

Verso Una Civiltà Delle Descrescita Prospettive Sulla Transizione

When people should go to the books stores, search introduction by shop, shelf by shelf, it is in point of fact problematic. This is why we allow the books compilations in this website. It will definitely ease you to see guide **Verso Una Civiltà Delle Descrescita Prospettive Sulla Transizione** as you such as.

By searching the title, publisher, or authors of guide you really want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you strive for to download and install the Verso Una Civiltà Delle Descrescita Prospettive Sulla Transizione , it is utterly simple then, in the past currently we extend the colleague to buy and make bargains to download and install Verso Una Civiltà Delle Descrescita Prospettive Sulla Transizione hence simple!

Sustainable Development Report 2021 - Jeffrey Sachs 2021-10-14

The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core. [What is Circular Economy](#) - Emanuele Bompan 2021

Quaderni di sociologia - 1951

Developing Corporate Social Responsibility - Francesco Perrini 2006-01-01

'Perrini et al provide a detailed, authoritative look at the evolving European perspective on corporate social responsibility. They show how Europe has moved from follower status to leading edge practice. The book is the best current indicator of what the next stages of CSR will look like.' - Thomas W. Dunfee, University of Pennsylvania, US The rapidly increasing attention devoted to Corporate Social Responsibility (CSR) has resulted in the term 'CSR' being applied to myriad dissimilar phenomena. The authors therefore aim to dispel this confusion by presenting a multi-faceted view of socially responsible corporate behavior and related themes. They provide a conceptualization of CSR that emphasizes the role of the adoption and implementation of specific CSR strategies and their impact on corporate social and economic performance. **La Critica testuale greco-latina, oggi** - Istituto universitario orientale (Naples, Italy). Seminario di studi del mondo classico 1981

[Produzione e consumo verso la green economy](#) - Valentina Castellani 2013

[The Sixth Extinction](#) - Richard E. Leakey 1996

A Brilliant explanation and celebration of "biodiversity", informed by the personal and first-hand experience of the world-famous scientist.

Pluriverse - Ashish Kothari 2019

This is a collection of over a hundred essays on alternatives to the dominant processes of globalized development, including its structural roots in modernity, capitalism, state domination, and masculinist values. The book presents views and practices from around the world in a collective search for an ecologically and socially just world.

Who Cares? - Joan C. Tronto 2015-10-30

The 2015 winner of the Brown Democracy Medal, Joan C. Tronto, argues in Who Cares? that we need to rethink American democracy, as well as our own fundamental values and commitments, from a caring

perspective. Asserting that Americans are facing a "caring deficit"—that there are simply too many demands on our time to care adequately for children, elderly people, and ourselves—she asks us to reconsider how we allocate care responsibilities. At the same time, while democratic politics should help citizens to care better, most people see caring as unsupported by public life and deem the concerns of politics as too remote from their lives to make a difference in this sphere. Tronto traces the reasons for this disconnect and argues for the need to make care, not economics, the central concern of democratic political life.

Seneca the Elder and His Rediscovered ›Historiae ab initio bellorum civilium‹ - Maria Chiara Scappaticcio 2020-06-08

The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's Historiae. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the Historiae of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's Historiae greatly contribute.

The Case for Degrowth - Giorgos Kallis 2020-09-29

The relentless pursuit of economic growth is the defining characteristic of contemporary societies. Yet it benefits few and demands monstrous social and ecological sacrifice. Is there a viable alternative? How can we halt the endless quest to grow global production and consumption and instead secure socio-ecological conditions that support lives worth living for all? In this compelling book, leading experts Giorgos Kallis, Susan Paulson, Giacomo D'Alisa and Federico Demaria make the case for degrowth - living well with less, by living differently, prioritizing wellbeing, equity and sustainability. Drawing on emerging initiatives and enduring traditions around the world, they advance a radical degrowth vision and outline policies to shape work and care, income and investment that avoid exploitative and unsustainable practices. Degrowth, they argue, can be achieved through transformative strategies that allow societies to slow down by design, not disaster. Essential reading for all concerned citizens, policy-makers, and students, this book will be an important contribution to one of the thorniest and most pressing debates of our era.

