and Healing: Traditional Food As Medicine* presents respected researchers' in-depth case studies on foods different cultures use as medicines and as remedies for nutritional deficiencies in diet. Comparisons of living conditions in different geographic areas as well as differences in diet and medicines are thoroughly discussed and empirically evaluated to provide scientific evidence of the many uses of these traditional foods as medicine and as functional foods. The case studies focus on the uses of plants, seaweed, mushrooms, and fish within their cultural contexts while showing the dietary and medical importance of these foods. The book provides comprehensive tables, extensive references, useful photographs, and helpful illustrations to provide clear scientific support as well as opportunities for further thought and study. *Eating and Healing: Traditional Food As Medicine* explores the ethnobiology of: Tibet—antioxidants as mediators of high-altitude nutritional physiology Northeast Thailand—"wild" food plant gathering Southern Italy—the consumption of wild plants by Albanians and Italians Northern Spain—medicinal digestive beverages United States—medicinal herb quality Commonwealth of Dominica—humoral medicine and food Cuba—promoting health through medicinal foods Brazil—medicinal uses of specific fishes Brazil—plants from the Amazon and Atlantic Forest Bolivian Andes—traditional food medicines New Patagonia—gathering of wild plant foods with medicinal uses Western Kenya—uses of traditional herbs among the Luo people South Cameroon—ethnomycology in Africa Morocco—food medicine and ethnopharmacology *Eating and Healing: Traditional Food As Medicine* is an essential research guide and educational text about food and medicine in traditional societies for educators, students from undergraduate through graduate levels, botanists, and research specialists in nutrition and food science, anthropology, agriculture, ethnoecology, ethnobotany, and ethnobiology.

Ciak per due. Ricette d'amore al cinema - Enzo Tumminello 2004

From Good Goddess to Vestal Virgins - Ariadne Staples 2013-02-01

The role of women in Roman culture and society was a paradoxical one. On the one hand they enjoyed social, material and financial independence and on the other hand they were denied basic constitutional rights. Roman history is not short of powerful female figures, such as Agrippina and Livia, yet their power stemmed from their associations with great men and was not officially recognised. Ariadne Staples' book examines how women in Rome were perceived both by themselves and by men through women's participation in Roman religion, as Roman religious ritual provided the single public arena where women played a significant formal role. *From Good Goddess to Vestal Virgins* argues that the ritual roles played out by women were vital in defining them sexually and that these sexually defined categories spilled over into other aspects of Roman culture, including political activity. Ariadne Staples provides an arresting and original analysis of the role of women in Roman society, which challenges traditionally held views and provokes further questions.

Sweet Sicily - Alessandro Dammone 2014-09

Sweet, intense, and colorful is how Sicilian pastries will appear to the fortunate eyes seeing them for the first time. Those who have time to get to know them well, however, will also find it sensual, dramatic, and irreverent. Making pastries in Sicily is never a purely gastronomic issue; it may be a declaration of love, social ostentation of personal wealth, or even a way of mocking a defeated enemy. It is a gesture that involves countless intentions, coded and described in stories rooted in the mists of time. This anthology collects some of those stories and the most delicious Sicilian sweets, illustrated by poignant images and accompanied by some personal tips. The scents of childhood and cherished memories are bound together by one certainty: In Sicily, a sweet is never something that is just good to eat. It is a magical microcosm, an ancient tale, a legend that demands to be told.

Pasta and Pizza - Franco La Cecla 2007

Pasta and pizza, in all their infinitely delicious and universally appealing varieties, are inextricably connected to Italian identity. These familiar foods not only represent Italy's culinary traditions, according to anthropologist Franco La Cecla, they have unified the Italian people and spread Italian culture worldwide. *Pasta and Pizza* tells the story of how cuisine born in the south of Italy during the Arab conquest became a foundation for the creation of a new nation. As La Cecla shows, this process intensified as millions of Italians immigrated to the Americas: it was abroad that pasta and pizza became synonymous with being Italian, and the foods' popularity grew as the Italian presence expanded in American culture. More than literature, art, or even language, food serves as a strong cultural rallying point for the Italian people and a way to disseminate Italian traditions worldwide. Available for the first time in English translation, La Cecla's lively and accessible study will be of interest to a wide range of readers, from social theorists to avid foodies.

To capture all the heat and hunger, he spent eighteen months immersed in the kitchen of James Beard Award-winner Tony Maws' restaurant, Craigie on Main, in Boston. He became part of the family, experiencing the drama first-hand. Here, Haas exposes the inner life of a chef, what it takes to make food people crave, and how to achieve greatness in a world that demands more than passion and a sharp set of knives. A lens into what motivates and inspires all chefs—including Thomas Keller, Andrew Carmellini, whose stories are also shared here—Back of the House will change the way you think about food—and about the complicated people who cook it and serve it.

The Land of Hunger - Piero Camporesi 1996

In this highly original book, Camporesi explores the two worlds of feast and famine in early modern Europe. Camporesi brings together a mosaic of images from Italian folklore: phantasmagoric processions of giants, pigs, vagabonds, down-trodden rogues, charlatans and beggars in rags. He reconstructs a world inhabited by the strange forces of peasant culture, and describes the various rituals - carnivals, festivities, competitions and funerals - in which food played a central role. Camporesi's description alternates between the lives of the "haves" and the "have-nots". He moves from the starving underworld of "criminalized poverty", where people were forced to develop the art of living at the expense of others simply in order to survive, to the gastronomic culture of the well-fed, with their excessive eating habits, oily foods and colourful table manners. "The Land of Hunger" is a graphic and engaging journey into the folk culture of early modern Europe. It will consolidate Camporesi's reputation as one of the most original and imaginative historians of our time.

She kept this book for years. Putting a menu together is still her favourite part of cooking. Menus aren't just groups of dishes that have to work on a practical level (meals that cooks can manage), they also have to work as a succession of flavours. But what is perhaps most special about them is the way they can create very different moods - menus can take you places, from an afternoon at the seaside in Brittany to a sultry evening eating mezze in Istanbul. They are a way of visiting places you've never seen, revisiting places you love and celebrating particular seasons. How to Eat a Peach contains many of Diana's favourite dishes in menus that will take you through the year and to different parts of the world.

Science in the Kitchen and the Art of Eating Well - Pellegrino Artusi 2003-12-27

First published in 1891, Pellegrino Artusi's La scienza in cucina e l'arte di mangiar bene has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor - humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.
