Amber Revolution - Simon J Woolf 2021-10-05

A must-have volume for all wine lovers and those who love orange wine. Written by renowned orange wine expert and award winning writer Simon J. Woolf, Amber Revolution is the world's first book to tell the full, forgotten story of this ancient wine (white wine made like a red wine) and its modern struggle to gain acceptance. It is a tale of lost identity, the fight for survival, and pioneering winemakers--from the Caucasus to the Adriatic. White grapes are left in contact with their skins for days, weeks or months during fermentation, creating stunning complexity, unusual aromas and intense flavors. The extended skin contact gives these wines bold amber, russet, or orange tints. The technique is ancient, but the hype is new and fast growing. This book includes profiles of 180 of the best producers from 20 countries worldwide and is crammed full of all the information you need to find the best orange wines worldwide together with tips for how to buy, enjoy, food-match and age them. Beautifully illustrated with over 150 specially commissioned photos, Amber Revolution is an essential reference work for any wine lover, sommelier, retailer or producer who loves orange wine. International Grape Varieties In Italy - Rebecca Lawrence 2021-09-22

It's not just people who travel all over the world, it's grapes too! The Jumbo Shrimp Guide to International Grape Varieties in Italy explores the grapes that have found their home in Italy, but originated somewhere else, a subject often downplayed in modern literature about wine in Italy in favour of trendier native grapes. This book is ideal for novices as a reference tool, but perfect for students looking to enhance their knowledge of international varieties in particular areas.

Vols. for 1887- contains Bibliografia geologica italiana, 1886- published separately.

Clinical Pain Management - Mary E. Lynch
2011-03-16

Clinical Pain Management takes a practical, interdisciplinary approach to the assessment and management of pain. Concise template chapters

serve as a quick reference to physicians, anesthetists and neurologists, as well as other specialists, generalists, and trainees managing pain. Based on the International Association for the Study of Pain's clinical curriculum on the topic, this reference provides to-the-point best-practice guidance in an easy-to-follow layout including tables, bullets, algorithms and guidelines.

The World of Mineral Deposits - Florian Neukirchen 2020-02-28

This vivid introduction to economic geology not only describes the most important deposit types, but also the processes involved in their formation. Magmatic, hydrothermal and sedimentary processes as well as weathering and alteration are explained in the framework of plate tectonics and the history of the Earth. The chapter about fossil fuels includes unconventional deposits and the much-debated fracking. Other topics covered are exploration, mining and economic aspects like commodity prices.

[Italy's Native Wine Grape Terroirs](#) - Ian D'Agata
2019-08-27

Italy's Native Wine Grape Terroirs is the definitive reference book on the myriad crus and the grand cru wine production areas of Italy's native wine grapes. Ian D'Agata's approach to discussing wine, both scientific and discursive, provides an easy-to-read, enjoyable guide to Italy's best terroirs. Descriptions are enriched with geologic data, biotype and clonal information, producer anecdotes and interviews, and facts and figures compiled over fifteen years of research devoted to wine terroirs. In-depth analysis is provided for the terroirs that produce both the well-known wines (Barolo, Chianti Classico, Brunello di Montalcino) and those not as well-known (Grignolino d'Asti, Friuli Colli Orientali Picolit, Ischia). Everyday wine lovers, beginners, and professionals alike will find this new book to be the perfect complement to D'Agata's previous award-winning Native Wine Grapes of Italy.

The World Atlas of Wine 8th Edition - Jancis

Robinson 2019-10-01

Few wine books can be called classic, but the first edition of The World Atlas of Wine made

publishing history when it appeared in 1971. It is recognized by critics as the essential and most authoritative wine reference work available. This eighth edition will bring readers, both old and new, up to date with the world of wine. To reflect all the changes in the global wine scene over the past six years, the Atlas has grown in size to 416 pages and 22 new maps have been added to the wealth of superb cartography in the book. The text has been given a complete overhaul to address the topics of most vital interest to today's wine-growers and drinkers. With beautiful photography throughout, Hugh Johnson and Jancis Robinson, the world's most respected wine-writing duo, have once again joined forces to create a classic that no wine lover can afford to be without. "The World Atlas of Wine is the single most important reference book on the shelf of any wine student." - Eric Asimov, New York Times "The most useful single volume on wine ever published... If I owned only one wine book, it would be this one." - Andrew Jefford, Decanter "Like a good bottle of wine, you'll find yourself going back to it again and again... Perfect for anyone who has a thirst for greater wine knowledge." - Edward Deitch, NBC/today.com "The World Atlas of Wine belongs on your shelf... The essential rootstock of any true wine lover's library. A multi-layered snapshot of wine and how it has evolved." - Dave McIntyre, Washington Post

The Crisis of the 14th Century - Martin Bauch
2019-12-16

Pre-modern critical interactions of nature and society can best be studied during the so-called "Crisis of the 14th Century". While historiography has long ignored the environmental framing of historical processes and scientists have over-emphasized nature's impact on the course of human history, this volume tries to describe the at times complex modes of the late-medieval relationship of man and nature. The idea of 'teleconnection', borrowed from the geosciences, describes the influence of atmospheric circulation patterns often over long distances. It seems that there

were 'teleconnections' in society, too. So this volume aims to examine man-environment interactions mainly in the 14th century from all over Europe and beyond. It integrates contributions from different disciplines on impact, perception and reaction of environmental change and natural extreme events on late Medieval societies. For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research. For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes.
