Sea-Level Science - David Pugh 2014-04-24
Understanding sea-level processes, such as ocean tides, storm surges, tsunamis, El Niño and rises caused by climate change, is key to planning effective coastal defence. Building on David Pugh's classic book *Tides, Surges and Mean Sea-Level*, this substantially expanded, full-colour book now incorporates major recent technological advances in the areas of satellite altimetry and other geodetic techniques (particularly GPS), tsunami science, measurement of mean sea level and analyses of extreme sea levels. The authors discuss how each surveying and measuring technique complements others in providing an understanding of present-day sea-level change and more reliable forecasts of future changes. Giving the how and the why of sea-level change on timescales from hours to centuries, this authoritative and exciting book is ideal for graduate students and researchers in oceanography, marine engineering, geodesy, marine geology, marine biology and climatology. It will also be of key interest to coastal engineers and governmental policy-makers.

Fingerprints of the Gods - Graham Hancock 2012-09-19

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. "A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought."—Kirkus Reviews
In *Fingerprints of the Gods*, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, *Fingerprints of the Gods* contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And *Fingerprints of God* tells us something more. As we recover the truth about

prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. “Readers will hugely enjoy their quest in these pages of inspired storytelling.”—The Times (UK)

Invented Knowledge - Ronald H. Fritze
2009-05-15

This incredible exploration of the murky world of pseudo-history reveals the mix of proven facts, informed speculation, and pure fiction behind lost continents, ancient super-civilizations, and conspiratorial cover-ups—as well as the revisionist historical foundations of religions such as the Nation of Islam and the Church of Jesus Christ of Latter-day Saints. Drawing on the best scholarship available, Ronald H. Fritze shows that in spite of strong, mainstream historical evidence to the contrary, many of these ideas have proved durable and gained widespread acceptance. As the examples in *Invented Knowledge* reveal, pseudo-historians capitalize on and exploit anomalies in evidence to support their claims, rather than examining the preponderance of research as a whole.

The Ancient Alien Question, 10th Anniversary Edition - Philip Coppens
2021-03-01

“ . . . an important and outstanding contribution.” —Erich von Däniken, bestselling author of *Chariots of the Gods* “The Ancient Alien Question provides a captivating adventure around the world and sheds an interesting perspective on the Ancient Astronaut Theory.” —Giorgio A. Tsoukalos, producer of *Ancient Aliens: The Series* “Philip Coppens covers all the bases on this controversial topic. His research is thorough and he addresses each topic with a balanced overview that cuts through the jungle of confusion with a very sharp machete of reason.” —David Hatcher Childress, author of *Technology of the Gods* The Ancient Alien Question reveals an array of astonishing truths, including: A radically different understanding of the pyramids and how they were constructed The extraordinary stories behind monuments such as the Nazca lines and Puma Punku How extraterrestrials came to our planet and the

evidence that supports this Analyzing the historical and archaeological evidence, Philip Coppens demonstrates that there is substantial proof that our ancestors were far more technologically advanced than currently accepted, and that certain cultures interacted with nonhuman intelligences. Our ancestors were clearly not alone. Fifty years after Erich von Däniken posed these questions in *Chariots of the Gods*, Coppens provides clear, concise answers to the great historical enigmas in an accessible, readable format. Your view of human history will never be the same again!

Underworld - Graham Hancock 2009-11-18

What secrets lie beneath the deep blue sea? *Underworld* takes you on a remarkable journey to the bottom of the ocean in a thrilling hunt for ancient ruins that have never been found—until now. In this explosive new work of archaeological detection, bestselling author and renowned explorer Graham Hancock embarks on a captivating underwater voyage to find the ruins of a mythical lost civilization hidden for thousands of years beneath the world’s oceans. Guided by cutting-edge science, innovative computer-mapping techniques, and the latest archaeological scholarship, Hancock examines the mystery at the end of the last Ice Age and delivers astonishing revelations that challenge our long-held views about the existence of a sunken universe built on the ocean floor. Filled with exhilarating accounts of his own participation in dives off the coast of Japan, as well as in the Mediterranean, the Atlantic, and the Arabian Sea, we watch as Hancock discovers underwater ruins exactly where the ancient myths say they should be—submerged kingdoms that archaeologists never thought existed. You will be captivated by *Underworld*, a provocative book that is both a compelling piece of hard evidence for a fascinating forgotten episode in human history and a completely new explanation for the origins of civilization as we know it.