Climate Wars - Gwynne Dyer 2010

From one of the world's great geopolitical analysts, here is a terrifying glimpse of the none-too-distant future, when climate change will force the world's powers into a desperate struggle for advantage and even survival. Dwindling resources. Massive population shifts. Natural disasters. Spreading epidemics. Drought. Rising sea levels. Plummeting agricultural yields. Crashing economies. Political extremism. These are some of the expected consequences of runaway climate change in the decades ahead, and any of them could tip the world towards conflict. Prescient, unflinching, and based on exhaustive research and interviews, *Climate Wars* promises to be one of the most important books of the coming years.

The Right to Useful Unemployment and Its Professional Enemies - Ivan Illich 1996

In this postscript to *Tools for Creativity*, Illich calls for the right to useful unemployment: a positive, constructive, and even optimistic concept dealing with that activity by which people are useful to themselves and others outside the production of commodities for the market. Unfettered by managing professionals, unmeasured and unmeasurable by economists, these activities truly generate satisfaction, creativity, and freedom.

The Subsistence Perspective - Maria Mies 1999

First published in Germany in 1997 as 'Eine Kuh für Hillary: Die Subsistenzperspektive'. Provides an alternative to the current global free market industrial system, by calling for a new economics and politics based on a subsistence perspective. Explains subsistence as empowerment based on people's strength and cooperation. Analyses recent feminist politics and argues that the fight for equality with men has failed to make an egalitarian society. Includes case studies from Africa, Latin America and Europe, references and an index. Mies is professor of sociology at the Fachhochschule, Cologne. Bennholdt-Thomsen is director of the institute of the theory and praxis of subsistence, Bielefeld, Germany.

Green Economy Reader - Stanislav Shmelev 2016-09-22

State of the art in sustainability thinking, inspired by interdisciplinary ideas of ecological economics. This book is focusing on sustainability pathways, new economic theory, democracy and institutions, multidimensional assessment of sustainability, macroeconomic modelling and policies, climate change and renewable energy, resource flows and circular economy, regenerative cities, environmental conflicts and values. It will be helpful for MSc and PhD students in Economics, Management, Environmental Change, Ecological Economics, Development Economics, Sustainability and practitioners in business, international and nongovernmental organizations. Rich, diverse and thought provoking collection of top level contributions, it will help to facilitate the transition towards sustainability and educational reform. A fabulous composition of papers by the authors who really count! Ernst von Weizsäcker, The Club of Rome The authors present a refreshing perspective on the possibilities of human progress in harmony with nature, without the need for economic growth to secure long term human welfare and wise use of nature's services. Extremely relevant. Peter May, Past President, International Society for Ecological Economics and Professor, UFRRJ, Rio de Janeiro, Brazil The book goes well beyond the Green Economy, offering arguments and blueprints for a complete makeover of the current economic system. With multi- and interdisciplinary contributions ranging from moderately to fundamentally critical of current economics, it raises fundamental questions of value and power, draws on a wide range of theories, opens the eyes for the historical processes that brought about the current crises and demonstrates the value of ecological, but also classical economic thinking to their solution. If better politics require better theories, this is a must read for academics and decision makers in the time of climate crisis. Joachim Spangenberg, Sustainable Europe Research Institute, SERI Germany e.V.

Nature, Economy and Society - Nilanjan Ghosh 2015-09-01

This book presents an enquiry into the interface between nature, economy and society, which is still in its early stages, notwithstanding the commendable progress and advances made in the field of environmental and natural resource economics within the ever-expanding boundaries of economics as a discipline. It further delineates the evolution of an inter-disciplinary framework for analyzing the status, the future goals, mechanisms and policy instruments that can help move towards a more ecologically sustainable, economically beneficial and socially just future. A pre-requisite for preparing a comprehensive and coherent framework involves unfolding the multiple layers of interconnectedness between the three systems nature,

economy and society, each of which has its own internal consistencies as well as externalities. Against this backdrop, the book presents scholarly contributions that focus on four broadly defined building blocks, namely: i) accounting for ecosystems services for life and human well-being; ii) impacts of economic growth on ecosystems; iii) social norms, equity, and governance; and iv) alternative approaches to green and socio-economic systems. The analyses, presented by some of the most eminent national and international scholars, address the major environmental challenges that nations around the world face today and consider which specific policy directions at the international and national level are needed. In particular, the choices India and South Asia now face, as development and environment both need to be addressed adequately, touch on many of these challenges.

