In Northern Mists: Arctic Exploration in Early Times (Complete) - Fridtjof Nansen 1911

IN the beginning the world appeared to mankind like a fairy tale; everything that lay beyond the circle of familiar experience was a shifting cloudland of the fancy, a playground for all the fabled beings of mythology; but in the farthest distance, towards the west and north, was the region of darkness and mists, where sea, land and sky were merged into a congealed mass—and at the end of all gaped the immeasurable mouth of the abyss, the awful void of space. Out of this fairy world, in course of time, the calm and sober lines of the northern landscape appeared. With unspeakable labour the eye of man has forced its way gradually towards the north, over mountains and forests, and tundra, onward through the mists along the vacant shores of the polar sea—the vast stillness, where so much struggle and suffering, so many bitter failures, so many proud victories, have vanished without a trace, muffled

beneath the mantle of snow. When our thoughts go back through the ages in a waking dream, an endless procession passes before us—like a single mighty epic of the human mind's power of devotion to an idea, right or wrong—a procession of struggling, frost-covered figures in heavy clothes, some erect and powerful, others weak and bent so that they can scarcely drag themselves along before the sledges, many of them emaciated and dying of hunger, cold and scurvy; but all looking out before them towards the unknown, beyond the sunset, where the goal of their struggle is to be found. We see a Pytheas, intelligent and courageous, steering northward from the Pillars of Hercules for the discovery of Britain and Northern Europe; we see hardy Vikings, with an Ottar, a Leif Ericson at their head, sailing in undecked boats across the ocean into ice and tempest and clearing the mists from an unseen world; we see a Davis, a Baffin forcing their way to the north-west and opening up new routes, while a Hudson, unconquered by ice and winter, finds a

lonely grave on a deserted shore, a victim of shabby pilfering. We see the bright form of a Parry surpassing all as he forces himself on; a Nordenskiöld, broad-shouldered and confident, leading the way to new visions; a Toll mysteriously disappearing in the drifting ice. We see men driven to despair, shooting and eating each other; but at the same time we see noble figures, like a De Long, trying to save their journals from destruction, until they sink and die. Midway in the procession comes a long file of a hundred and thirty men hauling heavy boats and sledges back to the south, but they are falling in their tracks; one after another they lie there, marking the line of route with their corpses—they are Franklin's men.

Shadows at Dawn - Karl Jacoby 2009-11-24

A masterful reconstruction of one of the worst Indian massacres in American history. In April 1871, a group of Americans, Mexicans, and Tohono O'odham Indians surrounded an Apache village at dawn and murdered nearly 150 men, women, and children in their sleep. In the past century the attack, which came to be known as the Camp Grant Massacre, has largely faded from memory. Now, drawing on oral histories, contemporary newspaper reports, and the participants' own accounts, prize-winning author Karl Jacoby brings this perplexing incident and tumultuous era to life to paint a sweeping panorama of the American Southwest—a world far more complex, diverse, and morally ambiguous than the traditional portrayals of the Old West.

Now an Award-Winning Finalist in the Non-Fiction: Narrative category of The 2012 USA Best Book Awards, sponsored by USA Book News. Obtain a free 40-page excerpt on www.kirschstonebooks.com. Against the backdrop of World War II tragedy and devastation in Latvia, Poland and Germany and three decades of European history, this true narrative provides a window into the palpitating heart of wartime upheaval through the lives of Rolf Dutzmann and Lilo Wassull—two people fatefully positioned "on the other side." In December of 1939, swept along on a tide of dire necessity and circumstance due to the imminent Soviet takeover of his homeland, Rolf, a young Latvian aeronautical engineering student, flees with his family to Germany, a country fully under Hitler's control and already engaged in a brutal war. While the account chronicles Rolf's pursuit of his technical dream against daunting wartime odds, it is first and foremost a poignant love story that plays out against a panorama of worldwide chaos and destruction. It is also a story of the seen and unseen forces that coalesce to keep Rolf and Lilo alive after they meet in 1940 Berlin, leading them through a chain of cataclysmic events including Rolf's draft into the Luftwaffe and his father's assignment as chief inspector of V-2 rocket production; the bombing of Berlin; the destruction of their homes; their numerous desperate, cross-country escapes from the bombing, the advancing Soviet troops from the east, and other Allied forces from the west; the POW camp hardships; and the deprivation of the postwar years. Despite the immeasurable evil, suffering and desolation of World War II, a synchronistic chain of events provides an uplifting reminder that love and hope may take wing even out of the ashes of life's most terrifying adversities.

