

Conflict Analysis Tools Eth Z Rich

Recognizing the pretentiousness ways to get this book **Conflict Analysis Tools Eth Z Rich** is additionally useful. You have remained in right site to start getting this info. acquire the Conflict Analysis Tools Eth Z Rich associate that we present here and check out the link.

You could buy guide Conflict Analysis Tools Eth Z Rich or get it as soon as feasible. You could speedily download this Conflict Analysis Tools Eth Z Rich after getting deal. So, subsequent to you require the books swiftly, you can straight acquire it. Its in view of that extremely simple and in view of that fats, isnt it? You have to favor to in this circulate

[Handbook on Constructing Composite Indicators: Methodology and User Guide](#) - OECD 2008-08-22

A guide for constructing and using composite indicators for policy makers, academics, the media and other interested parties. In particular, this handbook is concerned with indicators which compare and rank country performance.

[Handbook of Conflict Analysis and Resolution](#) - Dennis J.D. Sandole 2008-07-31

This major new Handbook is a collection of work from leading scholars in the Conflict Analysis and Resolution (CAR) field. The central theme is the value of interdisciplinary approaches to the analysis and resolution of conflicts.

Contemporary Debates on Terrorism - Richard Jackson 2018-09-03

Contemporary Debates on Terrorism is an innovative textbook, addressing a number of key issues in terrorism studies from both traditional and 'critical' perspectives. This second edition has been revised and updated to cover contemporary issues such as the rise of ISIL and cyberterrorism. In recent years, the terrorism studies field has grown in quantity and quality, with a growing number of scholars rooted in various professional disciplines beginning to debate the complex dynamics underlying this category of violence. Within the broader field, there are a number of identifiable controversies and questions which divide scholarly opinion and generate opposing arguments. These relate to theoretical issues, such as the definition of terrorism and state terrorism, substantive issues like the threat posed by al Qaeda/ISIL and the utility of different responses to terrorism, different pathways leading people to engage in terrorist tactics and ethical issues such as the use of drones. This new edition brings together in one place many of the field's leading scholars to debate the key issues relating to a set of 16 important controversies and questions. The format of the volume involves a leading scholar taking a particular position on the controversy, followed by an opposing or alternative viewpoint written by another scholar. In addition to the pedagogic value of allowing students to read opposing arguments in one place, the volume will also be important for providing an overview of the state of the field and its key lines of debate. This book will be essential reading for students of terrorism studies and political violence, critical terrorism studies, security studies and IR in general.

[Using Conflict Theory](#) - Otomar J. Bartos 2002-07-15

Human conflict from family feuds, to labor strikes, to national warfare is an ever-present and universal social problem and the methods to manage it, a challenge for everyone, from average citizens to policymakers and social theorists. Using Conflict Theory will educate students about how, under what conditions, and why conflict erupts, and how it can be managed. It is a unique classroom book blending theory and practical application and the first to bridge for students the science of social theory and the art of practice.

Inequality, Grievances, and Civil War - Lars-Erik Cederman 2013-08-26

This book argues that political and economic inequalities following group lines generate grievances that in turn can motivate civil war. Lars-Erik Cederman, Kristian Skrede Gleditsch, and Halvard Buhaug offer a theoretical approach that highlights ethnonationalism and how the relationship between group identities and inequalities are fundamental for successful mobilization to resort to violence. Although previous research highlighted grievances as a key motivation for political violence, contemporary research on civil war has largely dismissed grievances as irrelevant, emphasizing instead the role of opportunities. This book shows that the alleged non-results for grievances in previous research stemmed primarily from atheoretical measures, typically based on individual data. The authors develop new indicators of political and economic exclusion at the group level, and show that these exert strong effects on the risk of civil war. They provide new analyses of the effects of transnational ethnic links and the duration of civil wars, and extended case discussions illustrating causal mechanisms.

[Practical Peacemaking](#) - Mark Anstey 1993

Intended as a quick reference for practitioners and for use in training, this book explores some of the differences and similarities of the mediation process across fields and provides practical guidelines for intervention.

Children and Youth on the Front Line - Jo Boyden 2005

This series reflects the multidisciplinary nature of the field and includes within its scope international law, anthropology, medicine, geopolitics, social psychology and economics.