The Disinformation Guide to Ancient Aliens, Lost Civilizations, Astonishing Archaeology and Hidden History - Preston Peet 2013-04-01

Where did "modern" civilization begin? What lies beneath the waves? Do myths describe interstellar impact? How'd they lift that stone? Was the Ark of the Covenant a mechanical device? Were there survivors of an Atlantean

catastrophe? Who really discovered the "New World? "Hidden history" continues to fascinate an ever wider audience. In this massive compendium, editor Preston Peet brings together an allstar cast of contributors to question established wisdom about the history of the world and its civilizations. Peet and anthology contributors guide us through exciting archeological adventures and treasure hunts, ancient mysteries, lost or rediscovered technologies, and assorted "Fortean," using serious scientific studies and reports, scholarly research, and some plain old fringe material, as what is considered "fringe" today is often hard science tomorrow. Contributors include: Graham Hancock (Fingerprints of the Gods and Underworld), David Hatcher Childress (Lost Cities and Civilizations series), Colin Wilson (From Atlantis to the Sphinx), Michael Cremo (Forbidden Archeology), William Corliss (Ancient Infrastructures), Robert Schoch (Voyages of the Pyramid Builders), John Anthony West (Serpent in the Sky), Michael Arbuthnot (Team Atlantis), Erich Von Daniken (Chariots of the Gods), and many more.

UFOs, Conspiracy Theories and the New Age

- David G. Robertson 2016-02-25

How-and why- were UFOs so prevalent in both conspiracy theories and the New Age milieu in the post-Cold War period? In this groundbreaking book, David G. Robertson argues that UFOs symbolized an uncertainty about the boundaries between scientific knowledge and other ways of validating knowledge, and thus became part of a shared vocabulary. Through historical and ethnographic case studies of three prominent figures-novelist and abductee Whitley Strieber; environmentalist and reptilian proponent David Icke; and David Wilcock, alleged reincarnation of Edgar Cayce-the investigation reveals that millennial conspiracism offers an explanation as to why the prophesied New Age failed to arrive-it was prevented from arriving by malevolent, hidden others. Yet millennial conspiracism constructs a counter-elite, a gnostic third party defined by their special knowledge. An overview of the development of UFO subcultures from the perspective of religious studies, UFOs, Conspiracy Theories and the New Age is an innovative application of discourse analysis to

the study of present day alternative religion. *The Best American Science and Nature Writing - 2004*

DMT Dialogues - David Luke 2018-08-14
Cutting-edge explorations and discussions of DMT experiences and plant sentience from leading luminaries in the field of psychedelic research • Includes contributions from Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Peter Meyer, David Luke, and many others • Explores DMT beings, plant sentience, interspecies communication, discarnate consciousness, dialoguing with the divine, the pineal gland, the Amazonian shamanic perspective on Invisible Entities, and the science behind hallucinations Encounters with apparently sentient beings are reported by half of all first time users of the naturally occurring psychedelic DMT, yet the question of DMT beings and plant sentience, interspecies communication, discarnate consciousness, and perhaps even dialoguing with the divine has never been systematically explored. In September 2015, ten of the world's leading luminaries noted for exploring the mysterious compound DMT (dimethyltryptamine) gathered with other researchers at Tyringham Hall in England to discuss the subject. Over three days, they pooled their expertise from a wide range of subjects--archaeology, anthropology, religious studies, psychology, neuroscience, chemistry, and psychopharmacology, to name a few--to explore the notion of "entheogenic plant sentience" and the role of DMT as a conduit between Spirit and Matter. Offering cutting-edge insights into this visionary domain, this book distills the potent exchange of ideas that occurred at Tyringham Hall, including presentations and discussions on DMT entities, the pineal gland, the possibility of DMT as a chemical messenger from an extraterrestrial civilization, the Amazonian shamanic perspective on Invisible Entities, morphic resonance, and the science behind hallucinations. Contributors to the talks and discussions include many leading thinkers in this field, including Rupert