A Short History of the Renaissance in Northern Europe - Malcolm Vale 2020-04-02

The concept of a 'Renaissance' in the arts, in thought, and in more general culture North of the Alps often evokes the idea of a cultural transplant which was not indigenous to, or rooted in, the society from which it emerged. Classic definitions of the European 'Renaissance' during the 14th, 15th and 16th centuries have seen it as what was in effect an Italian import into the Gothic North. Yet there were certainly differences, divergences and dichotomies between North and South which have to be addressed. Here, Malcolm Vale argues for a Northern Renaissance which, while cognisant of Italian developments, displayed strong continuities with the indigenous cultures of northern Europe. But it also contributed novelties and innovations which often tended to stem from, and build upon, those continuities. A Short History of the Renaissance in Northern Europe - while in no way ignoring or diminishing the importance of the Hellenic and Roman legacy - seeks other sources, and different uses of classical antiquity, for a rather

different kind of 'Renaissance', if such it was, in the North.

The Art of Drawing: from the Dawn of History to the Era of the Impressionists - Richard Kenin 1974

Cities and Economic Development - Paul Bairoch 1988

When and how were cities born? Does urbanization foster innovation and economic development? What was the level of urbanization in traditional societies? Did the Industrial Revolution facilitate urbanization? Has the

growth of cities in the Third World been a handicap or an asset to economic development? In this revised translation of *De Jéricho à Mexico*, Paul Bairoch seeks the answers to these questions and provides a comprehensive study of the evolution of the city and its relation to economic life. Bairoch examines the development of cities from the dawn of urbanization (Jericho) to the explosive growth of the contemporary Third World city. In particular, he defines the roles of agriculture and industrialization in the rise of cities. "A hefty history, from the Neolithic onward. It's ambitious in scope and rich in subject, detailing urbanization and, of course, the links between cities and economies. Scholarly, accessible, and significant."—Newsday "This book offers a path-breaking synthesis of the vast literature on the history of urbanization."—John C. Brown, *Journal of Economic Literature* "One leaves this volume with the feeling of positions intelligently argued and related to the existing state of theory and knowledge. One also has the pleasure of reading a book unusually well-written. It will long both be a standard and stimulate new thought on the central issue of urban and economic growth."—Thomas A. Reiner, *Annals of the American Academy of Political and Social Science*

North of Dawn - Nuruddin Farah 2018-12-04

A couple's tranquil life abroad is irrevocably transformed by the arrival of their son's widow and children, in the latest from Somalia's most celebrated novelist. For decades, Gacalo and Mugdi have lived in Oslo, where they've led a peaceful, largely assimilated life and raised two children. Their beloved son, Dhaqaneh, however, is driven by feelings of alienation to jihadism in Somalia, where he kills himself in a suicide attack. The couple reluctantly offers a haven to his family. But on arrival in Oslo, their daughter-in-law cloaks herself even more deeply in religion, while her children hunger for the freedoms of their new homeland, a rift that will have lifealtering consequences for the entire family. Set against the backdrop of real events, *North of Dawn* is a provocative, devastating story of love, loyalty, and national identity that asks whether it is ever possible to escape a legacy of violence—and if so, at what cost.

A Complicated Legacy - Robert H. Stucky 2014-05-23

If movies and books like *Belle*, *Twelve Years a Slave*, *The Butler*, *The Help*, *A Time to Kill*, and *Amistad* have moved you, you'll love *A Complicated Legacy*, a novel by Baltimore writer Robert H. Stucky based on the true story of Elijah Willis, a white South Carolina planter, and Amy—the love of his life, the mother of his children, and his slave. Taking place in the decade leading up to the Civil War, it is written with a cinematic eye for atmosphere and setting, a linguist's ear for dialogue, and a historian's grasp of the powerful social forces and momentous events of the time. It is a riveting tale of personal transformation in facing the tide of sweeping social change. Elijah Willis fought family opposition, public opinion, and the law to free his family of choice and leave them his entire inheritance. In so doing, his and Amy's story becomes a microcosm of the human struggles that made the Civil War and the Abolition of Slavery both necessary and inevitable. Set in rural South Carolina, Baltimore, and Cincinnati, this vivid saga weaves history and humanity in a compelling testimony to the power of relationships to

shape our destinies, even a century and a half later.