Identity and Conflict - G. M. Tamas 1995

Debriefing Mediators to Learn from Their Experiences - Simon J. A. Mason 2010

The goal of this handbook is to enhance the practice of mediation by showing how lessons from individual mediators can be identified and made available both to their home organization (e.g., a foreign ministry, intergovernmental organization, or nongovernmental organization) and to a wider practitioner audience. More particularly, the handbook gives guidance to staff debriefing mediators who are or have been directly involved in peace negotiations. The focus here is not on self-assessments by the mediators themselves, nor on evaluations of the mediator's performance by external donors, nor on political or psychological debriefing. Instead, this handbook examines methodological debriefing: that is, interviews conducted with the goal of learning lessons about the mediation method from the experience of a specific mediator that are useful for future mediation processes. Methodological debriefing is typically conducted by individuals who have not been directly involved in the mediator's work and who do not seek to judge it but who want to learn the mediator's perspective on what was done and why it was done. Ideally, the mediator will also benefit from the interview by discovering something new through the questions posed, by having the opportunity to recount a challenging experience, or at least by having her or his experiences documented in a structured and objective manner.

Conflict: Human Needs Theory - J. Burton 1993-09-28

The second part of a set of four volumes seeking to provide an historical and theoretical perspective for consideration of theory and practice in conflict resolution and prevention. The other volumes cover resolution and prevention, and readings and practices in management and resolution.

The Handbook of Conflict Resolution - Morton Deutsch 2006-09-18

The Handbook of Conflict Resolution, Second Edition is written for both the seasoned professional and the student who wants to deepen their understanding of the processes involved in conflicts and their knowledge of how to manage them constructively. It provides the theoretical underpinnings that throw light on the fundamental social psychological processes involved in understanding and managing conflicts at all levels—interpersonal, intergroup, organizational, and international. The Handbook covers a broad range of topics including information on cooperation and competition, justice, trust development and repair, resolving intractable conflict, and working with culture and conflict. Comprehensive in scope, this new edition includes chapters that deal with language, emotion, gender, and personal implicit theories as they relate to conflict.

Managing Conflict in Organizations - M. Afzalur Rahim 2017-07-12

After much debate by business professionals, organizational conflict is now considered normal and legitimate; it may even be a positive indicator of effective organizational management. Within certain limits, conflict can be essential to productivity. This book contributes to the investigation of organizational conflict by analyzing its origins, forms, benefits, and consequences. Conflict has benefits: it may lead to solutions to problems, creativity, and innovation. In contrast, little or no conflict in organizations may lead to stagnation, poor decisions, and ineffectiveness. Managing Conflict in Organizations is a vigorous analysis

of the rational application of conflict theory in organizations. Conflict is inevitable among humans. It is a natural outcome of human interaction that begins when two or more social entities engage one another while striving to attain their own objectives. Relationships among people or organizations become incompatible or inconsistent when two or more of them desire a similar resource that is in short supply; when they do not share behavioral preferences regarding their joint action; or when they have different attitudes, values, beliefs, and skills. This book examines these root causes of organizational conflict and offers constructive perspectives on its consequences.

Environmental Security - Rita Floyd 2013

Economic development, population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways. The field of environmental security has matured in response to improved scientific understanding of the causes and trends of global environmental change. Research conducted in the past two decades has grappled with this core set of questions in a variety of ways, generating findings and hypotheses that have stimulated considerable intellectual and policy activity. This volume takes stock of the research, and organizes it into a framework, described in the first chapter of the volume, that clarifies its achievements as well as identifies its weaknesses and gaps. This is followed by seven chapters representing the various ways in which environmental change and security have been linked, and including the principal critiques of this linkage. A third section explores six key issue areas: water, population, development, food, energy and climate change. The book concludes with a chapter on the future of environmental security.

Pathways for Peace - United Nations;World Bank 2018-04-13

Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations+World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

Alternative Assets and Cryptocurrencies - Christian Hafner 2019-07-26

Alternative assets such as fine art, wine, or diamonds have become popular investment vehicles in the aftermath of the global financial crisis. Correlation with classical financial markets is typically low, such that diversification benefits arise for portfolio allocation and risk management. Cryptocurrencies share many alternative asset features, but are hampered by high volatility, sluggish commercial acceptance, and regulatory uncertainties. This collection of papers addresses alternative assets and cryptocurrencies from economic, financial, statistical, and technical points of view. It gives an overview of their current state and explores their properties and prospects using innovative approaches and methodologies.