Hy Brasil: The Metamorphosis of an Island - Barbara Freitag 2013

Brasil Island, better known as Hy Brasil, is a phantom island. In the fourteenth century Mediterranean mapmakers marked it on nautical charts to the west of Ireland, and its continued presence on maps over the next six hundred years inspired enterprising seafarers to sail across the Atlantic in search of it. Writers, too, fell for its lure. While English writers envisioned the island as a place of commercial and colonial interest, artists and poets in Ireland fashioned it into a fairyland of Celtic lore. This pioneering study first traces the cartographic history of Brasil Island and examines its impact on English maritime exploration and literature. It investigates the Gaelicization process that the island underwent in nineteenth century and how it became associated with St Brendan. Finally, it pursues the Brasil Island trope in modern literature, the arts and popular culture.

Voyages of the Pyramid Builders - Robert M. Schoch 2004-05-24

Is it a mere coincidence that pyramids are found throughout our globe? Did cultures ranging across vast spaces in geography and time, such as the ancient Egyptians; early Bud-dhists; the Maya, Inca, Toltec, and Aztec civilizations of the Americas; the Celts of the British Isles; and even the Mississippi Indians of pre-Columbus Illinois, simply dream the same dreams and envision the same structures? Robert M. Schoch-one of the world's preeminent geologists in recasting the date of the building of the Great Sphinx-believes otherwise. In this dramatic and meticulously reasoned book, Schoch, like anthropologist Thor Heyerdahl in his classic Kon-Tiki, argues that ancient cultures traveled great distances by sea. Indeed, he believes that primeval sailors traveled from the Eastern continent, primarily Southeast Asia, and spread the idea of pyramids across the globe, particularly to the New World of the Americas where they abounded until the

days of the Conquistadors.

Mysteries of the Ancient Past - Glenn Kreisberg 2012-10-03

Cutting-edge thinkers on the origins of civilization, the Giza pyramids, pre-Columbian and early America, and the power of human consciousness • With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and others • Topics range from the origins of the Inca to the architecture of the Giza plateau to unified theories of physics and consciousness • Companion volume to Lost Knowledge of the Ancients As we pull back the curtain from the European version of history, we discover the vast depth of knowledge of our ancient ancestors-knowledge that not only dispels our image of them as primitive peoples but also corresponds with the forefront of modern science, philosophy, and spirituality. With contributions by David Frawley, Geoff Stray, Joscelyn Godwin, Daniel Pinchbeck, Antoine Gikal, and other provocative, cutting-edge thinkers, this collection of essays commissioned by Graham Hancock, bestselling author of Fingerprints of the Gods, represents the latest, often controversial findings in alternative science, history, archaeology, and consciousness research. Covering topics ranging from the origins of the Inca and the secrets hidden in Vedic literature, to the architecture of the Giza pyramids and the Sphinx, to unified theories of physics and consciousness, this book shows how, by recovering our lost history, we too can experience the higher consciousness and advanced wisdom of the ancients.

Investigating Seafloors and Oceans - Antony Joseph 2016-12-08

Investigating Seafloors and Oceans: From Mud Volcanoes to Giant Squid offers a bottom-to-top tour of the world's oceans, exposing the secrets hidden therein from a variety of scientific perspectives. Opening with a discussion of the earth's formation, hot spots, ridges, plate tectonics, submarine trenches, and cold seeps,

the text goes on to address such topics as the role of oceans in the origin of life, tidal bore, thermal effects, ecosystem services, marine creatures, and nutraceutical and pharmaceutical resources. This unique reference provides insight into a wide array of questions that researchers continue to ask about the vast study of oceans and the seafloor. It is a one-of-a-kind examination of oceans that offers important perspectives for researchers, practitioners, and academics in all marine-related fields. Includes chapters addressing various scientific disciplines, offering the opportunity for readers to gain insights on diverse topics in the study of oceans Provides scientific discussion on thermo-tolerant microbial life in sub-seafloor hot sediments and vent fields, as well as the origin of life debates and the puzzles revolving around how life originated Includes detailed information on the origin of dreaded episodes, such as volcanic eruptions, earthquakes, tsunamis, internal waves and tidal bores Contains information on the contribution of the oceans in terms of providing useful nutraceutical and pharmaceutical products

