1 Brief, 50 Designers, 50 Solutions in Fashion Design - Natalio Martin Arroyo 2011-06-01

When a fashion designer creates a collection, their focus is on the personal profile of the individual who will wear their garments. This

book explores the creative mind of top fashion designers and asks the question, who would their "It" boy or "It" girl be and what would they wear? In 1 Brief, 50 Designers, 50 Solutions in Fashion Design, fifty designers create their own stylistic definition of what is "it" in fashion. They bring us through their creative process and share with us the final results.

Fashion Knitwear - Jenny Udale 2014-04-28
Knitwear is one of the most exciting areas in fashion today, where craft and digital processes collide to create desirable, innovative clothing. Fashion Knitwear showcases 40 designers around the world, including Missoni, Sibling and Sonia Rykiel, who use hand and machine knitting, crochet and macramé, as well as knit fabrics such as jersey, to produce fashion garments. Each profile delves into the designer's practice, inspiration and career path and includes inspiring images of their work. Interviews explore approaches to knitwear and how different knit stitches, techniques and yarns are used to create colour, pattern and texture. This book will appeal to anyone interested in knitwear, from hobby knitters looking for inspiration to students and fashion designers wanting a current overview of the scene.

Smart Clothes and Wearable Technology -

Jane McCann 2022-09-16

Smart Clothes and Wearable Technology, Second Edition focuses on the design process, material selection, garment construction, and new production techniques for smart clothing. Building on the success of the previous edition, this book brings wearable technologies ever closer to market with its design-led approach to the integration of technologies into textiles. This design-led, cross-disciplinary approach to the development of hybrid processes ensures that results are both attractive and usable to wider audiences. The book will also help designers adapt their product development processes in response to novel textile and garment manufacturing technologies. Case studies showing best practices and warning of pitfalls help the reader develop applications and products in the real world. The differences between testing and design for smart and traditional clothes are also discussed. Features new chapters on textile processes including knit, weave, print and embroidery for specialist Smart Clothing and footwear applications, as well as for personal protection Provides an update on current applications and investigates possible future developments in the integration of technology into clothing Raises important issues around end-of-life and disposal of smart clothing and wearable technologies

The Conscious Closet - Elizabeth L. Cline
2019-08-20

From journalist, fashionista, and clothing resale expert Elizabeth L. Cline, "the Michael Pollan of fashion,"* comes the definitive guide to building an ethical, sustainable wardrobe you'll love. Clothing is one of the most personal expressions of who we are. In her landmark investigation *Overdressed: The Shockingly High Cost of Cheap Fashion*, Elizabeth L. Cline first revealed fast fashion's hidden toll on the environment, garment workers, and even our own satisfaction with our clothes. *The Conscious Closet* shows exactly what we can do about it. Whether your goal is to build an effortless capsule wardrobe, keep up with trends without harming the environment, buy better quality, seek out ethical brands, or all of the above, *The Conscious Closet* is packed with the vital tools you need. Elizabeth delves into fresh research on fashion's impacts and shows how we can leverage our everyday

fashion choices to change the world through style. Inspired by her own revelatory journey getting off the fast-fashion treadmill, Elizabeth shares exactly how to build a more ethical wardrobe, starting with a mindful closet clean-out and donating, swapping, or selling the clothes you don't love to make way for the closet of your dreams. *The Conscious Closet* is not just a style guide. It is a call to action to transform one of the most polluting industries on earth—fashion—into a force for good. Readers will learn where our clothes are made and how they're made, before connecting to a global and impassioned community of stylish fashion revolutionaries. In *The Conscious Closet*, Elizabeth shows us how we can start to truly love and understand our clothes again—without sacrificing the environment, our morals, or our style in the process. *Michelle Goldberg, *Newsweek/The Daily Beast*

A Cultural History of Dress and Fashion in the Modern Age - Alexandra Palmer 2018-11-01

Over the last century there has been a complete transformation of the fashion system. The unitary top-down fashion cycle has been replaced by the pulsations of multiple and simultaneous styles, while the speed of global production and circulation has become ever faster and more complex. Running in tandem, the development of artificial fibres has revolutionized the composition of clothing, and the increased focus on youth, sexuality, and the body has radically changed its design. From the 1920s flapper dress to debates over the burkini, fashion has continued to be deeply involved in society's larger issues. Drawing on a wealth of visual, textual and object sources and illustrated with 100 images, *A Cultural History of Dress and Fashion in the Modern Age* presents essays on textiles, production and distribution, the body, belief, gender and sexuality, status, ethnicity, and visual and literary representations to illustrate the diversity and cultural significance of dress and fashion in the period.

Teacher resource guide - Jeanette Weber 2003

You might not realize it, but the clothing you choose meets certain basic needs that all people share. Clothing meets many needs. Some are physical -- for comfort, protection, and safety. Clothing covers the body and protects it from the weather, harm, and injury. Other needs are intellectual, emotional, and social. Clothes can communicate lots of information about people

and their lives. Clothes can make you feel attractive and self-confident. Clothes can also help you identify with other people and feel like part of a group. - p. 25.