Strategic Theory for the 21st Century: The Little Book on Big Strategy - Dr. Harry R. Yarger 2006

Strategy for the nation-state is neither simple nor easy. Good strategy demands much of the military professional whether he is formulating, articulating, evaluating, or executing strategy. Few do it well. It requires

the professional to step out of the planning mind set and adopt one more suited for the strategic environment. This is particularly true in periods of great change and turmoil when a successful military strategy must be closely integrated with and may depend on other national strategies of the interagency community. A theory of strategy helps in this transition by educating the professional and disciplining his thinking in any of his roles. This monograph advances a theory of strategy that provides essential terminology and definitions, explanations of the underlying assumptions and premises, and substantive hypotheses that explain the nature of the strategic environment and the role and expectations of strategy. The environment is explained in theoretical and practical terms, and the implications for strategic thinking are developed with a distinction being made between strategy and planning mind sets. The typical problems practitioners have in formulating and articulating strategy are discussed. Strategy formulation is recognized as both an art and science, and the U.S. Army War College strategy model of ends, ways, and means is expounded on and advocated as a methodology for articulating strategies.

Handbook of Megacities and Megacity-Regions - Danielle Labbé 2020-09-25

Exploring the importance of megacities and megacity-regions as one of the defining features of the 21st century, this Handbook provides a clear and comprehensive overview of current thinking and debates from leading scholars in the field. Highlighting major current challenges and dimensions of megaurbanization, chapters form a thematic focus on governance, planning, history, and environmental and social issues, supported by case studies from every continent.

Conflict, Security and the Reshaping of Society - Alessandro Dal Lago 2010-07-13

A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book is an examination of the effect of contemporary wars (such as the 'War on Terror') on civil life at a global level. Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare, particular those in which terrorists or insurgents are involved (for example, the 'revolution in military affairs', 'small wars', and so on). On the other hand, today's research on security is focused, among other themes, on the effects of the war on terrorism, and on civil liberties and social control. This volume connects these two fields of research, showing how 'war' and 'security' tend to exchange targets and forms of action as well as personnel (for instance, the spreading use of private contractors in wars and of military experts in the 'struggle for security') in modern society. This shows how, contrary to Clausewitz's belief war should be conceived of as a "continuation of politics by other means", the opposite statement is also true: that politics, insofar as it concerns security, can be defined as the 'continuation of war by other means'. This book will be of much interest to students of critical security studies, war and conflict studies, terrorism studies, sociology and IR in general. Salvatore Palidda is Professor of Sociology in the Faculty of Education at the University of Genoa. Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa.

Cryptocurrency Transaction Analysis From a Network Perspective - Zhong-Yuan Zhang 2022-08-19

The General Theory of Employment Interest and Money - John Maynard Keynes 1998

Coordination in Human and Primate Groups - Margarete Boos 2011-01-03

Coordination in Human and Primate Groups presents one of the first collections of the different approaches and methods used to assess coordination processes in groups. Written by psychologists and primatologists, the book represents a broad range of coordination research fields such as social psychology, work and organizational psychology, medicine, primatology, and behavioural ecology. It is designed for researchers and practitioners interested in understanding the behavioural aspects of group coordination.

Introducing Ethereum and Solidity - Chris Dannen 2017-03-16

Learn how to use Solidity and the Ethereum project - second only to Bitcoin in market capitalization. Blockchain protocols are taking the world by storm, and the Ethereum project, with its Turing-complete scripting language Solidity, has rapidly become a front-runner. This book

presents the blockchain phenomenon in context; then situates Ethereum in a world pioneered by Bitcoin. See why professionals and non-professionals alike are honing their skills in smart contract patterns and distributed application development. You'll review the fundamentals of programming and networking, alongside its introduction to the new discipline of crypto-economics. You'll then deploy smart contracts of your own, and learn how they can serve as a back-end for JavaScript and HTML applications on the Web. Many Solidity tutorials out there today have the same flaw: they are written for "advanced" JavaScript developers who want to transfer their skills to a blockchain environment. Introducing Ethereum and Solidity is accessible to technology professionals and enthusiasts of all levels. You'll find exciting sample code that can move forward real world assets in both the academic and the corporate arenas. Find out now why this book is a powerful gateway for creative technologists of all types, from concept to deployment. What You'll Learn See how Ethereum (and other cryptocurrencies) work Compare distributed apps (dapps) to web apps Write Ethereum smart contracts in Solidity Connect Ethereum smart contracts to your HTML/CSS/JavaScript web applications Deploy your own dapp, coin, and blockchain Work with basic and intermediate smart contracts Who This Book Is For Anyone who is curious about Ethereum or has some familiarity with computer science Product managers, CTOs, and experienced JavaScript programmers Experts will find the advanced sample projects in this book rewarding because of the power of Solidity

The Moral Imagination - John Paul Lederach 2010

Originally published in hardcover in 2005.