Degrowth - Giacomo D'Alisa 2014-11-13

Degrowth is a rejection of the illusion of growth and a call to repoliticize the public debate colonized by the idiom of economism. It is a project advocating the democratically-led shrinking of production and consumption with the aim of achieving social justice and ecological sustainability. This overview of degrowth offers a comprehensive coverage of the main topics and major challenges of degrowth in a succinct, simple and accessible manner. In addition, it offers a set of keywords useful for intervening in current political debates and for bringing about concrete degrowth-inspired proposals at different levels - local, national and global. The result is the most comprehensive coverage of the topic of degrowth in English and serves as the definitive international reference. More information at: vocabulary.degrowth.org View the author spotlight featuring events and press related to degrowth at <http://t.co/k9qbQpyuYp>.

Shadow Work - Ivan Illich 1981

Combines historical and economic perspectives to examine the economic existence of modern man, the war against subsistence, and shadow work--the underpaid work which is unique to an industrial economy

Women, Development, and Labor of Reproduction - Mariarosa Dalla Costa 1999

A follow up to *Paying the Price*, this volume of essays represents an international, feminist, and non-capitalistic approach to the critical subject of reproductive politics.

Urban Politics Now - BAVO. 2007

Text by Slavoj Žižek, Edward Soja, Juliet Flower MacCannell, Neil Smith, Dieter Lesage.

Archeologia - 1983

World of the Gift - Jacques T. Godbout 1998-10-21

The anthropologist Marcel Mauss, in his famous exploration of the gift in "primitive" and archaic societies, showed that the essential aspect of the exchange of presents involved the establishment of a social tie that bound the parties together above and beyond any material value of the objects exchanged. He argued that these intangible mutual "debts" constituted the social fabric. Godbout and Caillé show that, contrary to the modern assumption that societies function on the basis of market exchange and the pursuit of self-interest, the gift still constitutes the foundation of our social fabric. The authors describe the gift not as an object but as a social connection, perhaps the most important social connection because it creates a sense of obligation to respond in kind. They examine the gift in a broad range of cases such as blood and organ donation; volunteer work; the bonds between friends, couples, and family; Santa Claus; the interaction between performers and their audience; and the relation of the artist to society. Written in an engaging manner, *The World of the Gift* will appeal to anyone who is interested in how the world really operates.

Deglobalization - Walden F. Bello 2006

Green Growth - Gareth Dale 2016-02-15

The discourse of 'green growth' has recently gained ground in environmental governance deliberations and policy proposals. It is presented as a fresh and innovative agenda centred on the deployment of engineering sophistication, managerial acumen and market mechanisms to redress the environmental and social derelictions of the existing development model. But the green growth project is deeply inadequate, whether assessed against criteria of social justice or the achievement of sustainable economic life upon a materially finite planet. This volume outlines three main lines of critique. First, it traces the development of the green growth discourse qua ideology. It asks: what explains modern society's investment in it, why has it emerged

as a master concept in the contemporary conjuncture, and what social forces does it serve? Second, it unpicks and explains the contradictions within a series of prominent green growth projects. Finally, it weighs up the merits and demerits of alternative strategies and policies, asking the vital question: 'if not green growth, then what?'

Towards an Inclusive Democracy - Takis Fotopoulos 1997-05-01

An analysis of the growth economy, this book traces the causes of the present crisis in the modern market system, initiated two centuries ago with the establishment of the market economy system which has led to the present growth economy. It concludes that a true democracy can only be derived from a synthesis of the democratic and socialist traditions, along with the radical green, feminist and libertarian ideologies. To this end, this text offers a new vision of an inclusive democracy.

La Politica familiare in Europa - Centro internazionale studi famiglia 1981

Earthmasters - Clive Hamilton 2013-02-15

DIVThis book goes to the heart of the unfolding reality of the twenty-first century: international efforts to reduce greenhouse gas emissions have all failed, and before the end of the century Earth is projected to be warmer than it has been for 15 million years. The question "can the crisis be avoided?" has been superseded by a more frightening one, "what can be done to prevent the devastation of the living world?" And the disturbing answer, now under wide discussion both within and outside the scientific community, is to seize control of the very climate of the Earth itself./divDIV /divDIVClive Hamilton begins by exploring the range of technologies now being developed in the field of geoengineering--the intentional, enduring, large-scale manipulation of Earth's climate system. He lays out the arguments for and against climate engineering, and reveals the extent of vested interests linking researchers, venture capitalists, and corporations. He then examines what it means for human beings to be making plans to control the planet's atmosphere, probes the uneasiness we feel with the notion of exercising technological mastery over nature, and challenges the ways we think about ourselves and our place in the natural world./div