Recycling from Waste in Fashion and Textiles - Pintu Pandit 2020-07-15

The alarming level of greenhouse gases in the environment, fast depleting natural resources and the increasing level of industrial effluents, have made every single manufacturing activity come under the scrutiny of sustainability. When all kinds of waste such as clothes, furniture, carpets, televisions, shoes, paper, food wastes etc. end up in the landfill, only a few of them are naturally decomposed and thus a large majority remains as non-biodegradable. It is for this reason, efforts are concentrated to reduce the burden on earth by this waste, and as far as used textile products are concerned, there are now attempts to recycle or up-cycle. This book addresses the role of sustainability by using textile waste in fashion and textiles with respect to manufacturing, materials, as well as the economic and business challenges and opportunities it poses. This wide-ranging book comprises 19 chapters on the various topics including: · Solutions for sustainable fashion and textile industry · Agro and bio waste in the fashion industry · Innovating fashion brands by using textile waste · Waste in handloom textiles · Business paradigm shifting: 21st century fashion from recycling and upcycling · Utilization of natural waste for sustainable textile coloration · Circular economy in fashion and textile from waste · Future pathways of waste utilization for fashion · Sustainable encapsulation of natural dyes from Plant waste for textiles · Agro-waste applications for bio-remediation of textile effluent

Sustainable Approaches in Textiles and Fashion -

Subramanian Senthilkannan Muthu 2022-05-12

This first of this set of books presents the various sustainable approaches in terms of circular economy and micro plastic pollution pertaining to the textiles and fashion supply chain. Sustainability is one of the important aspects in today's industrial context, which is followed by every industrial sector with no exception to textiles and fashion. Sustainability

and strict adherence to the principles of sustainability has become one of the essential needs in industry. There are countless measures in terms of various approaches to make the textiles and fashion sector sustainable. These measures, but not limited to, range from innovating and implementing new fibres and raw materials, introducing innovative manufacturing methods, chemicals, processes to focus on all the possible stages of a textile product's life cycle from cradle to grave. These approaches include making the textiles and fashion sector circular and also development of new products from sustainable raw materials/processes or combination of both.

X-Radiography of Textiles, Dress and Related Objects - Sonia O'Connor 2007-08-15

X-radiography of textile objects reveals hidden features as well as unexpected components and materials. This non-destructive technique throws light on construction, manufacturing techniques, use, wear, repair, patterns of decay and dating. X-radiography improves artefact documentation and interpretation as well as guiding conservation approaches by enhancing understanding. This book explores techniques for X-raying textiles. It describes approaches to image interpretation and explains how, through digitisation and digital image manipulation, maximum information can be realised. Case studies include archaeological, ecclesiastical and ethnographic textiles, items of dress and accessories, upholstery, quilts, embroideries, dolls and toys. Museum professionals will find this stimulating book an essential guide for developing their own practice or commissioning textile X-radiographs.

Fashion Design for Living - Alison Gwilt 2014-11-13

Fashion Design for Living explores the positive

contribution that the contemporary fashion designer can make within society. The book seeks to reveal new ways of designing and making fashion garments and products that not only enhance and enrich our lives, but also are mindful of social and sustainable issues. This book sets out to question and challenge the dominant, conventional process of fashion design that as a practice has been under-researched. While the fashion designer in industry is primarily concerned with the creation of the new seasonal collection, designed, produced and measured by economically driven factors, society increasingly expects the designer to make a positive contribution to our social, environmental and cultural life.

Consequently an emergent set of designers and research-based practitioners are beginning to explore new ways to think about fashion designing. The contributors within this book argue that fashion designing should move beyond developing garments that are just aesthetically pleasing or inexpensive, but also begin to consider and respond to the wearer's experiences, wellbeing, problems, desires and situations, and their engagement with and use of a garment. Fashion Design for Living champions new approaches to fashion practice by uncovering a rich and diverse set of views and reflective experiences which explore the changing role of the fashion designer and inspire fresh, innovative and creative responses to fashion and the world we live in.

Textile-Based Advanced Materials - Thomas Bechtold 2021-03-17

Developments in the science and technology of textiles are not only limited to apparel and fashion. Certainly, there are research efforts aimed at improving the construction and processing of textiles for clothing—such as studies on cleaner production to reduce environmental impact, increasing the utilization of fibers and process chemicals from renewable resources, and on the recycling of materials from post-consumer waste apparel back into the manufacturing of new clothing articles. In addition, technological concepts developed for the creation of clothing over the centuries are now being investigated for use in a diverse array of fields—such as in the manufacture of engineering composites, personal protective equipment, and medicine. Further, developments in other fields—such as electronics, nanotechnology, and information and communication technologies—are being investigated for their incorporation into apparel and clothing to create “smart textiles”. The aim of this Special Issue is to put together a collection of scientific reports on such efforts to highlight the range of scientific and technological issues that are being targeted and the ingenuity of the methodologies employed to find answers. It is hoped that readers of this issue will come away with an appreciation of the research being conducted in this area, and perhaps gain inspiration for their own scientific endeavors.
