Mordin on Time - Nick Mordin 2003-02

In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

Walker Evans - Walker Evans 2001

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

A Brave New China. The big Change - Francesco Sisci 2014-09-17

How the Chinese look at themselves, the world, and the challenges of the future. Where is China, What is China: Where are the traditional pigtailed of the old mandarins, the Mao's bicycles and his suits? Where are the large families with the many concubines? The stuff that made China for centuries in all the stories Chinese and foreigners told of this huge country is gone. China now is skyscrapers, limousines, fast trains, science fiction airports, bright neon lights that explode in the night more than fireworks. Chinese are changing and have changed beyond recognition. In fact, they have changed so much that they do not see themselves in their present shape, just like an animal going through a metamorphosis. We are in the middle of this huge transformation and we don't know if and when the new shape will stabilize and what impact it will have on the conscience of the Chinese and of the people of the world looking at China. This book is an exploration into this huge revolution that is affecting the whole planet in the biggest way possibly since the fall of the Roman Empire.

Extreme Economies - Richard Davies 2020-07-20

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

Acts of Infidelity - Lena Andersson 2019-04-23

Like diving into the mind of a brilliant, infuriating friend, this novel dissects the experience of "the other woman" with tremendous wit and

insight. When Ester Nilsson meets the actor Olof Sten, she falls madly in love. Olof makes no secret of being married, but he and Ester nevertheless start to meet regularly and begin a strange dance of courtship. Olof insists he doesn't plan to leave his wife, but he doesn't object to this new situation either...it's far too much fun. Ester, on the other hand, is convinced that things might change. But as their relationship continues over repeated summers apart, and winters full of heated meetings in bars, she is forced to realize the truth: Ester Nilsson has become a mistress. Ester's and Olof's entanglements and arguments are the stuff of relationship nightmares. Cutting, often cruel, and written with piercing humor, *Acts of Infidelity* is clever, painful, maddening, but most of all perfectly, precisely true.

[The Book of L](#) - G. Rozenberg 2012-12-06

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

[The Living Infinite](#) - Chantel Acevedo 2017-09-14

A story of love, adventure, power and the eternal quest to take control of one's destiny *The Living Infinite* is inspired by the true story of the Spanish princess Eulalia, an outspoken rebrand at the Bourbon court during the troubled final years of her family's reign. After her cloistered childhood at the Spanish court, her youth spent in exile, and a loveless

marriage, Eulalia willingly accepts a role as royal emissary far from a crumbling Europe, in the New World. In the company of Tomas Aragon, the son of her one-time wet nurse, and a small-town bookseller with a thirst for adventure, she travels by ship first to a Cuba bubbling with revolutionary fervor then on to the 1893 Chicago World Fair. Publicly, she is there as a representative of the Bourbon dynasty, privately, she is in America to find a publisher for her autobiography, a secret manuscript that if published might well turn the old world order on its head.

Eulalia's personal rebellion resonates long after the final page of this captivating saga.