Gandhi - Roberto Mancini 2020-10-28T00:00:00+01:00

La via della nonviolenza percorsa da Gandhi e la prospettiva della decrescita sono accomunate dal fatto di costituire un'interruzione salvifica. Infatti l'una e l'altra (ciascuna con la sua storia e a suo modo), interrompono la spirale della mentalità tipica della globalizzazione capitalista - fatta di nichilismo, di angoscia accecante, di logica di potere e di economicismo - per aprire invece un orizzonte completamente differente e umanizzante. In entrambi i casi si tratta di «uscire dall'economia» in quanto ogni soggetto non può orientare la propria esistenza semplicemente sulla centralità della risposta ai bisogni materiali, del lavoro o del denaro. Il valore e le espressioni dell'esistenza originale di ciascuno vengono prima dell'economia e vanno ben al di là di essa.

Restauro architettonico - Letizia Galli 2020-08-12T00:00:00+02:00

Il restauro architettonico non è disciplina di certezze: non è affrontabile con un metodo in genere condiviso e confortante come accade, solitamente, dovendo calcolare l'armatura di un pilastro o la portata di una tubazione. Il termine stesso ha subito nel tempo continue trasformazioni, rendendo ancor più complesso questo campo di competenze e di pratiche applicazioni. Bisogna pertanto accettare questa variabilità di significati per penetrare in un mondo così multiforme e spesso difficile, alla ricerca di conoscenza piuttosto che di verità. Da quando, sul finire del diciottesimo secolo, il restauro nasce come disciplina autonoma, l'urgenza di darvi uno statuto è stata espressa da studiosi molto diversi tra loro: architetti, ingegneri, storici, filosofi. Ciascuno ha proposto tesi e principi partendo dalla specificità della propria formazione, ma anche influenzato, certamente, dallo spirito dei tempi. Per queste ragioni chi desideri affrontare la lettura di questo libro, dei testi degli autori trattati non vi troverà formule univoche e vincenti, bensì innumerevoli occasioni d'arricchimento e di riflessione, basi fondamentali per questa disciplina che, nel suo carattere operativo, chiede una continua attenzione metodologica.

Learning with Adults - Peter Mayo 2014-01-06

This anthology brings together some of the finest writers on different aspects of adult education and related areas to provide a complementary reader to the introductory text by Leona English and Peter Mayo Learning with Adults: A Critical Introduction. Areas tackled include Disability, Prisons, Third Age

Universities, Lifelong Learning Policy, Learning Society, Poverty, LGBTQ, Sport, Women, Literacy, Transformative Learning, Community Arts, Aesthetics, Consumption, Migration, Libraries, Folk High Schools, Adult Education Policy, Subaltern Southern Social Movements, Social Creation, Community Radio, Social Film. Contexts focused on include Africa, Caribbean, Europe, Latin America, Asia (India), small island states. Over thirty authors involved including Zygmunt Bauman, Rosa Maria Torres, Oskar Negt, Antonia Darder, Jim Elmborg, D. W. Livingstone, Palle Rasmussen, Mae Shaw, Leona English, Asoke Bhattacharya, Cynthia L. Pemberton, Eileen Casey White, Daniel Schugurensky, Dip Kapoor, Peter Rule, John Myers, Joseph Giordmaina, Antonia De Vita, Alexis Kokkos, Marvin Formosa, Carmel Borg, Julia Preece, Patricia Cranton, Lyn Tett, Ali A. Abdi, Anna Maria Piussi, Behrang Foroughi, Taadi Ruth Modipa, Robert Hill, Edward Shiza, Kaela Jubas and Didacus Jules. ... Learning with Adults: A Reader constitutes the most valuable practical and theoretical reflection on adult education I have seen in a long time. Nelly P. Stromquist, Professor, International Education Policy, College of Education University of Maryland, College Park ... This book provides an opportunity at a very appropriate moment to discuss adult education issues during challenging times. Paula Guimarães, University of Lisbon ... Read and savour delights and surprises. Michael Welton, UBC and Athabasca University This book satisfies everything one could desire of a reader on the subject. Kenneth Wain, University of Malta