Sunken Realms - Karen Mutton 2011-03-09
Australian researcher Karen Mutton has compiled the world's most extensive list of sunken cities and megalithic underwater sites currently known around the world. She begins by discussing some of the causes for sunken ruins: super-floods; volcanoes; earthquakes at the end of the last great flood; plate tectonics and other theories. She then discusses Plato's Atlantis and the various areas of the Mediterranean and Atlantic that have been proposed as the location. From there she launches into a worldwide cataloging of underwater ruins by region. She begins with the many underwater cities in the Mediterranean, and then moves into northern Europe and the North Atlantic. She continues with chapters on the Caribbean and then moves through the extensive sites in the Pacific and Indian Oceans. The final chapters are on ruins and structures in lakes and inland seas plus a brief look at modern and medieval sunken ruins. Comes with plenty of maps, illustrations and rare photos. Places covered in this book include: Tartessos; Cadiz; Morocco; Alexandria; The Bay of Naples; Libya; Phoenician and Egyptian sites; Roman era sites;

Yarmuta, Lebanon; Cyprus; Malta; Thule & Hyperborea; Celtic Realms Lyonesse, Ys, and Hy Brasil; Carnac, Brittany; Isle of Wight; Canary and Azore Islands; Bahamas; Cuba; Bermuda; Mexico; Peru; Micronesia; California; Japan; Indian Ocean; Sri Lanka Land Bridge; India; Sumer; Lake Titicaca; and inland lakes in Scotland, Russia, Iran, China, Wisconsin, Florida and more. A unique and fascinating book!
Gods, Sages and Kings - David Frawley 2000-11

"Gods, Sages and Kings presents a remarkable accumulation of evidence pointing to the existence of a common spiritual culture in the ancient world from which present civilization may be more of a decline than an advance. The book is based upon new interpretation of the ancient Vedic teachings of India, and brings out many new insights from this unique source often neglected and misinterpreted in the West. In addition, it dicusses recent archaeological discoveries in India whose implications are now only beginning to emerge."--Publisher.

Supernatural - Graham Hancock 2006-09-01
Publisher's Note: A new, expanded edition has replaced this book under the new title Visionary: The Mysterious Origins of Human Consciousness, ISBN 9781637480069 This definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release. Less than fifty thousand years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as "the greatest riddle in human history," all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In Supernatural Graham Hancock sets out to investigate this mysterious "beforeandafter moment" and to discover the truth about the influences that gave birth to the modern human mind. His quest takes him on a detective journey from the stunningly beautiful painted caves of prehistoric France, Spain, and Italy to rock shelters in the mountains of South Africa, where he finds extraordinary Stone Age art. He uncovers clues that lead him to the depths of the Amazon rainforest to drink the powerful hallucinogen Ayahuasca with shamans,

whose paintings contain images of "supernatural beings" identical to the animal-human hybrids depicted in prehistoric caves. Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other "dimensions." Could the "supernaturals" first depicted in the painted caves be the ancient teachers of mankind? Could it be that human evolution is not just the "meaningless" process that Darwin identified, but something more purposive and intelligent that we have barely begun to understand?

Magicians of the Gods - Graham Hancock 2015-09-10

Graham Hancock's multi-million bestseller *Fingerprints of the Gods* remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. Twenty years on, Hancock returns with a book filled with completely new, scientific and archaeological evidence, which has only recently come to light... The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12,800 and 11,600 years ago. Near the end of the last Ice Age 12,800 years ago, a giant comet that had entered the solar system from deep space thousands of years earlier, broke into multiple fragments. Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs. At least eight of the fragments hit the North American ice cap, while further fragments hit the northern European ice cap. The impacts, from comet fragments a mile wide approaching at more than 60,000 miles an hour, generated huge amounts of heat which instantly liquidized millions of square kilometres of ice, destabilizing

the Earth's crust and causing the global Deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning. They settled at key locations - Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia. Everywhere they went these 'Magicians of the Gods' brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price. A memory and a warning to the future... For the comet that wrought such destruction between 12,800 and 11,600 years may not be done with us yet. Astronomers believe that a 20-mile wide 'dark' fragment of the original giant comet remains hidden within its debris stream and threatens the Earth. An astronomical message encoded at Gobekli Tepe, and in the Sphinx and the pyramids of Egypt, warns that the 'Great Return' will occur in our time...