SCION: A Secure Internet Architecture - Adrian Perrig 2017-10-13

This book describes the essential components of the SCION secure Internet architecture, the first architecture designed foremost for strong security and high availability. Among its core features, SCION also provides route control, explicit trust information, multipath communication, scalable quality-of-service guarantees, and efficient forwarding. The book includes functional specifications of the network elements, communication protocols among these elements, data structures, and configuration files. In particular, the book offers a specification of a working prototype. The authors provide a comprehensive description of the main design features for achieving a secure Internet architecture. They facilitate the reader throughout, structuring the book so that the technical detail gradually increases, and supporting the text with a glossary, an index, a list of abbreviations, answers to frequently asked questions, and special highlighting for examples and for sections that explain important research, engineering, and deployment features. The book is suitable for researchers, practitioners, and graduate students who are interested in network security.

All the World's a Stage - Hemda Ben-Yehuda 2020-09-16

Classroom role-playing simulations bring the drama of politics to life and enrich traditional learning by plunging students into the midst of historical or current events. Ben-Yehuda gives students and instructors the resources and confidence to embark on a careful enactment of scenarios that will inspire enthusiasm in participants and stick in the memory long after the curtain falls. The book includes in-depth discussions of three possible theatrical simulations: appeasement in 1938 Munich, the regional turmoil following the 1947 UN Palestine Partition decision, and the Syrian civil war and ongoing global confrontation with ISIS. It is appropriate for students in global studies courses at all levels.

Theories of Violent Conflict - Jolle Demmers 2016-08-10

This revised and updated second edition introduces students of violent conflict to a variety of prominent theoretical approaches, and examines the ontological stances and epistemological traditions underlying these approaches. *Theories of Violent Conflict* takes the centrality of the 'group' as an actor in contemporary conflict as a point of departure, leaving us with three main questions: • What makes a group? • Why and how does a group resort to violence? • Why and how do or don't they stop? The book examines and compares the ways by which these questions are addressed from a number of perspectives: primordialism/constructivism, social identity theory, critical political economy, human needs theory, relative deprivation theory, collective action theory and rational choice theory. The final chapter aims to synthesize structure and agency-based theories by proposing a critical discourse analysis of violent conflict. With new material on violence, religion, extremism and military urbanism, this book will be essential reading for students of war and conflict studies, peace studies, conflict analysis and conflict resolution, and ethnic conflict, as well as security studies and IR in general.

Preparing For Peace - John Paul Lederach 2015-02-01

Since the early 1980s John Paul Lederach has traveled worldwide as a mediation trainer and conflict resolution consultant. Currently the director of the International Conciliation Committee, he has worked with governments, justice departments, youth programs, and other groups in Latin America, the Philippines, Cambodia, as well as Asia and Africa. Lederach blends a special training method in mediation with a tradition derived from his work in development. Throughout the book, he uses anecdote and pertinent experiences to demonstrate his resolution techniques. With an emphasis on the exchange involved in negotiation, Lederach conveys the key to successful conflict resolution: understanding how to guide disputants, transform their conflicts, and launch a process that empowers them.

Women and the War on Boko Haram - Hilary Matfess 2017-11-15

For over a decade, Boko Haram has waged a campaign of terror across northeastern Nigeria. In 2014, the kidnapping of 276 girls in Chibok shocked the world, giving rise to the #BringBackOurGirls movement. Yet Boko Haram's campaign of violence against women and girls goes far beyond the Chibok abductions. From its inception, the group has systematically exploited women to advance its aims. Perhaps more disturbing still, some Nigerian women have chosen to become active supporters of the group, even sacrificing their lives as suicide bombers. These events cannot be understood without first acknowledging the long-running marginalisation of women in Nigerian society. Having conducted extensive fieldwork throughout the region, Hilary Matfess provides a vivid and thought-provoking account of Boko Haram's impact on the lives of Nigerian women, as well as the wider social and political context that fuels the group's violence.

