**Managing Multiple Sclerosis Naturally** - Judy Graham 2010-06-24

A totally revised and updated edition of the first book to offer a holistic approach to slowing the progression of MS • Provides guidance on special diets and nutritional supplements, exercise, alternative therapies, and the effects of negative and positive thoughts on MS • Explains how to reduce toxic overload from mercury and chemicals • Includes life wisdom and coping strategies from others who suffer with MS Judy Graham is an inspiration. Diagnosed with multiple sclerosis when she was just 26 years old, 35 years later Judy Graham is still walking, working, and has successfully birthed and raised a son who is now an adult. In this totally revised and updated edition of her groundbreaking Multiple Sclerosis, first published in 1984, she shares the natural treatments that have helped her and many others with MS stabilize or even reverse the condition. Beginning with the effects of diet, she explains that many people with MS have been eating the wrong foods and shows which foods are "good" and "bad," how to recognize food sensitivities, and how to correct nutritional deficiencies using dietary supplements. She also looks at reducing the body's toxic overload, whether from mercury amalgam fillings, chemicals, or medications. She presents the exercises with proven benefits for MS she has found most reliable and appropriate, such as yoga, pilates, and t'ai chi, and explores alternative therapies that provide relief and support to the body's efforts to control MS, including acupuncture, reflexology, shiatsu, reiki, and ayurveda. Most important are the insights she provides on the effects of negative thoughts on MS. She demonstrates how a positive mental attitude can actually slow down or even reverse the progression of this disease. Judy Graham is living proof that, as devastating as a diagnosis of MS is, life can still be lived to its fullest.

**Science in the Kitchen and the Art of Eating Well** - Pellegrino Artusi 2003-12-27

First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor – humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Little Green Kitchen - David Frenkiel 2019-04-04

Like most families, David and Luise know that the road to feeding your children isn't always a straight one. They have raised three kids while writing their acclaimed vegetarian cookbooks and have experienced a fair share of food tossed on the floor and soup bowls left untouched. But they have also learned ways around this. In this book they share their passion for cooking fun, modern, wholesome meals with kids' palates in mind, but that also are interesting enough for adults to enjoy. Take your own inspiration from their quest to bring joy back to the dinner table: whip up a batch of Dino Burgers (made with spinach, quinoa, oats and peas), Spinach Waffles, or Stuffed Rainbow Tomatoes with black rice, feta, raisins and cinnamon. This latest collection from will include more than 60 recipes, with 'upgrade' options for adults (top with a poached egg, add a spicy sauce, stir through extra herbs, swap in quinoa), tips on how to include the children in the preparations and methods to get them more interested in food. All of the dishes are veggie-packed, colourful, kid-friendly and simple - with most taking under 30 minutes to prepare. Featuring stunning photography and irresistible recipes, this is the cookbook families will be turning to night after night for quick and satisfying dishes everyone (hopefully) will love.