A History of South African Literature - Christopher Heywood 2004-11-18
This book is a critical study of South African literature, from colonial and pre-colonial times onwards. Christopher Heywood discusses selected poems, plays and prose works in five literary traditions: Khoisan, Nguni-Sotho, Afrikaans, English, and Indian. The discussion includes over 100 authors and selected works, including poets from Mqhayi, Marais and Campbell to Butler, Serote and Krog, theatre writers from Boniface and Black to Fugard and Mda, and fiction writers from Schreiner and Plaatje to Bessie Head and the Nobel prizewinners Gordimer and Coetzee. The literature is explored in the setting of crises leading to the formation of modern South Africa,

notably the rise and fall of the Emperor Shaka's Zulu kingdom, the Colenso crisis, industrialisation, the colonial and post-colonial wars of 1899, 1914, and 1939, and the dissolution of apartheid society. In Heywood's study, South African literature emerges as among the great literatures of the modern world.

Underworld - Graham Hancock 2002-01-01
A physical and intellectual journey, a worldwide exploration diving for the underwater ruins of a lost civilization, this book follows clues in ancient scriptures and mythology and in the scientific evidence of the flood that swept the Earth at the end of the last Ice Age. This text explores the question of early humans swept away by the catastrophe. Who were these populations - pre-civilised hunter-gatherers or more sophisticated peoples altogether? The text is written as a personal adventure involving the reader in the travels, the practicalities and the risks while developing the larger themes along the way, building up to the explosive revelation of a global mystery.

Atlantis and the Silver City - Peter Daughtrey 2013-03-05
Delve into an ancient mystery and witness the unveiling of the most complete and persuasive evidence for the real location of the lost empire of Atlantis. More than two thousand years ago, Plato laid out a series of cryptic clues about the location of Atlantis. Since then, countless experts have tried to crack his code. Today, some experts claim Atlantis lies under the volcanic rocks of Santorini. Others place it in the Bermuda Triangle or off the coast of Africa or say it vanished forever beneath the waves of the Atlantic Ocean. But what if Atlantis is closer than we think? What if we could walk the streets of its ancient capital today? After a twenty-year forensic examination of Plato's writings, Peter Daughtrey believes we can do just that. Having matched an unprecedented number of Plato's clues to a modern locale, Daughtrey pinpoints the exact location of the once-glittering capital city of Atlantis and outlines the full reach of the empire. Daughtrey's quest takes him from the dusty stone quarries of Portugal and the hieroglyphs of Egyptian temples to the newly refurbished museums of Baghdad. Along the way, he unearths long-forgotten, vitally

Environmental Change and Human Development - Chris Barrow 2014-04-04

Environmental Change and Human Development focuses on environmental change and human fortunes. While there is a large and rapidly expanding literature dealing with how people affect the environment, less attention has been given in recent years to how the environment shapes human development. In an ever more crowded world there is a need for anticipatory environmental management, and a crucial input to this is consideration of the interaction between environment and humans. The environment is not as stable, benign or controllable as people like to think. The world population is vastly larger than it has ever been and is still growing, and humans increasingly upset nature through pollution and other activities. While modern communications may help environmental managers, rapid travel also increases the dispersal of diseases and pests. Technological advance and social development is not all beneficial; some innovations have the effect of making people more vulnerable to disruption by natural disaster, and citizens are often less able to cope with changed conditions than people were in the past. *Environmental Change and Human Development* addresses key

issues such as soil degradation, natural climatic variations and volcanic activity, and provides geography and earth sciences students with an essential introduction to the major debates surrounding this topic.