Before the Dawn - Nicholas Wade 2007-03-27

"Meaty, well-written." —Kirkus Reviews "Timely and informative." —The New York Times Book Review "By far the best book I have ever read on humanity's deep history." —E. O. Wilson, biologist and author of *The Ants* and *On Human Nature* Nicholas Wade's articles are a major reason why the science section has become the most popular, nationwide, in the New York Times. In his groundbreaking *Before the Dawn*, Wade reveals humanity's origins as never before—a journey made possible only recently by genetic science, whose incredible findings have answered such questions as: What was the first human language like? How large were the first societies, and how warlike were they? When did our ancestors first leave Africa, and by what route did they leave? By eloquently solving these and numerous other mysteries, Wade offers nothing less than a uniquely complete retelling of a story that began 500 centuries ago.

[Dawn-Dusk Asymmetries in Planetary Plasma Environments](#) - Stein Haaland 2017-10-04

DawnDusk Asymmetries in Planetary Plasma Environments Dawn-dusk asymmetries are ubiquitous features of the plasma environment of many of the planets in our solar system. They occur when a particular process or feature is more pronounced at one side of a planet than the other. For example, recent observations indicate that Earth's magnetopause is thicker at dawn than at dusk. Likewise, auroral breakups at Earth are more likely to occur in the pre-midnight than post-midnight sectors. Increasing availability of remotely sensed and in situ measurements of planetary ionospheres, magnetospheres and their interfaces to the solar wind have revealed significant and persistent dawn-dusk asymmetries. As yet there is no consensus regarding the source of many of these asymmetries, nor the physical mechanisms by which they are produced and maintained. Volume highlights include: A comprehensive and updated overview of current knowledge about dawn-dusk asymmetries in the plasma environments of planets in our solar system and the mechanisms behind them Valuable contributions from internationally recognized experts, covering both observations, simulations and theories discussing all important aspects of dawn-dusk asymmetries Space weather effects are caused by processes in space, mainly the magnetotail, and can be highly localized on ground. Knowing where the source, i.e., where dawn-dusk location is will allow for a better prediction of where the effects on ground will be most pronounced Covering both observational and theoretical aspects of dawn dusk asymmetries, *Dawn-Dusk Asymmetries in Planetary Plasma Environments* will be a valuable resource for academic researchers in space physics, planetary science, astrophysics, physics, geophysics and earth science.

Field Notes from the Northern Forest - Curt Stager 1998-06-01

Few people pause to consider the living habits of mosquitoes as they swat away the pesky creatures. But biologist Curt Stager views plants and wildlife with particular consideration, interest, and awe. Stager reminds us that many mosquitoes do not bite humans at all, and those that do are only females trying to feed their unborn young, risking death each time they do so. He includes twenty natural science essays that explore the lives of animals, plants, and fungi commonly encountered in

the conifer and hardwood forests of northeastern North America. With the same humor and personable ease that characterizes the popular weekly nature program that he coproduces on North County Public Radio—the show that provided the catalyst for this book—Stager draws on the latest scientific literature and on his own field observations to convey his curiosity about the natural world.

The Dawn of Everything - David Graeber 2021-11-09

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a

monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

Devil in the Grove - Gilbert King 2012-03-06

Winner of the Pulitzer Prize "A must-read, cannot-put-down history." — Thomas Friedman, New York Times Arguably the most important

American lawyer of the twentieth century, Thurgood Marshall was on the verge of bringing the landmark suit *Brown v. Board of Education* before the U.S. Supreme Court when he became embroiled in a case that threatened to change the course of the civil rights movement and cost him his life. In 1949, Florida's orange industry was booming, and citrus barons got rich on the backs of cheap Jim Crow labor with the help of Sheriff Willis V. McCall, who ruled Lake County with murderous resolve. When a white seventeen-year-old girl cried rape, McCall pursued four young black men who dared envision a future for themselves beyond the groves. The Ku Klux Klan joined the hunt, hell-bent on lynching the men who came to be known as "the Groveland Boys." Associates thought it was suicidal for Marshall to wade into the "Florida Terror," but the young lawyer would not shrink from the fight despite continuous death threats against him. Drawing on a wealth of never-before-published material, including the FBI's unredacted Groveland case files, as well as unprecedented access to the NAACP's Legal Defense Fund files, Gilbert King shines new light on this remarkable civil rights crusader.
