**Corporate Champions** - B. Karunakar 2011-11-16  
The year 1991 was a turning point in the history of the Indian economy. Liberalization saw a tremendous increase in competition from multinationals in almost all industrial sectors. This book examines how a few 'Good' Indian companies became 'Excellent' by withstanding the onslaught of competitive pressures and flourishing despite a fast-changing and unpredictable economic environment. Distilling vast amounts of data on 23 Indian companies belonging to a range of industries, the book draws out the factors that made them achieve

business excellence. The author uses a three-tier filtering process with increasingly strict criteria for narrowing down from the initial 144 companies to the 23 researched cases, and then to the final seven exceptional organizations. In the quest to find the answer to what made these companies perform exceptionally, the author proposes a business model based on strategy, execution excellence and leadership, which provides a compelling explanation for the superlative performance of these outstanding companies.

**8th International Munich Chassis Symposium 2017** - Prof. Dr. Peter E. Pfeffer 2017-09-20

You can find in this book the development of highly and fully automatic driving and the increasing electrification of the powertrain now face chassis development with new challenges too. Innovative chassis systems have to provide solutions for automated driving. The efficient chassis of the future also has to keep an eye on CO2 targets, comfort and customer focus at all times. A modern chassis has to provide for this in the form of innovations while taking the physical and mechanical interdependencies into account. Confronting these new developments is a challenge for simulation and testing.

*Responsible Corporate Governance* - Maria Aluchna 2017-05-10

This book discusses the tasks and functions of corporate governance in the light of current challenges and the dynamics that arise from a broader approach to company management and the integration of corporate governance with corporate social responsibility (CSR) and sustainability. Addressing the corporate governance shortcomings that are believed to have contributed to the recent financial crisis, it explores the interplay between corporate governance and CSR, and includes examples of company practice to show how such changes affect the practices of shareholders, boards of directors and regulators. In particular, the book examines shareholders' activities, their different investment strategies, specific reporting expectations and the submission of proposals to the annual meeting. Further, for boards of directors it explores the need to revise their tasks with respect to the criteria for executive appointments, their corporate strategy, performance measures and diversity recommendations, while for directors it provides recommendations to reconsider the structure of executive pay and performance incentives. Lastly, for regulators the book investigates the need to introduce new laws addressing, for instance, the need for integrated reporting, limiting the voice of short term oriented shareholders and providing guidelines for executive compensation.

*Brand New Justice* - Simon Anholt 2006-08-11

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but

also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.