America Before - Graham Hancock 2019-04-23
The Instant New York Times Bestseller! Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Graham Hancock, the internationally bestselling author, has made it his life's work to find out--and in *America Before*, he draws on the latest archaeological and DNA evidence to bring his quest to a stunning conclusion. We've been taught that North and South America were empty of humans until around 13,000 years ago - amongst the last great landmasses on earth to have been settled by our ancestors. But new discoveries have radically reshaped this long-established picture and we know now that the Americas were first peopled more than 130,000 years ago - many tens of thousands of years before human settlements became established elsewhere. Hancock's research takes us on a series of journeys and encounters with the scientists responsible for the recent extraordinary breakthroughs. In the process, from the Mississippi Valley to the Amazon rainforest, he reveals that ancient "New World" cultures share a legacy of advanced scientific knowledge and sophisticated spiritual beliefs with supposedly unconnected "Old World" cultures. Have archaeologists focused for too long only on the "Old World" in their search for the origins of civilization while failing to consider the revolutionary possibility that those origins might in fact be found in the "New World"? *America Before: The Key to Earth's Lost Civilization* is the culmination of everything that millions of readers have loved in Hancock's body of work over the past decades, namely a mind-dilating exploration of the mysteries of the past, amazing archaeological discoveries and profound implications for how we lead our lives today.

Ancient Aliens - Philip Coppens 2014-12-15

Ancient civilizations generated many innovations that are difficult to explain, such as the remarkable mathematical accuracy of the

pyramids of Giza, the man-made fertile soil of the Amazon known as terra preta, and massive stone monuments too heavy to move in Peru and Lebanon, among other places. Given that modern science cannot explain these mysterious phenomena, one theory holds that ancient aliens were responsible for them. This volume examines the credibility of various paranormal hypotheses, giving readers the opportunity to explore the greatest puzzles of antiquity.

Return to the Brain of Eden - Tony Wright 2014-05-14

An exploration of our fall from the pinnacle of human evolution 200,000 years ago and how we can begin our return • Explores recent neurological and psychological research on the brain and the role of plant biochemistry in human brain expansion • Explains how humanity's prehistoric diet change led to a neurodegenerative condition characterized by aggression and a fearful perception of the world • Outlines a strategy of raw foods, tantric sexuality, shamanic practices, and entheogens to reverse our mental degeneration and restore our advanced abilities Over a period of a million years the human brain expanded at an increasingly rapid rate, and then, 200,000 years ago, the expansion abruptly stopped. Modern science has overlooked this in order to maintain that we are at the pinnacle of our evolution. However, the halt in brain expansion explains not only recently uncovered anomalies within the human brain but also the global traditions of an earthly paradise lost and of humanity's degeneration from our original state of perpetual wonder and joy. Drawing on more than 20 years of research, authors Tony Wright and Graham Gynn explore how our modern brains are performing far below their potential and how we can unlock our higher abilities and return to the euphoria of Eden. They explain how for millions of years early forest-dwelling humans were primarily consuming the hormone-rich sex organs of plants--fruit--each containing a highly complex biochemical cocktail evolved to influence DNA transcription, rapid brain development, and elevated neural and pineal gland activity. Citing recent neurological and psychological studies, the authors explain how the loss of our symbiotic fruit-based diet led to a progressive neurodegenerative condition characterized by aggressive behaviors, a fearful

perception of the world, and the suppression of higher artistic, mathematical, and spiritual abilities. The authors show how many shamanic and spiritual traditions were developed to counteract our decline. They outline a strategy of raw foods, tantric sexuality, shamanic practices, and entheogen use to reverse our degeneration, restore our connection with the plant world, and regain the bliss and peace of the brain of Eden.

Vedic Yoga - David Frawley 2014-10-07

The Path of the Rishi is one of the first and most detailed books published in the West on the ancient Vedic origins of Yoga, including all aspects of its philosophy and practice. The book reveals secrets of the Vedic Yoga from the teachings of Sri Aurobindo, Ganapati Muni, Brahmarsi Daivarat, and Swami Veda Bharati as well as Vamadevas own insights. It challenges popular ideas of the meaning of Yoga and brings Yoga back to the vision of the ancient Himalayan Rishis.