Genes, Trade, and Regulation - Thomas Bernauer 2003

This book provides novel and thought-provoking insights into the fundamental policy issues involved in agricultural biotechnology. Thomas Bernauer explains global regulatory polarization and trade conflict in this area. He then evaluates co-operative and unilateral policy tools for coping with trade tensions. Arguing that the tools used thus far have been and will continue to be ineffective, he concludes that the risk of a full-blown trade conflict is high and may lead to reduced investment and the decline of the technology. Bernauer concludes with suggestions for policy reforms to halt this trajectory - recommendations that strike a balance between public-safety concerns and private economic freedom - so that food biotechnology is given a fair chance to prove its environmental, health, humanitarian and economic benefits.

Generalisation of Geographic Information - William A. Mackaness 2011-07-28

Theoretical and Applied Solutions in Multi Scale Mapping Users have come to expect instant access to up-to-date geographical information, with global coverage--presented at widely varying levels of detail, as digital and paper products; customisable data that can readily combined with other geographic information. These requirements present an immense challenge to those supporting the delivery of such services (National Mapping Agencies (NMA), Government Departments, and private business. *Generalisation of Geographic Information: Cartographic Modelling and Applications* provides detailed review of state of the art technologies associated with these challenges, including the most recent developments in cartometric analysis techniques able to support high levels of automation among multi scale derivation techniques. The book illustrates the application of these ideas within existing and emerging technologies. In addition to providing a comprehensive theoretical underpinning, the book demonstrates how theoretical developments have translated into commercial systems deployed within NMAs. The book explores relevance of open systems in support of collaborative research and open source web based map services. State of the art review on multi scale representation techniques Detailed consideration of database requirements and object modeling in support of emerging applications (3D, mobile) and innovative delivery (map generalisation services) Illustration through existing map production environment implementations Consolidated bibliography (680 entries), 200 illustrations, author and subject index

The Second Media Age - Mark Poster 2018-03-08

This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".

Peace and Conflict 2014 - Paul K. Huth 2016-09-16

Peace and Conflict is a biennial publication that provides cutting-edge data and analysis concerning domestic and international conflicts and

corresponding peacebuilding activities. The book includes forecasts of risks of political and social instability, as well as trends and patterns in conflict. The 2014 edition focusses on the 'micro level' in the study of conflict and peacebuilding, such as social relationships below the level of the nation-state, with attention to key topics such as ethnicity, climate change, foreign aid and sexual violence. *Peace and Conflict* is a large-format, full-color resource with numerous graphs, tables, maps, and appendices dedicated to the visual and summary presentation of information. Crisp narratives are highlighted with pull-quote extracts emphasizing major findings.

World Social Report 2020 - Department of Economic and Social Affairs 2020-02-14

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Freedom from Fear, Freedom from Want - Robert J. Hanlon 2016-05-18
Adopting an interdisciplinary perspective, *Freedom from Fear, Freedom from Want* is a brief introduction to human security, conflict, and development. The book analyzes such key human security issues as climate change, crimes against humanity, humanitarian intervention, international law, poverty, terrorism, and transnational crime, among others. The authors encourage readers to critically assess emerging threats while evaluating potential mechanisms of deterrence such as conflict resolution, economic development, diplomacy, peacekeeping, international law, and restorative justice. Concise yet comprehensive, *Freedom from Fear, Freedom from Want* is an ideal text for human security courses.

Choice - 2002

The Crowd - Gustave Le Bon 1897

Governance, Natural Resources and Post-Conflict Peacebuilding - Carl Bruch 2016-04-07

When the guns are silenced, those who have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but governance failures often jeopardize such efforts. This book examines the theory,

practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development, while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts; illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives; and presents an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students. Governance, Natural Resources, and Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources, land, water, livelihoods, and assessing and restoring natural resources.

International Handbook on Risk Analysis and Management - Beat Habegger 2008

Advanced Dynamics - Donald T. Greenwood 2003

Advanced Dynamics is a broad and detailed description of the analytical tools of dynamics as used in mechanical and aerospace engineering. The strengths and weaknesses of various approaches are discussed, and particular emphasis is placed on learning through problem solving. The book begins with a thorough review of vectorial dynamics and goes on to cover Lagrange's and Hamilton's equations as well as less familiar topics such as impulse response, and differential forms and integrability. Techniques are described that provide a considerable improvement in computational efficiency over the standard classical methods, especially when applied to complex dynamical systems. The treatment of numerical analysis includes discussions of numerical stability and constraint stabilization. Many worked examples and homework problems are provided. The book is intended for use on graduate courses on dynamics, and will also appeal to researchers in mechanical and aerospace engineering.

The Political Economy of the Kashmir Conflict - Wajahat Habibullah 2004