Agenda 21 locale - Ute Stoltenberg 2000

Treadmill of Production - Kenneth A. Gould 2015-11-17

Schnaiberg's concept of the treadmill of production is arguably the most visible and enduring theory to emerge in three decades of environmental sociology. Elaborated and tested, it has been found to be an accurate predictor of political-economic changes in the global economy. In the global South, it has figures prominently in the work of structural environmental analysts and has been used by many political-economic movements. Building new extensions and applications of the treadmill theory, this new book shows how and why northern analysts and governments have failed to protect our environment and secure our future. Using an empirically based political-economic perspective, the authors outline the causes of environmental degradation, the limits of environmental protection policies, and the failures of institutional decision-makers to protect human well-being.

Introduction to Medieval History - Paolo Delogu 2002-09-26

An introduction to the sources, methods and theories most used by historians, this book explores the origins of the idea of the 'middle ages' and its development in Renaissance and modern European historical discourse, the problem of periodisation and the principal themes of modern historiography.

The Individual without Passions - Elena Pulcini 2012-08-09

The innovative characteristic of the book lies in its tackling the topic of individualism from the original point of view of a theory of passions. It underlines the importance of the problem of the passions both in forming individual identity and building the social bond. It proposes to contrast the pathological effects of egoistical passions (acquisitive passion and passion of the Self), which are dominant in modernity, with empathetic and solidaristic passions, exemplified in the phenomenon of the gift.

Laudato Si' - Pope Francis 2020-10-06

Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

Human Enhancement - Julian Savulescu 2009-01-22

To what extent should we use technology to try to make better human beings? Because of the remarkable advances in biomedical science, we must now find an answer to this question. Human enhancement aims to increase human capacities above normal levels. Many forms of human enhancement are already in use. Many students and academics take cognition enhancing drugs to get a competitive edge. Some top athletes boost their performance with legal and illegal substances. Many an office worker begins each day with a dose of caffeine. This is only the beginning. As science and technology advance further, it will become increasingly possible to enhance basic human capacities to increase or modulate cognition, mood,

personality, and physical performance, and to control the biological processes underlying normal aging. Some have suggested that such advances would take us beyond the bounds of human nature. These trends, and these dramatic prospects, raise profound ethical questions. They have generated intense public debate and have become a central topic of discussion within practical ethics. Should we side with bioconservatives, and forgo the use of any biomedical interventions aimed at enhancing human capacities? Should we side with transhumanists and embrace the new opportunities? Or should we perhaps plot some middle course? Human Enhancement presents the latest moves in this crucial debate: original contributions from many of the world's leading ethicists and moral thinkers, representing a wide range of perspectives, advocates and sceptics, enthusiasts and moderates. These are the arguments that will determine how humanity develops in the near future.

Percorsi di filosofia della crisi ecologica - Mario Sirimarco 2012

Human Rights of Women - Rebecca J. Cook 2012-03-10

Rebecca J. Cook and the contributors to this volume seek to analyze how international human rights law applies specifically to women in various cultures worldwide, and to develop strategies to promote equitable

application of human rights law at the international, regional, and domestic levels. Their essays present a compelling mixture of reports and case studies from various regions in the world, combined with scholarly assessments of international law as these rights specifically apply to women.

Ecosocialism - Michael Löwy 2015-05-05

Praise for *On Changing the World*: "His collection of essays, combining scholarship with passion, impresses by its sweep and scope."—Daniel Singer Ecosocialists believe that the prevention of an unprecedented ecological catastrophe and the preservation of a natural environment favorable to human life are incompatible with the expansive and destructive logic of the capitalist system. The present collection of articles explores some of the main ecosocialist proposals and some concrete experiences of struggle, particularly in Latin America. Michael Löwy is emerit Research Director at the CNRS (National Center for Scientific Research). His books have been translated into twenty-nine languages.

Ecology and Democracy - Freya Mathews 1996-05-01

What is the optimal political framework for environmental reform - reform on a scale commensurate with the global ecological crisis? How adequate are liberal forms of parliamentary democracy to face the challenges posed? These are the questions pondered by the contributors to this volume.
